

# Silica Gel Blue

## Description:

Blue silica gel has the special characteristics that its color changes from blue to pink after moisture absorption.

## Applications:

1. Mainly used for the recovery, separation and purifying of carbon dioxide gas.
2. It is used for preparation of carbon dioxide in synthetic ammonia industry, food & beverage processing industry, etc.
3. It may also be used for drying, moisture absorption as well as dewatering of organic products.

## Specification:

Specification	unit	Blue Silica Gel
Size	mm	3-5
Adsorption (25°C)	RH=50% ≥%	18
wear rate	≤%	10
Qualified size ratio	≥%	90
Loss on heating	≤%	5
Color	RH=50%	Light purple or Light red

## Standard Package:

25kg/woven bag

## Attention:

The product as desiccant cannot be exposed in the open air and should be stored in dry condition with air-proof package.
