CHONGQING
NEW WORLD TRADING CO., LTD.

CNWTC promises to offer reliable quality
and professional service forever.

Company Profiles ▼

Chongqing New World Trading Co., Ltd. (CNWTC) was established in 2009, which is a professional manufacturer and exporter in the area of laboratory and medical products. Our factory locates in Haimen City, Jiangsu Province, and only 2 hours' driving to Shanghai port. The geographical advantage allows us to provide convenient and fast delivery.

We supply full range of products which covers laboratory consumables (pipette tip, test tube, centrifuge tube, urine container, cryo tube, sample cup), medical consumables (blood collection tube, swabs, blood lancet, alcohol pad, face mask, disposables gown, nitrile gloves, coverall) and laboratory & medical equipment. And those products were CE and ISO13485 certified.

We have good experience in supplying qualified products and considerate service to customers from all over the world like European, Middle East, Southeast Asia, Africa, South & North America and so on. Looking forward to cooperate with you.

Product Usage

Centrifuge tubes are used to contain liquids during centrifugation, which separates the sample into its components by rapidly rotating it around a fixed axis.

Features

- Full range volumes from 0.1ml to 50ml, apply to different solutions;
- Different bottom shapes and cap types for various testing purpose;
- Made of high quality polypropylene raw material, enables excellent view of tube contents;
- Clear printing graduation or mold graduation and big writing area makes easy reading and recording;
- Brown tubes are available;
- Leak proof, withstand high centrifugal forces;
- Non Sterile, RNase DNase DNA Free, EO sterilization are optional;
- Available with different packing types according to requirements.

Model No.	Description	Cap Type	Material	Packing
TYA101	Centrifuge Tube 50ml, free standing bottom, Printing graduation	Screw Cap	PP	50pcs/bag, 500pcs/ctn
TYA101-S	Centrifuge Tube 50ml, Free Standing, Individual Packing, E.O. Sterile, Printing graduation	Screw Cap	PP	1pc/bag, 50pcs/bag, 500pcs/ctn
TYA102	Centrifuge Tube 50ml, Conical Bottom, Printing graduation	Screw Cap	PP	50pcs/bag, 500pcs/ctn
TYA102-S	Centrifuge Tube 50ml, Conical Bottom, Individual packing, E.O. Sterile, Printing graduation	Screw Cap	PP	1pc/bag, 50pcs/bag, 500pcs/ctn
TYA102-2	Centrifuge Tube 50ml, Conical Bottom, Foam Rack, Printing graduation	Screw Cap	PP	25pcs/rack, 500pcs/ctn
TYA103	Centrifuge Tube 50ml, Round Bottom, Printing graduation	Screw Cap	PP	50pcs/bag, 500pcs/ctn
TYA104	Centrifuge Tube 25ml, Round Bottom, Printing graduation	Screw Cap	PP	100pcs/bag, 1000pcs/ctn
TYA105	Centrifuge Tube 15ml, Conical Bottom, Printing graduation	Screw Cap	PP	100pcs/bag, 2000pcs/ctn
TYA105-S	Centrifuge Tube 15ml, Conical Bottom, Individual packing, E.O. Sterile, Printing graduation	Screw Cap	PP	1pc/bag, 100pcs/bag, 500pcs/ctn
TYA105-2	Centrifuge Tube 15ml, Conical Bottom, Foam Rack, Printing graduation	Screw Cap	PP	25pcs/rack, 500pcs/ctn
TYA106	Centrifuge Tube 15ml, Round Bottom, Printing graduation	Screw Cap	PP	100pcs/bag, 2000pcs/ctn
TYA107	Centrifuge Tube 15ml, Flat Bottom, Printing graduation	Screw Cap	PP	100pcs/bag, 2000pcs/ctn
TYA108	Centrifuge Tube 10ml, Conical Bottom, Printing graduation	Screw Cap	PP	100pcs/bag, 1000pcs/ctn
TYA108-S	Centrifuge Tube 10ml, Conical Bottom, Individual packing, E.O. Sterile, Printing graduation	Screw Cap	PP	1pc/bag, 100pcs/bag, 1000pcs/ctn
TYA109	Centrifuge Tube 10ml, Round Bottom, Printing graduation	Screw Cap	PP	100pcs/bag, 1000pcs/ctn

Product Usage

Microcentrifuge tube is a small centrifuge tube, which is used in conjunction with a micro centrifuge for the separation and centrifugation of trace reagents, and is widely used in the field of life sciences and clinical trials.

Features

- Full range volumes from 0.1ml to 10ml, apply to different solutions;
- Different bottom shapes and cap types for various testing purpose;
- Various Colors can be customized for distinguishing different samples;
- Made of high quality polypropylene raw material, enables excellent view of tube contents;
- Clear mold graduation and big writing area makes easy reading and recording (for 0.5ml-10ml);
- Tight and leak-free seal can open easily, even with gloves;
- Withstand high centrifugal forces;
- Bulk pack, RNase DNase DNA Free, EO sterilization are optional.

Various Colors

Model No.	Description	Cap Type	Material	Packing
TYA201	Centrifuge Tube 10ml, Round bottom, mold graduation	Snap Cap	PP	200pcs/bag, 3000pcs/ctn
TYA202	Centrifuge Tube 7ml, Round bottom, mold graduation	Snap Cap	PP	200pcs/bag, 4000pcs/ctn
TYA203	Centrifuge Tube 5ml, Round bottom, mold graduation	Snap Cap	PP	200pcs/bag, 6000pcs/ctn
TYA204	Centrifuge Tube 5ml, Conical bottom, mold graduation	Snap Cap	PP	100pcs/bag, 2000pcs/ctn
TYA205	Centrifuge Tube 2ml, Round bottom, mold graduation	Snap Cap	PP	500pcs/bag, 10000pcs/ctn
TYA206	Centrifuge Tube 2ml, conical bottom mold graduation	Snap Cap	PP	500pcs/bag, 10000pcs/ctn
TYA207	Centrifuge Tube 1.5ml, conical bottom, mold graduation	Snap Cap	PP	500pcs/bag, 10000pcs/ctn
TYA208	Centrifuge Tube 1.5ml, conical bottom, Shield Lid, mold graduation	Snap Cap	PP	500pcs/bag, 10000pcs/ctn
TYA209	Centrifuge Tube 0.5ml, conical bottom, Shield Lid, mold graduation	Snap Cap	PP	1000pcs/bag, 25000pcs/ctn
TYA210	centrifuge tube 0.5ml, conical bottom, mold graduation	Snap Cap	PP	500pcs/bag, 10000pcs/ctn
TYA211	Centrifuge Tube 0.2ml, conical bottom, no Graduation, Flat Lid	Snap Cap	PP	1000pcs/bag, 50000pcs/ctn
TYA212	Centrifuge Tube 0.2ml, conical bottom, no Graduation, convex Lid	Snap Cap	PP	1000pcs/bag, 50000pcs/ctn
TYA213	Centrifuge Tube 0.1ml, conical bottom, no Graduation, Flat Lid	Snap Cap	PP	1000pcs/bag, 50000pcs/ctn

Product Usage

Centrifuge Tube boxes and racks are designed for storage of centrifuge tubes, it helps prevent sample loss and contamination.

Features

- Made of high quality polypropylene material with goods chemical resistance
- Reusable and durable
- Can be autoclaved at 121°C
- Various types of boxes and racks for different volume centrifuge tubes
- Stack either full or empty to save benchtop space
- Customize colors are available for easy sample identification

Model No.	Description	Hole	Application	Packing
TYA301	Reversible Plate for microcentrifuge Tubes, one side for 0.5ml and another side for 1.5ml	96-well	0.5ml & 1.5ml	100pcs/ctn

TYA303	Reversible Plate for microcentrifuge Tubes, one side for 0.5ml and another side for 1.5ml	60-well	0.5ml & 1.5ml	100pcs/ctn
TYA304	Centrifuge Tube Box with cover, for microcentrifuge tubes	32-well	5ml	100pcs/ctn
TYA305	Centrifuge Tube Box with cover, for microcentrifuge tubes	50-well	1.5ml & 2ml	100pcs/ctn
TYA306	Centrifuge Tube Box with cover, for microcentrifuge tubes	72-well	1.5ml & 2ml	100pcs/ctn
TYA307	Centrifuge Tube Box with cover, for microcentrifuge tubes	72-well	0.5ml	250pcs/ctn
TYA308	Centrifuge Tube Box with cover, for microcentrifuge tubes	96-well	0.1ml & 0.2ml	50pcs/ctn
TYA309	Multifunction Centrifuge Tube Rack , 4-way (4-well for 50ml, 12-well for 15ml, 32-well for 0.5ml, 32-well for 1.5ml & 2ml)	80-well	50ml & 15ml & 2ml & 1.5ml & 0.5ml	50pcs/ctn
TYA310	Multifunction Centrifuge Tube Rack , trapezoid (4-well for 50ml, 7-well for 7ml & 10ml & 15ml, 21-well for 5ml, 16-well for 1.5ml & 2ml, 20-well for 0.5ml, 24-well for 0.1ml & 0.2ml)	92-well	For all sizes from 0.1ml to 50ml	1pc/bag, 50pcs/ctn
TYA311	Centrifuge Tube Rack 30pcs of 15ml and 20pcs of 50m	50-well	50ml & 15ml	1pc/bag, 50pcs/ctn
TYA312	Centrifuge Tube Rack 18pcs of 15ml and 10pcs of 50m	28-well	50ml & 15ml	1pc/bag, 50pcs/ctn
TYA313	Centrifuge Tube Rack	21-well	50ml	1pc/bag, 50pcs/ctn
TYA314	Centrifuge Tube Rack	60-well	15ml	1pc/bag, 50pcs/ctn

Product Usage

Cryogenic Vials (Cryotubes) are designed for the storage of biological samples at cryogenic temperatures.

Features (Economic Type)

- Made of medical grade polypropylene material
- The anti-slip lines on the cap and the tube body are easy for screw.
- Built-in O-ring to prevent liquid leakage
- Withstands temperatures approximately from -80 to +100°C
- Customized cap colors are available for easy sample identification
- EO sterilization or non-sterile are optional

Model No.	Description	Bottom Shape	Graduation	Packing
TYB101	0.5ml Cryotube, with Gasket	Conical	Without	500pcs/bag, 25000pcs/ctn

TYB114	5ml Cryotube, with Gasket	Free standing	Printing Graduation	200pcs/bag, 4000pcs/ctn
TYB115	5ml Cryotube, with Gasket	Free standing	Mold Graduation	200pcs/bag, 4000pcs/ctn
TYB116	10ml Cryotube, with Gasket	Free standing	Mold Graduation	200pcs/bag, 2000pcs/ctn

Features (Superior Type)

- Withstands temperatures from -196 to +121°C;
- Built-in rubber O-ring to prevent liquid leakage;
- DNase/RNase free, EO sterilization and non-sterile are optional;
- Made of high quality medical grade polypropylene material;
- The arc-shaped bottom design is convenient for centralized processing of liquids and reduces residues;
- Various Color parts are available.
- Clear printing graduation with big writing area;
- The texture of the cap is easy to rotate the cap;

Product Usage

Cryobox is designed to store and protect cryovial tube in cell culture, pharmaceutical research and other biotechnology laboratories.

Features

- Available with different materials (PP, PC, paper cardboard) for different storage temperatures;
- Can customized grid printing for easy reading and marking;
- International standard design, suitable for standard size cryovial tube;
- Stack either full or empty to save benchtop space;
- Customize colors are available for easy sample identification.

Model No.	Description	Hole	Application	Packing
TYB301	PP cryobox, with separate cap, endure -80°C +100°C	25-well	For 1.8ml & 2ml	100pcs/ctn

Product Usage

Pipette Tips are disposable accessory for the uptake and dispensing of liquids by using a pipette. They are mainly used in any molecular biology or genetic research application in laboratory.

Features (Economic Type)

- Made of medical grade polypropylene material. Suitable for molecular biology experiments.
- Full range of volumes from 10ul to 10ml, apply to different solutions.
- With good transparency, easy to observe the liquid level when using.
- Universal design, compatible with most famous pipettes like Gilson, Eppendorf etc.
- Non Sterile, RNase DNase DNA Free, EO sterilization are optional.
- Available with different packing types according to requirements, like bag packing, rack packing, stack packing.

Model No.	Description	Volume	Color	Packing
TYC101	Gilson Pipette Tip	10ul	Clear	1000pcs/bag, 100000pcs/ctn

TYC113-1	Eppendorf Pipette Tip	1000ul	Clear	500pcs/bag, 15000pcs/ctn
TYC114	Gilson Pipette Tip	5ml	Clear	250pcs/bag, 5000pcs/ctn
TYC115	Dalong Pipette Tip	5ml	Clear	250pcs/bag, 5000pcs/ctn
TYC116	Finland Pipette Tip	5ml	Clear	250pcs/bag, 5000pcs/ctn
TYC117	Thermo Pipette Tip	10ml	Clear	100pcs/bag, 2000pcs/ctn
TYC118	Dalong Pipette Tip	10ml	Clear	100pcs/bag, 2000pcs/ctn
TYC119	Finland Pipette Tip	10ml	Clear	100pcs/bag, 2000pcs/ctn

Product Usage

Filter Pipette tips are single-use laboratory consumables made from polypropylene and are also with an aerosol barrier filter made of polyethylene. It provides an effective protective structure between the pipette and the sample to eliminate the risk of cross-contamination between the specimen and the micropipette. The filter pipette tips are mainly used in laboratory, hospital, and other research center.

Type-1 (Economic Type)

TYC201-TYC220

Features

- Made of high quality medical grade polypropylene, Suitable for molecular biology experiments;
- Full range of volumes from 10ul to 10ml, apply to different solutions;
- Mold Graduated easy for identification;
- Available with Transparent /Yellow/Blue color, with good transparency;
- Autoclavable, withstand 121°C;
- Non Sterile, RNase DNase DNA Free, EO sterilization are optional;
- Universal design, compatible with most famous pipettes like Gilson, Eppendorf, Biohit etc;
- Available with different packing types according to requirements, like bag packing, rack packing.

TYC217	Filter pipette tips, for Finland	5ml	Clear	EO sterile	250pcs/bag, 20bags/ctn 28pcs/box, 30box/ctn
TYC218	Filter pipette tips, for Thermo, Rainin, Rongtai	10ml	Clear	EO sterile	250pcs/bag, 20bags/ctn 24pcs/box, 20box/ctn
TYC219	Filter pipette tips, for Dalong, Eppendorf, Biohit	10ml	Clear	EO sterile	250pcs/bag, 20bags/ctn 24pcs/box, 20box/ctn
TYC220	Filter pipette tips, for Finland, Eppendorf, Biohit, Dalong	10ml	Clear	EO sterile	250pcs/bag, 20bags/ctn 24pcs/box, 20box/ctn

Type-2 (High Quality)

Features

- Made of virgin polypropylene material with highest quality;
- Mold Graduated easy for identification;
- Autoclavable, withstand 121°C;
- Universal design, compatible with most famous pipettes like Gilson, Eppendorf, Biohit etc;
- Available with different packing types according to requirements, like bag packing, rack packing;
- Low retention material is available for your choice.

TYC301-TYC316

Model No.	Description	Volume	Color	Sterile type	Packing
TYC301	Filter pipette tips short, universal type	10ul	Clear	DNase/RNase Free, Non-Pyrogenic	Bag Packing: 1000pcs/bag, 10000pcs/ctn Rack Packing: 96pcs/rack, 10racks/box, 50racks/ctn
TYC302	Filter pipette tips long, universal type	10ul	Clear	DNase/RNase Free, Non-Pyrogenic	Bag Packing: 1000pcs/bag, 10000pcs/ctn Rack Packing: 96pcs/rack, 10racks/box, 50racks/ctn

TYC304	Filter pipette tips, universal type	50ul	Clear/ Yellow	DNase/RNase Free, Non-Pyrogenic	Bag Packing: 1000pcs/bag, 10000pcs/ctn Rack Packing: 96pcs/rack, 10racks/box, 50racks/ctn
TYC305	Filter pipette tips, universal type	100ul	Clear/ Yellow	DNase/RNase Free, Non-Pyrogenic	Bag Packing: 1000pcs/bag, 10000pcs/ctn Rack Packing: 96pcs/rack, 10racks/box, 50racks/ctn
TYC306	Filter pipette tips, universal type	200ul	Clear/ Yellow	DNase/RNase Free, Non-Pyrogenic	Bag Packing: 1000pcs/bag, 10000pcs/ctn Rack Packing: 96pcs/rack, 10racks/box, 50racks/ctn
TYC307	Filter pipette tips, long 58mm, universal type	200ul	Clear	DNase/RNase Free, Non-Pyrogenic	Bag Packing: 1000pcs/bag, 10000pcs/ctn Rack Packing: 96pcs/rack, 10racks/box, 50racks/ctn
TYC308	Filter pipette tips, long 90mm, universal type	200ul	Clear/ Yellow	DNase/RNase Free, Non-Pyrogenic	Bag Packing: 1000pcs/bag, 10000pcs/ctn Rack Packing: 96pcs/rack, 10racks/box, 50racks/ctn
TYC309	Filter pipette tips, long 60mm, universal type	300ul	Clear	DNase/RNase Free, Non-Pyrogenic	Bag Packing: 1000pcs/bag, 10000pcs/ctn Rack Packing: 96pcs/rack, 10racks/box, 50racks/ctn
TYC311	Filter pipette tips, universal type	1000ul	Clear	DNase/RNase Free, Non-Pyrogenic	Bag Packing: 1000pcs/bag, 10000pcs/ctn Rack Packing: 96pcs/rack, 10racks/box, 50racks/ctn
TYC312	Filter pipette tips, universal type	1250ul	Clear/ Blue	DNase/RNase Free, Non-Pyrogenic	Bag Packing: 1000pcs/bag, 10000pcs/ctn Rack Packing: 96pcs/rack, 10racks/box, 50racks/ctn
TYC313	Filter pipette tips, for Eppendorf, Dalong, Gilson etc.	5ml	Clear	DNase/RNase Free, Non-Pyrogenic	100pcs/bag, 10bags/ctn 40pcs/box, 30box/ctn
TYC314	Filter pipette tips, for Thermo, Finnpiptette, F1&F2, Brand etc (no graduation)	5ml	Clear	DNase/RNase Free, Non-Pyrogenic	100pcs/bag, 10bags/ctn 40pcs/box, 30box/ctn
TYC315	Filter pipette tips, for Eppendorf Gilson etc	10ml	Clear	DNase/RNase Free, Non-Pyrogenic	100pcs/bag, 10bags/ctn 24pcs/box, 30box/ctn
TYC316	Filter pipette tips, for Thermo, Finnpiptette, Brand etc (no graduation)	10ml	Clear	DNase/RNase Free, Non-Pyrogenic	100pcs/bag, 10bags/ctn 24pcs/box, 30box/ctn

Type-3 (High Quality)

TYC401-TYC409

Features

- Made of virgin polypropylene material with highest quality;
- Volume ranges from 10ul to 1250ul, apply to different solutions;
- Mold Graduated easy for identification;
- Transparent clear color with good transparency;
- Autoclavable, withstand 121°C;
- EO sterilized, DNase RNase free, Pyrogenic free;
- Universal design, compatible with most famous pipettes like Gilson, Eppendorf, Biohit etc;
- Available with different packing types according to requirements, like bag packing, rack packing.

Model No.	Description	Volume	Color	Sterile type	Packing
TYC401	Filter pipette tips short, universal type	10ul	Clear	DNase/RNase Free, Non-Pyrogenic	Bag Packing: 1000pcs/bag, 10000pcs/ctn Rack Packing: 96pcs/rack, 10racks/box, 50racks/ctn

TYC504

TYC505

TYC506

TYC507

Product Usage

The pipette tip box is designed to hold pipette tips, they are widely used in laboratory, hospital, school or other research center.

Features

- Made of durable polypropylene material
- Multi-size available for different volumes of pipette tips
- Stack either full or empty to save benchtop space
- Customize colors are available for easy sample identification

Model No.	Description	Available tips	Packing

Individual Packing

Product Usage

Pasteur pipette also named transfer pipette, which is used for the absorption, transfer of small or trace amount of liquid. Dual bulb Pasteur pipette is designed to dispense precise volumes of liquids in a simple manner. They are widely used in testing, reagent addition applications and clinical laboratories.

Features

- Made of high quality LDPE material;
- Available volume: 60ul, 100ul, 120ul, 0.2ml, 0.5ml, 1ml, 2ml, 3ml, 5ml, 10ml;
- Optimizing process on surface tension, easy for the liquid flowing;
- High transparency, easy to observe;
- High elasticity, adapted to fast liquid transfer without leakage;
- Convenient and accurate for use with good repeatability;
- Available in E.O. or without sterilization;
- Pasteur pipette can be bent within a certain range, and can enter the micro or special-shaped container for liquid extraction and liquid addition operations.

 Serological pipette

TYC701-TYC706

 Product Usage

Serological pipette mainly used for accurate measure or transfer for certain volume liquid and is widely employed in the field of cell culture, bacteriology, clinical research, etc.

 Features

- Made of high-grade polystyrene (GPPS);
- Graduations are calibrated within $\pm 2\%$;
- Smooth and clean without drawing lines;
- Different colors correspond to different specification, easy to distinguish;
- Clear and simple graduation, makes the liquid drawing and reading easier;
- All serological pipettes are assembled with high quality filters;
- Free of DNAses, RNAses, DNA and PCR inhibitors, non-pyrogenic.

 Model No.	 Description	 Packing
TYC701	Serological pipette 1ml	1pc/bag, 50pcs/bag, 10bag/box, 6box/ctn

TYC706	Serological pipette 50ml	1pc/bag, 25pcs/bag, 4bag/box, 3box/ctn

 Pipette

 Single Channel Pipette

TYC801-TYC911

 Product Usage

Pipettes are devices for transporting traces of liquid, especially measured amount, which is commonly used in the areas of chemistry, biology, and medicine.

With various designs in terms of levels of precision, pipettes serve for different purposes.

Our pipettes features as accuracy, user-friendly simple calibration and fast transporting.

The ergonomically designed pipette is light in weight,

its digital volume display and integrated ejector contribute to the quick and easy replacement of tips.

Due to its compatibility with widely used standard pipette tips, it is often the favorite choice of labs.

 Features

- The wide range of Volume: 0.1ul to 10 ml;
- Precise setting: volume can be perfectly identified due to digital display;
- High comfort: the low force required when comparing the same range of pipettes to complete the draining force (must press the bottom), The less force means the lower the risk of finger damage caused by long-term use;
- Easy and quick calibration and repair: with accessory tools;
- Tip ejector: perfectly designed for narrow tubes;
- Tip cone is autoclavable.
- Packing: 1pc/box, 50pcs/carton;

Multichannel pipette

TYC1201-TYC1303

TYC1401-TYC1503

Product Usage

Our 8/12 Channels Adjustable pipettes are available in a range of models to meet the operational needs of common laboratory tasks. The pipettes are highly accurate and efficient. The lightweight handle and 360° rotating manifold are designed to prevent muscle strain, helping the operator to work longer without fatigue. The tips ejector can simultaneously push multiple tips, which is highly efficient and labor-saving. Each channel is individually calibrated to ensure accuracy. The whole design of our pipettes helps to achieve stable, accurate sampling, which is important for handling valuable sample fluids and reagents.

Features

- Two options: 8-channel /12-channel;
- The wide range of Volume: The volume of the pipette is from 0.5 ul to 300 ul, the increment is 0.5;
- High-tech material: durable, high temperature resistant and corrosion resistant;
- Telescopic elastic tip design: help prevent the tip from being installed high and low, ensuring pipetting tightness and uniformity;
- Strict calibration: Each pipette is tested and calibrated before leaving the factory;
- Channel digital identification: ensure pipetting in the same direction;
- Semi autoclavable: 121℃ (Tip Cone).

Pipette stand

TYC1601

TYC1602

TYC1603

Product Usage

The pipette stand has 3 series, linear , L-type and round stand for pipettes.

Each stand can accommodate 6 single-channel pipettes or multi-channel pipette.

The stand is light in weight, easy to organize and store. Also, it can be assembled conveniently.

- Features
- Convenience: It is safe and clean to place the pipette on the stand after use, and it is very convenient to use the pipette for next time
 - The pipette stand keeps the work area in the lab clean and orderly. Avoid contamination of pipettes.

Model No.	Description	Packing
TYC1601	Pipette stand	30pcs/ctn
TYC1602	Pipette stand	20pcs/ctn
TYC1603	Pipette stand	20pcs/ctn

Bottle-top dispenser

TYC1701-TYC1705

Product Usage

The high-precision drive system of the electronic bottle dispenser makes the entire titration process stable and precise.

The external magnetic stirrer completes the work process in one go. It can be widely used in chemical analysis, the food industry, environmental analysis, and other fields.

- Features
- Highest accuracy and precision;
 - Robust and stable, made of high quality materials;
 - 100% drip-free due to our unique anti-drip system;
 - One handed operation;
 - Easy to clean, completely autoclavable at 121℃.

Pipette Pump

Product Usage

These manual pipette pumps feature a thumbwheel for precision filling or dispensing of liquids. Insert glass or plastic pipettes into the secure tapered collar and then quickly dispense liquid by depressing its white side bar or plunger. The pumps can operate easily with one hand.

Features

- Rotate the knurled thumb wheel to aspirate liquid to the desired volume;
- Apply light pressure to the fast release lever to rapidly dispense;
- Rotate the thumb wheel for gradual dispensing;
- Glass or plastic pipettes are easily inserted into a collar for a secure hold;
- Sizes are color coded; can be disassembled for cleaning.

Large Volume Pipette Controller

Product Usage

Large Volume Pipette Controller is the precise and easy to use pipette controller that's always ready to use. After attaching a pipette, one squeeze of its large rubber filling bulb is all it takes to start pipetting - there are no wires, no tubing and no battery to recharge! Begin aspirating by moving the lever which is designed to precisely control the filling speed, based on how gently or firmly you press the lever. A built-in replaceable filter ensures optimum rate and protects the controller from liquid penetration and over-fill. A separate button provides a positive blow-out function when required.

TYC1901-TYC1905

Features

- Light, easy to handle by one hand;
- Continuous fill in the liquid by pressuring the rubber ball;
- Volume: 0.1-100ml.
- Easy to discharge liquid, with high accuracy;
- Easy to operate and labor-saving;

Model No.	Description	Color	Packing
TYC1901	Pipette controller 0.1-100ml	Blue	1pc/box, 50pcs/ctn
TYC1902	Pipette controller 0.1-100ml	Green	1pc/box, 50pcs/ctn

TYC1904	Pipette controller 0.1-100ml	Red	1pc/box, 50pcs/ctn
TYC1905	Pipette controller 0.1-100ml	Black	1pc/box, 50pcs/ctn

Electronic Pipette Controller

TYC2001

Product Usage

Electronic Pipette Controller designed for work with glass or plastic serological pipettes from 0.1 to 100 ml range. Conveniently positioned switches allow choosing different operation modes and speed depending on the volume of the serological pipette and liquid viscosity. Additionally aspirating and dispensing speed is controlled through two comfortable finger triggers. The electric pipette adopts international advanced design concept and manufacturing technology, shape smooth and beautiful, compact and firm structure, high versatility, simple operation and other advantages. On the basis of meeting the demand of pipetting, the electric pipette optimizes the sense of use; sensitive the speed control function can easily and smoothly pipetting and separating liquid for a variety of liquids; Large LCD display screen makes the battery allowance, suction, discharge speed at a glance, better for fine culture medium was removed or added during cell inoculation or passage. More flexible and comfortable liquid operation, faster experimental process.

Features

- Rotate the knurled thumb wheel to aspirate liquid to the desired volume;
- Apply light pressure to the fast release lever to rapidly dispense;
- Rotate the thumb wheel for gradual dispensing;
- Glass or plastic pipettes are easily inserted into a collar for a secure hold;
- Sizes are color coded; can be disassembled for cleaning.

TYD101-115

TYD116

TYD201-203

Product Usage

Test tube is made of superior PP/PS material, it has a good chemical compatibility. Adapted to storage for most of polar organic solvent, weak acid, weak base. Multiple sizes and types can meet various test requirements.

Features

- Plastic test tube bottom: Round/Conical bottom;
- Test Tube Material: polystyrene or polypropylene;
- Volume: 5ml, 6ml, 7ml, 8ml, 9ml, 10ml, 11ml, 15ml, 16ml;
- Matching caps available, can be opened single-handed;
- Caps are available in different colors.

Model No.	Description	Material	Packing
TYD101	Test Tube 12x75mm	PS	500pcs/bag, 5000pcs/ctn

Product Usage

The test tube rack is used to place test tubes, and sometimes it is also used to observe some experimental phenomena. It is the most basic experimental instrument in a chemical laboratory. It has various styles, colors, suitable for many kinds of test tubes and centrifuge tubes. Can meet different test operation need. In the test tube rack attached to the corresponding number of holes. Have holes can be put to the test tube shaft with or to continue to observe the reaction.

Features

- It is very easy to assemble and snap together securely in seconds;
- Shipped in flat to save a lot space;
- Easy to take in a centrifuge tube and test tube;
- With complete specifications, smooth internal surface, bright use this, it is convenient, clean, beautiful and space-saving.

TYE111

TYE112/TYE113

Product Usage

Petri dish mainly apply for fungus, bacteria and other microorganism culture.

Features

- Made of high transparency medical grade PS material.
- Superior production technique makes the dish thickness uniform.
- The dish bottom is smooth and clean without deformation, which makes the quantitative analysis more precise.
- Easy to stack up with the stack up circle.
- Vent design for easy air exchange.
- E.O or Gamma radiation sterile available.

Tissue culture plate

TYE201-TYE206

TYE207-TYE210

Product Usage

Tissue culture plate is a biological appliance, sterile with individual bag.

Features

- Made of high-quality PS material, transparent color;
- The surface is specially treated to ensure tissue or cell adhesion;
- Individual packed, moisture proof and bacterial proof;
- Provide EO Sterile or Gamma radiation or DNase RNase free;
- U bottom, V bottom, Flat bottom are available.

Model No.	Description	Packing
TYE201	Tissue Culture Plate 96 Well, U Bottom, without Cover, EO Sterile	1pc/bag, 200pcs/ctn
TYE202	Tissue Culture Plate 96 Well, U Bottom, with Cover, EO Sterile	1pc/bag, 200pcs/ctn
TYE203	Tissue Culture Plate 96 Well, V Bottom, without Cover, EO Sterile	1pc/bag, 200pcs/ctn
TYE204	Tissue Culture Plate 96 Well, V Bottom, with Cover, EO Sterile	1pc/bag, 200pcs/ctn
TYE205	Tissue Culture Plate 96 Well, Flat Bottom, without Cover, EO Sterile	1pc/bag, 200pcs/ctn
TYE206	Tissue Culture Plate 96 Well, Flat Bottom, with Cover, EO Sterile	1pc/bag, 200pcs/ctn
TYE207	Tissue Culture Plate 6 Well, EO Sterile	1pc/bag, 200pcs/ctn

Cell culture flask

TYE301-TYE302

TYE303-TYE304

TYE305-TYE306

Product Usage

Cell culture flask used for fungus, bacteria and other microorganism culture, provides an in vitro culture environment for cells and tissues. Ordinary sealing cover (SEAL CAP) is suitable for cell and tissue culture under sealed conditions, so that the culture environment is completely isolated from the outside world, but if the bottle cap is turned out for 1/4 circumference during use, it can also be used in open culture conditions. Water filter cover (VENT CAP) is a hydrophobic membrane with a pore size of 0.22um, which can meet the needs of gas exchange in cell and tissue culture, and can effectively prevent cross-contamination, suitable for open culture conditions.

Features

- Made of high transparency medical grade PS material, the thickness is uniform of the flask, the surface is smooth and without distortion. Three sizes of volume available: 50ml, 250ml and 600ml.
- Sealing cap and vent cap are available.
- Vacuum plasma surface culture (TC culture) to improve the hydrophilia of surface, excellent on cell adherent culture, flask without TC cultured can also be supplied for suspension cell.
- Sterilized by Gamma radiation, DNase/ RNase free, Non-pyrogenic.

Model No.	Description	Packing
TYE301	Cell Culture Flask, 25cm ² 50ml, Seal Cap	100pcs/box, 2000pcs/ctn
TYE302	Cell Culture Flask, 25cm ² 50ml, Vent cap	100pcs/box, 2000pcs/ctn

TYE304	Cell Culture Flask, 75cm ² 250ml, Vent Cap	100pcs/box, 2000pcs/ctn
TYE305	Cell Culture Flask, 175cm ² 600ml, Seal Cap	100pcs/box, 2000pcs/ctn
TYE306	Cell Culture Flask, 175cm ² 600ml, Vent Cap	100pcs/box, 2000pcs/ctn

Cell Culture Tube

Product Usage

Cell culture tube made by ultra clear virgin polypropylene/virgin polystyrene. Material PP and PS are optional, polystyrene tubes are transparent. Polypropylene tubes are opaque, break-resistant. Widely used and referenced in laboratory protocols.

Features

- Sterilized by EO / Gamma radiation
- DNase RNase Free, Non Pyrogenic
- Different Growth area Available

TYE401-TYE404

Square Media Bottle

TYE501-TYE506

Product Usage

PET square media bottles are used to store and sample active pharmaceutical ingredients, and can also be used to store and dispense buffers, cultures, or PH-sensitive liquids for long-term storage. The price of raw materials is cheaper than PETG, the finished product is light in weight , not easy to break, low production cost and high cost performance.

PETG square media bottle, also named serum bottle or storage bottle, is used to store and sample active pharmaceutical ingredients, and can also be used to store and dispense buffers, cultures, or PH-sensitive liquids for long-term storage. If you have higher requirements for solution preservation performance and transparency, it is recommended to purchase PETG square media bottles.

Features

- The bottle body can be made of high-quality PET/ PETG material, and the bottle cap is made of HDPE material;
- The capacity scale is clear to ensure accuracy and the surface is smooth and easy to clean;
- The chamfer design of the bottle mouth and cap has been strictly tested to ensure no leakage; the design of the body is easy to hold, easy to store and transport;
- PET operating temperature: -70℃-120℃; PETG operating temperature: -60℃-75℃;
- Compared with PET, the transparency of PETG is higher and the light transmittance is up to 90%;
- PETG is better than PET in terms of chemical resistance, oil resistance, weather resistance (yellowing) properties, mechanical strength, and barrier properties to oxygen and water vapor;
- DNase/RNase free, no pyrogen, no endotoxin. Irradiation sterilization.

Model No.	Description	Material	Packing
TYE501	Square Media Bottle 30ml	PET/PETG	40pcs/bag,200pcs/ctn
TYE502	Square Media Bottle 60ml	PET/PETG	40pcs/bag,200pcs/ctn

Inoculation Loop

TYE601/TYE602/TYE607

TYE603-TYE606/TYE608/TYE609

Product Usage

Inoculation loops are widely used in microbiology and biotechnology to transfer and inoculate small amounts of microorganisms, such as bacteria or yeasts, from one substrate to another.

Features

- Made of high quality PP,ABS material;
- A variety of colors are used to distinguish different specifications;
- No flash, no burrs, will not puncture the agar surface;
- Easy to tear paper-plastic individual or bulk packaging.

Model No.	Description	Material	Sterilization	Packing

L-shape cell spreader

TYE701-TYE706

Product Usage

It is mainly used in the flat coating of microbial culture medium, which can make cells or bacteria evenly distribute and grow on the surface of culture dishes and culture plates.

Features

- The surface is smooth, and the tail is designed upward to reduce damage to the agar surface;
- L-shaped design for easy use;
- Cell spreader is made of high quality PS or PP material;
- No flash, no burrs, will not puncture the agar surface;
- EO sterile or DNase/RNase free, no pyrogen, no endotoxin;

Model No.	Description	Material	Sterilization	Packing
TYE701	L-Shape Cell Spreader,1pcs/bag,Orange/Blue/white Color	PP/PS	Non-Sterile	2000pcs/ctn

TYG103

TYG104

TYG105

TYG106

TYG107

TYG108

TYG109

TYG110

TYG111

Product Usage

PCR tube is a consumable for molecular biology PCR experiments. It is widely used in genetics, biochemistry, immunity, medicine and other fields. It is not only used in basic research such as gene isolation, cloning and nucleic acid sequence analysis, but can also be used in the diagnosis of diseases or in places with DNA and RNA. It is mainly in conjunction with PCR/qPCR/real-time PCR and other experiments.

Features

- Made of medical grade clear polypropylene(PP);
- Tube & cover have good sealing performance, prevent pollution and easy to open;
- The smooth and thin tube wall ensures the efficiency and uniformity of heat conduction;
- Transparent or White color;
- DNase/RNase Free, Non-Pyrogenic.

Model No.	Description	Volume	Material	Packing
TYG101	PCR single tube, 0.2ml, with flat cap	0.2ml	PP	100pcs/bag,10bags/ctn

TYG216

Product Usage

PCR plate is widely used in the fields of genetics,biochemistry,immunity,medicine,etc. it is not only used in basic research such as gene isolation,cloning and nucleic acid sequence analysis, but also in the diagnosis of diseases or any place with DNA and RNA. It is a disposable consumable in the laboratory.

Features

- Made of medical grade imported clean polypropylene(pp)
- Suitable for standard 96well/384well module and is produced in strict accordance with high-quality standards. The experimental results are uniform,and the tube wall is thin and uniform, which ensures the heat transfer speed and uniform heating if the sample.
- 8/12 strip tube cover or plate sealing film can be used
- Applicable to 0.1ml/0.2ml thermal cycle module
- Independent packaging, DNase/RNase Free, Non-Pyrogenic.

The deep well plate and tip comb

TYG301

TYG302

TYG303

TYG304

TYG305

TYG306

TYG307

TYG308

TYG309

Product Usage

The deep well plate and tip comb are used for tip identification, master sampling and storage, HTS, mechanical sampling, and automated pipetting systems. In addition, it is also suitable for nucleic acid extraction experiments, as well as the storage of most organic solutions, alkaline and acidic solutions and other laboratory solutions. In the nucleic acid extraction process, magnetic rod sleeve separates the magnetic rod from the liquid and prolongs the service life of the magnetic rod.

Features

- Made of medical grade polypropylene (PP) material with high chemical stability;
- The thickness of the bottom and side walls is uniform.
- The upper part of the plate is flat and uniform for easy sealing;
- Can be sealed with adhesive film;
- DNase/RNase free, Non-pyrogen;
- Autoclavable (121° C, 20 minutes without deformation).

Model No.	Description	Material	Packing
TYG301	24 Deep Well Plate	PP	10pcs*10bag

Aluminum foil Sealing Film

Product Usage

Aluminum foil Sealing Film is suitable for low-temperature storage, high-temperature experiments, PCR, chemiluminescence experiments; It is used for the preservation of light-sensitive substances and the sealing of uneven surfaces.

Features

- It is 100% tightness, and heat sealing technology is superior to other sealing methods;
- Without any adhesive, avoid contact with contamination of samples;
- Aluminium foil seals is not easily dissolved by organic solvents such as DMSO;
- It is easy to peel.

TYG401

Model No.	Description	Temperature range	Description	Material	Packing
TYG401	Aluminum Foil Sealing Film	-80°C ~ +120°C	143 x 83mm	Aluminum	100pcs x 50box

Aluminum foil Sealing Film

Product Usage

Suitable for a variety of applications including PCR and cell culture, it provides an excellent seal for the entire plate during shipping or storage. is an easy and cost-effective way to seal panels and enhance automation.

Features

- Exceptional seal across entire plate safeguards samples during transport or storage;
- The sealing film eliminates well to well contamination and cross-over in PCR application.

TYG402

Model No.	Description	Temperature range	Description	Material	Packing
TYG402	Clear sealing film	-20°C ~ +110°C	146 x 81mm	PP	100pcs x 50box

Extraction Tube

TYG501

TYG502

TYG503

TYG504

Product Usage

Extraction tube is used to extract ordinary or viscous liquids for titration, and can be equipped with filter elements. It is widely used in the pipetting of biochemistry, environmental monitoring, nucleic acid, and antigen detection reagent buffers, which also can be used as packing supplies for SARS-CoV-2 antigen rapid test kit.

Features

- Made of medical quality plastic material;
- Ultra-transparent, which is easy to observe;
- The tube body has high softness and toughness, which is easy to squeeze the solution;
- The tube is thin, this design reduces the amount of extraction buffer, increases the concentration of viral antigens in the sample. and increases the positive detection rate of viral antigens;
- The tube body and the tube cap are well sealed to ensure no leakage;
- Several kinds of extraction tube for your choice.

Model No.	Description	Material	Packing
TYG501	Spin Columns with 2ml collection tube 4layers/6layers/8layers/12layers	PS, High-quality silicone membrane	10000pcs/ctn

Embedding Cassette

TYH101

TYH102

TYH102-1

TYH103

TYH110

TYH104-TYH109

Product Usage

Embedding cassettes are generally made of plastic and are used for tissue embedding before paraffin sectioning in hospitals or laboratory pathological examinations.

Features

- Flow-thru slots in tissue cassettes
- Biopsy cassettes feature small pore openings
- 45° angle cassette for surface marking
- Three shapes available: stripe hole, square hole, round hole
- Different colors available: white, pink, blue, orange and yellow, etc.

Model No.	Description	Material	Packing
TYH101	Embedding Cassette Stripe Holes	POM	250pcs/bag, 5000pcs/ctn
TYH102	Embedding Cassette Square Holes	POM	250pcs/bag, 5000pcs/ctn

Microtome blade

TYH203

TYH204

TYH205

TYH206

TYH201

TYH202

TYH207

TYH208

Product Usage

The disposable microtome blade is used for any type of microtome and cryostat microtome in tissue specimen sectioning.

Features

- Made of high-alloyed stainless steel, coupled with advanced technology development and production;
- The microtome blade is suitable for manual microtome, sliding microtome, cryostat microtome in Pathology or research laboratories;
- In low/high profile microtome blade.

Model No.	Description	Type	Specification	Packing
TYH201	Microtome Blade RD-1601A	Low-Profile	80x8x0.25mm, Angle: 34°	50pcs/box
TYH202	Microtome Blade RD-1601B	High-Profile	80x8x0.325mm, Angle: 34°	50pcs/box

TYH206	Microtome Blade for Feather S35	Low-Profile	80x8x0.254mm, Angle: 35°	50pcs/box
TYH207	Microtome Blade for Leica 818	High-Profile	80x14x0.35mm	50pcs/box
TYH208	Microtome Blade for Leica 819	Low-Profile	80x8x0.25mm	50pcs/box

Laboratory Wax Plate

Product Usage

The Laboratory wax plate is used for closing micro hematocrit capillary tube, Up to 24 capillary tubes can be placed vertically in numbered positions along the sides of the tray.

This Wax plate has 2 x 24 numbered positions per pair which makes it easy to seal and transport samples.

Features

- This capillary tube sealing tray contains a unique wax compound that quickly forms a leak-tight seal;
- Plates have holes for the stand to make for easy use;
- No need for plastic caps or heat sealing;
- Non-toxic, non-drying and non-hardening, the sealant is formulated to withstand centrifugation;
- The wax plate has 24 numbered places for easy patient identification;
- Each pair can be forced apart and used separately.

TYH301

Model No.	Description	Specification	Material	Packing
TYH301	Capillary tube wax seal plate	24-place	Natural wax	10pcs/box

Paraffin Wax

Product Usage

Paraffin Wax is designed for improved tissue section infiltration & embedding and supplied in convenient pearl shape.

Features

- Compound of purified paraffin and plastic polymers;
- Without dimethyl sulfoxide (DMSO);
- Delivers smooth cutting, minimized compression & cell disruption;
- Cutting thickness lowered to 2 μm;
- Convenient pearl shape;
- Wide supply range from 56°C to 62°C for your free choice.

TYH401

Model No.	Description	Specification	Packing
TYH401	Histology Embedding Paraffin Wax	56-58°C/ 58-60°C/ 60-62°C/ 52-54°C/ 54-56°C	1kg/bag, 10x1kg/carton

Microscope Slides

TYI7101

TYI7102

TYI7105

TYI7107

TYI7109

TYI01

Product Usage

The microscope slide is a glass sheet used to hold a specimen when observing it under a microscope. When making a sample, a cell or tissue section is placed on the slide, and a cover slide is placed on it for observation. Optically, a glass-like sheet used to produce a phase difference is rectangular in size 25.4 mm wide 76.2 mm long, and 1 mm thick.

Features

- Optically pure soda-lime glass or borosilicate glass, flat surfaces with no impurities;
- Available with clean cut or perfect ground edges;
- Available as plain, single, or twin-frosted working surfaces;
- Improved frosting for maximum opacity;
- Washed and clean ready for use;
- Through rigid quality control procedures;
- Packed in boxes of 50, 65 or 72 slides;
- Individual boxes over wrapped for safe shipment, dispatch, and storage
- standard sizes and packages are available.

Model No.	Description	Dimension	Thickness	Packing
TYI7101A	Glass, polished edges, plain	25.4x76.2mm	1-1.2 (mm)	50pcs/box, 65pcs/box, or 72pcs/box, 50box/ctn

Product Usage

The cover glass slip is placed over a specimen on a microscope slide, to hold the specimen in place and protect it from contamination from the environment. At the same time, the cover slip protects the lens of the microscope, stopping it from coming into contact with the specimen.

Features

- The material is made by normal float glass, super white glass, or boro3.3 glass material;
- The normal thickness is 0.13-0.17mm, thickness also can be customized;
- Plastic individual bag or aluminum bag for each box is available;
- No fogging, no scratches, no bubbles on the cover slide surface.

Product Usage

Microscope Slides Storage Boxes included Microscope slide Mailer, slide tray, slide box, staining rack and jar and dry stand. They also made by different materials, like cardboard, Polypropylene, ABS and Glass. They are suitable for placing different size slides.

Features

- Can offer different types, from 1 place to 100 place;
- The flat surface area is good for labeling or writing;
- They are reusable to decrease the cost;
- Suitable for 25x75mm or 25x76mm slide, safe and secure transport of microscope slide.

Plastic Beaker

TYT101-TYT110

Product Usage

Plastic beakers and measuring cylinders are common laboratory vessels to measure liquid quantitatively by volume. The scale is marked on the outer wall, and the volume of the liquid in the cup can be roughly estimated.

Features

- Easy to clean, easy to use, and can be reused;
- Lightweight and not fragile, there are clear scale lines on the beaker and cylinder, which can clearly distinguish and measure the volume of liquid;
- High-quality polypropylene plastic material, strong and durable, can be made into different volumes and sizes.

Model No.	Description	Material	Packing
TYT101	Plastic Beaker 25ml, Molded Graduation	PP	2000pcs/ctn
TYT102	Plastic Beaker 50ml, Molded Graduation	PP	2000pcs/ctn
TYT103	Plastic Beaker 100ml, Molded Graduation	PP	1000pcs/ctn
TYT104	Plastic Beaker 150ml, Molded Graduation	PP	1000pcs/ctn
TYT105	Plastic Beaker 250ml, Molded Graduation	PP	500pcs/ctn
TYT106	Plastic Beaker 500ml, Molded Graduation	PP	300pcs/ctn
TYT107	Plastic Beaker 1000ml, Molded Graduation	PP	200pcs/ctn
TYT108	Plastic Beaker 2000ml, Molded Graduation	PP	100pcs/ctn
TYT109	Plastic Beaker 3000ml, Molded Graduation	PP	60pcs/ctn
TYT110	Plastic Beaker 5000ml, Molded Graduation	PP	30pcs/ctn

Remark: With handle, without handle are available upon client's request.

Measuring Cylinder

TYT201-TYT208

Model No.	Description	Material	Packing
TYT201	Measuring Cylinder 10ml, Molded Graduation	PP	2000pcs/ctn

TYT208	Measuring Cylinder 2000ml, Molded Graduation	PP	20pcs/ctn

Plastic Wash Bottle

Product Usage

Washing bottles are often used in the quantitative transfer of solutions, washing various glass instruments in the laboratory such as test tubes or round bottom flasks, or in experimental operations such as suction filtration.

Features

- The scale is clear, and the mouth pot is convenient for rinsing the utensils;
- LDPE body for flexibility, elasticity, impact, stress-cracking, and moisture resistance, and is lightweight;
- Unnecessary impurities or particles in the experiment cannot penetrate into the washing bottle to avoid contamination of the liquid in the bottle.

Parafilm m laboratory film

TYY401-TYY403

Product Usage

Parafilm M is highly insensitive to water, moisture loss, and moisture absorption, yet is permeable to oxygen and carbon dioxide.

Parafilm M stretches more than 350% of its original length and is self-sealing, allowing it to cling around irregular shapes and surfaces.

These unique properties make it ideal for protecting the contents of test tubes, flasks, beakers, and Petri dishes as well as an overwrap to further secure stoppers, lids, and caps.

Model No.	Type	Width	Length	Packing
TYY401	PM992	2in (5 cm)	250feet (75 m)	24boxes/ctn

TYY403	Pm998	20in (50 cm)	50 feet (15 m)	6boxes/ctn

Plastic Reagent Bottle

TY501

TY502

TY503

TY504

TY505

TY506

TY507

TY508

Product Usage

Plastic reagent bottles are used for chemical reagents. Reagents that are easy to decompose or deteriorate when exposed to light are generally contained in brown bottles, such as nitric acid, silver nitrate, and chlorine water. It's suitable for universities and industrial laboratories.

Features

- Leak-proof design;
- Uniform wall thickness without wall hangings;
- High-quality construction;
- Made of high-quality polypropylene PP /high-density polyethylene HDPE raw material, for PP is heat resistant to 121℃ and can be autoclaved;
- Complete range of sizes, the reagent bottles are available in a wide range of sizes from 8ml to 1000ml;
- Color can be Transparent, White, or Brown.

Model No.	Description	Material	Packing
TY501	Plastic Reagent Bottle 8ml, Wide Mouth	PP/HDPE	150pcs/bag, 1500pcs/ctn
TY502	Plastic Reagent Bottle 15ml, Wide Mouth	PP/HDPE	120pcs/bag, 1200pcs/ctn

Lens Cleaning Paper

Product Usage

Lens Cleaning Tissues provide a solution to safely remove moisture and grease from lenses or optical surfaces. Soft texture will not damage lenses or optical surfaces and leaves no fibers. High absorbency leads to increased safety upon removal of surface moisture and grease.

Material: Cotton paddle fiber
Basis Weight (g/m2): 11±2
Available Sizes: 10x15cm, 8.5x11cm
Packing: 100sheets/pack, 200packs/carton

TYZ301

Litmus Paper

TYV401-402

Product Usage

Litmus paper is a filter paper that has been treated with a lichen-provided natural-soluble dye. They mainly used to assess whether a solution is acidic or basic. The color transition occurs over the pH range 4.5-8.3 at 25°C(77°F), with blue litmus paper turning red under acidic conditions and red litmus paper turning blue under basic or alkaline conditions.

Model No.	Type	Strip size	Packing
TYZ401	Litmus Paper Blue	9x70mm	20 Strips/booklet, 5 booklet/box,1000boxes/carton or 20 Strips/booklet, 10 booklet/box,500boxes/carton

Medical Disposables

Pressure Activated Safety Blood Lancet

Introduction

It is a lancing device designed to be simple-to-use, gentle, safe and convenient. Using contact activation, the needle gently pricks the skin and retracts back to the device.

Features

- **Safe blood:** Design of blood collection needle: the blood collection needle accurately penetrates into the skin depth, just to meet the needs of blood collection, will not penetrate into the nerve layer, relatively safe.
- **Small painful blood:** High - speed auto - rebound reduces time in the skin, as if painless.
- **Complete in specifications:** Bright color, beautiful appearance, a variety of specifications of different sizes of needles can be used to meet the needs of different groups of blood loss.
- **Simplicity of operator:** Remove the protective cap, find the right position, press forward, blood can be collected.
- **Sharp tip:** Fast blood collection, sufficient blood volume, before and after use, the tip of the needle back shrink, avoid secondary infection, the operator more assured.

Square Shape

Material: ABS+stainless steel

Lancing Device

Introduction

The depth of the skin jab is measured by the number of millimeters the needle penetrates the skin. The lower-numbered depth setting is shallower, while higher numbers mean a deeper jab. While a lower-numbered depth setting will be more comfortable for most people, a shallow jab may not work well for people with rough or thick skin. The ideal lancet depth will provide enough blood to saturate a glucose strip without causing long-term skin damage or a great deal of pain.

Features

- Little pain design
- Adjustable 9 penetration depths
- Universal for all standard lancets in the market
- Durable and easy to use

Scalp Vein Set

Introduction

Scalp Vein Set is a specialized device used for drawing blood from a vein and giving medication or intravenous (I.V.) therapy into a vein. It consists of a very fine hypodermic needle, two flexible "wings" -resembling the wings of a butterfly-flexible transparent tubing, and a connector. The connector is attached to another device i.e. to a vacuum tube or collection bag to draw blood, or to extension tubing from an infusion pump or IV bag to deliver medication and fluids.

Needle Holder

Introduction

Needle holder is made of unbreakable polypropylene (PP). The holder completes the blood collection assembly when combined with appropriate needles and evacuated blood collection tubes. Use it once and discard it with the needle attached. This eliminates the hazards associated with reusable needle holders. The needle holder fits both 13mm and 16mm blood collection tubes and all common needle units.

Infusion Set

Introduction

Infusion set works the same way as an intravenous line does. A needle is housed inside a cannula, a tiny plastic tube that is usually placed under the skin in the subcutaneous fat. This needle is necessary to puncture the skin to insert the set. After insertion, the needle is removed and the cannula remains in place.

Features

- Spike with air-vent, made of medical grade ABS;
- Drip Chamber with solution filter, made of medical grade PVC. (about 48mm length);
- Tubing, made of medical grade PVC, standard PVC tube 150cm;
- Flow Regulator, made of medical grade PP & PE;
- Injection Site, made of latex.

Blood Infusion Set

Blood transfusion set is a sterile gadget consisting mainly of a tubing whose function is to convey, conduct, or deliver blood or blood products from a plastic container into a patient's vein.

To facilitate the transfer, medical staff will hang the blood package well above and over the patient because the set operates by way of gravitational fluid administration.

One end is provided with a pointed structure, known as the spike, which is used to prick the bag of blood, and the other end is where the hypodermic needle is attached. The needle is then inserted into the vein of the patient.

I.V. Catheter (I.V. Cannula)

Introduction

I.V. Catheter is shorted from intravenous catheter, which is a thin plastic tube inserted into a vein using a needle. PIVCs allow for the administration of medications, fluids and/or blood products.

Features

- Integrated enclosed design to prevent cross-infection of blood effectively;
- Color-coded easing cap allows for easier identification of cannula size;
- Advanced tip design ,with double-bevelling to ensure easy vein puncture with minimum trauma;
- Sterilized by EO gas, non-toxic, non-pyrogenic;
- Size from 14 G TO 26G.

Pen Type

Material: PP+stainless steel
Sterilization: EO Sterile
Gauge: 14g, 16g, 18g, 20g, 22g, 24g
Packing: 50pcs/box, 20 boxes/carton

Spinal Needle

TYJ2101-TYJ2130

Quincke

Whitacre

Sprotte

Introduction

Spinal Needle with Special design for needlepoint will not hurt the hard spinal theca, close puncture hole automatically and reduce cerebrospinal fluid discharge.

Size: 18G, 19G, 20G, 21G, 22G, 23G, 24G, 25G, 26G, 27G.

Length: 90mm~250mm (3 1/2" , 90mm, 4 11/16" , 120mm also available)

Types: Whitacre pencil point, spinal needle with pencil point.

Packing: 1pc per paper pouch, 50pcs per inner box, 1000pcs per master carton.

Features

- Color coded hub by size for clear recognition.
- Used in subarachnoid puncture for spinal anesthesia .
- Completely transparent needles stand provides convenience to observe the outflow of the cerebrospinal fluid.
- The needle core with pin allows a good joint of needle edge.
- Sterilized by EO gas, sterile, non-toxic, non-pyrogenic ,single use only.
- High quality stainless steel.
- larger inner diameter, high flow rate.
- Needle bevel enables smooth, sharpness maximize, patient comfort.
- Color coded hub by size for clear recognition.
- Semi-transparent hub for clearness of flashback.
- Needle hub: made of medical grade transparent PP.
- Custom needle size as per customers specifications.

Introduction

Blood collection tubes are used for collection and packaging of blood samples for biochemical and immunological examinations in medical tests, and are used in clinical medical experiments using human venous blood as samples. According to the different objects of blood samples, blood collection tubes are divided into serum blood collection tubes, plasma blood collection tubes and whole blood collection tubes.

Features

- The tube body is made of PET material or glass material, with stable properties;
- The head cap is safe, with good air tightness, small puncture force, and convenient opening and capping;
- The inner wall is extremely smooth and be evenly coated by additive, to ensure the blood samples fully contact after entering the tube;
- Good compatibility, can match the transmission device of various biochemical, immune, blood and other analyzers;
- Labels can be customized according to customer needs.

Category	Test Item	Additive	Item	Cap Color	Specification
Serum blood collection tube	Clinical Biochemistry, Immunology and Serology Test	No additive	Plain Tube	Red	13x75mm: 2ml, 3ml, 4ml, 5ml 13x100mm: 5ml, 6ml, 7ml

Serum Blood Collection Tube

Serum blood collection tubes are designed to provide uncontaminated, undifferentiated raw blood samples for medical testing. After centrifugation, serum can be effectively separated from blood cells and fibrin. Serum tube includes 3 tubes: Plain tube with red cap, Clot Activator tube with red/orange cap, and Gel & Clot Activator tube with yellow cap.

Plain Tube, Red Cap

Plain tubes also called No Additive tube, which is used for collection and packaging of blood samples such as medical testing, biochemistry, immunology, serology, various virus detection, blood bank inspection, etc. Plain tube can maintain the normal composition of serum for a long time and facilitate the re-examination of serum with good repeatability.

TYK101-203

Model No.	Material	Additive	Size(mm)	Vol	Packing
TYK101	PET	No additive	13x75	2ml, 3ml, 4ml, 5ml	100pcs/rack, 1800pcs/ctn

TYK102	PET				
TYK202	Glass				
TYK103	PET		16x100	7ml, 8ml, 9ml, 10ml	100pcs/rack, 1200pcs/ctn
TYK203	Glass				

Clot Activator Tube, Red/Orange Cap

Clot Activator tube, also known as pro-coagulant tube, is used to collect serum samples for biochemical and immunological testing, and can be used for rapid outpatient, emergency serum biochemical tests. The inner wall is extremely smooth and be evenly coated by coagulant. It has a wide operating temperature range. Blood clots completely within minutes, and centrifugation yields high quality serum.

TYK104-206

Model No.	Material	Additive	Size(mm)	Vol	Packing
TYK104	PET	Clot Activator	13x75	2ml, 3ml, 4ml, 5ml	100pcs/rack, 1800pcs/ctn
TYK204	Glass		13x100	5ml, 6ml, 7ml	100pcs/rack, 1800pcs/ctn

Whole Blood Collection Tube

Whole blood collection tubes are designed to provide uncontaminated, undifferentiated raw blood samples for medical testing. Whole blood collection tube includes 2 kinds of tubes: EDTA tube with purple cap and ESR tube with black cap.

TYK110-212

TYK113-213-3

TYK213-1-213-2

EDTA Tube, Purple Cap

EDTA tubes are used for clinical hematology examinations, blood typing and cross-blood mixing and so on. It can comprehensively protect blood cells, effectively prevent platelet aggregation, and protect blood cells in shape and volume for a long time.

EDTA anti coagulated plasma is used for molecular biological identification of parasites, bacteria and pathogenic microorganisms.

Model No.	Material	Additive	Size(mm)	Vol	Packing

TYK212	Glass				

ESR Tube, 3.8% Sodium Citrate, Black Cap

ESR tubes are mainly used for blood sample collection and anti-coagulation during erythrocyte sedimentation rate test.

It contains 3.8%(0.129mol/L) sodium citrate buffer which mixed with blood in a ratio of 4:1.

It is suitable for ESR testing for different genders and ages.

8x120 ESR tube is applicable to various automated erythrocyte sedimentation rate analyzers.

Because of little volume and negative pressure inside the tube, it needs some time for blood collection.

Wait for the blood to stop flowing into the blood collection tube and mix it 6-8 times to fully mix the anticoagulant and blood.

13x75 ESR tube is specially used in blood collection and anti coagulation for automated erythrocyte sedimentation rate analyzers sedimentation rate test with the mixing ratio of 1 part sodium citrate to 4 parts blood, by Westergren method.

Model No.	Material	Additive	Size(mm)	Vol	Packing
TYK113	PET	3.8% Sodium Citrate Buffer (0.129 mol/L)	13x75	1.6ml, 2.4ml, 3.2ml	100pcs/rack, 1800pcs/ctn

TYK213-3	Glass		16x100	8ml	100pcs/rack, 1200pcs/ctn

Plasma Blood Collection Tube

Plasma blood collection tubes are designed to provide uncontaminated, undifferentiated raw blood samples for medical testing. Plasma can be effectively separated from blood cells after centrifugation. Plasma tube includes 5 kinds of tubes: PT tube with blue cap, Heparin tube and Gel&Heparin tube with green Cap, Glucose tube with gray cap, Compound of Sodium Fluoride and Anticoagulant tube with gray cap.

TYK114-116-1

TYK117-219

TYK120-222

TYK123-225

PT Tube, 3.2% Sodium Citrate, Blue Cap

PT tube is used to obtain plasma samples for the coagulation test. It contains 3.2%(0.109mo/L) buffered sodium citrate solution. Blood and sodium citrate are mixed in a ratio of 9:1, and the ratio is accurate to ensure the validity of the test results. Due to the low toxicity of sodium citrate, it is also used for blood preservation.

Model No.	Material	Additive	Size(mm)	Vol	Packing

TYK216	Glass				
TYK116-1	PET		13x75 10x68.5	1.8ml, 2.7ml	100pcs/rack, 1800pcs/ctn

Heparin Tube, Green Cap

Heparin tube is used for the collection of blood samples for clinical plasma biochemical and blood rheology determination, without affecting the volume of red blood cells and causing hemolysis. Inside the tube wall, where is well sprayed with lithium heparin or sodium heparin which is a kind of anticoagulant activating antithrombin to block the coagulation cascade reaction. The operating temperature range is wide, the plasma separation speed is fast, and the compatibility with serum specimen indicators is strong. In addition to the characteristics of heparin sodium, lithium heparin can also be used for the detection of trace elements. Plasma separation gel can be added according to customer requirements to prepare high quality plasma to meet the needs of clinical experiments.

Model No.	Material	Additive	Size(mm)	Vol	Packing

TYK219	Glass				

Gel and Heparin Tube, Green Cap

Gel and Heparin tubes are anticoagulant tubes used to obtain high quality plasma samples for rapid emergency biochemical testing.

It contains Heparin Sodium or Heparin Lithium and Gel at the bottom of the tube, which is used to separate plasma and blood cells.

The exchange of substances can be prevented, so that the obtained plasma is free from blood cell contamination, making the results accurate.

In this way, samples can be placed directly into the equipment to meet the quality requirements for re-inspection.

Model No.	Material	Additive	Size(mm)	Vol	Packing

TYK222	Glass				

Glucose Tube, Gray Cap

The combination of sodium fluoride and anticoagulant tubes are used to obtain highly stable plasma for blood glucose testing. Sodium fluoride is a glucose degradation inhibitor, which has the effect of inhibiting glucose metabolism and degradation. The optional anticoagulants are potassium oxalate, EDTA and heparin sodium, which can prevent blood clotting and avoid hemolysis. This special compound additive allows long-term refrigeration of blood glucose samples.

Model No.	Material	Additive	Size(mm)	Vol	Packing

Non Vacuum Blood Collection Tube with Screw Cap

TYK301-306

Product Usage

The non-vacuum blood collection tube is made of medical grade PP material and consists of flange cover, PP tube and various additives. Compared to vacuum tubes, it provides an affordable solution for blood collection and testing in clinics and hospitals.

Features

- The non-vacuum blood collection tube is made of medical grade PP material;
- Inside the tube wall, where is well sprayed with various additives;
- Leak-proof;
- Labels can be customized according to customer needs.

Micro Blood Collection Tube

TYK501-1-505-1

TYK501-504

Product Usage

Micro collection tubes are mainly used for peripheral blood collection. It is mainly used in pediatric patients.

Features

- The special structure of the cover is safe and effective to prevent the blood sample from splashing;
- The color of the lid is consistent with the international standard;
- The inner wall is treated by a special process, the surface is smooth, and the blood cells do not hang on the wall;
- The uniform spraying of the additive makes the blood fully contact with the anticoagulant to ensure the accuracy of the test results;
- Labels can be customized according to customer requirements; Sterilize with ethylene oxide or gamma irradiation.

Capillary Blood Collection Tube

Product Usage

The capillary blood collection tube is mainly used when the blood sample is transferred from the blood collection tube, and is used for the extraction of peripheral capillary blood.

Features

- The central cross incision at the top of the cover is convenient for the insertion of blood vessels. After blood collection, the blood vessels are pulled out and the incisions are automatically closed, which can effectively prevent the leakage of specimens and ensure safe and reliable transportation; The inner wall of the blood vessel is treated with a special process, which will not hang on the wall and damage the blood cells;
- The additives are evenly sprayed on the inner wall to facilitate anti coagulation of blood samples to ensure the accuracy of the test results;
- Compatible with a variety of instruments.

TYK601-605

Model No.	Item	Cap Color	Additive	Material	Size(mm)	Vol	Packing

ESR System

Usage Steps

1. Use the ESR tube (with 3.8% sodium citrate diluent) collect a sum of blood sample before the test, mix the blood and additives completely and timely, place pipette with tube in an ESR rack which is at horizontal position.
2. Put the ESR pipette into the ESR tube vertically, the leak-proof of tube ensure the blood can rise along the ESR pipette reach to the "0" graduation accurately, stop the operation. Attention: Ensure the accuracy of graduation, must guarantee the ESR pipette touch the bottom of ESR tube, the ESR pipette should keep the vertical situation on the ESR rack.
3. Keep upright standing for one hour, observe the blood height in the ESR pipette, the red blood cells fall is measured and reported in mm/h.
4. Do the protection and ensure the safety during the operation process, keep well about the blood sample and lab-ware after the test. Avoid the pollution to the human and environment.

Features

- USP VI polypropylene material;
- For erythrocyte sedimentation rate, the rate as red blood cells sediment in a period of one hour;
- Common hematology test, and is a non-specific measure of inflammation;
- Clear graduation easy for user to read the scale information;
- The filter on the top of the ESR pipette to prevent the dirty come into the pipette from the top;
- Precision tube, small error, simple operation and high accuracy;

Product Usage

A syringe is a medical tool used to inject liquid medications or other liquid substances into or extract fluids from body tissues.

Injecting drugs: A doctor or nurse uses a syringe to inject drugs directly into a patient's muscles, blood vessels, or subcutaneous tissues to treat an illness or provide first aid.

Drawing blood: A medical professional uses a Phlebotomizer (a special type of syringe) to draw blood from a patient for testing or diagnosis.

Infusion: Syringes are also used to deliver fluids into a patient's venous system to maintain fluid balance or to deliver medications.

Components of a syringe

- **Barrel:** A barrel is a hollow, tubular structure, usually made of clear plastic or glass, that holds a liquid medication. The barrel usually has graduated lines on it to measure the volume of the liquid.
- **Piston (Plunger):** The piston is the moving part inside the cartridge and is usually made of rubber or plastic. By moving the piston, the volume of liquid can be changed within the cartridge.
- **Needle:** A needle is a metal tube attached to the bottom of the cartridge that is used to inject or withdraw liquid from the body. Needles usually have a sharp tip to easily penetrate skin and tissue.
- **Needle Cap:** This is a cap that protects the needle and is usually made of plastic. It is used to cover the needle before and after use to ensure hygienic performance of the syringe.
- **Plunger Rod:** The Plunger Rod is the part attached to the piston that pushes or pulls the piston to control the flow of liquid.
- **Nozzle:** The nozzle is the end of the syringe that is used to release the liquid. In disposable syringes, there is usually no nozzle, while in multi-use syringes, the nozzle may be replaceable.

Features

I Size: 1ml, 2ml, 3ml, 5ml, 10ml, 20ml, 30ml, 50ml, 60ml, 100ml, 120ml

I Syringe top: Luer slip or luer lock

I Syringe packing: Blister peel or pouch Tear polybag

I Structural part: Three parts, Syringe barrel, Syringe plunger, Syringe Plugs

Syringe needle

TYL301-TYL315

Product Usage

Plastic needle filters are devices used to separate and filter tiny particles or contaminants from liquids or gases. They are typically made of a plastic material with fine pores or apertures to allow the passage of fluids or gases while preventing larger particles or contaminants from passing through.

This type of filter is designed to protect downstream equipment, prevent contamination, or ensure product quality and safety.

Features

- Material diversity: usually made of corrosion-resistant and high-temperature-resistant plastic materials, such as polypropylene (PP), polytetrafluoroethylene (PTFE), polyester (PET), etc., adapting to a wide range of chemical media.
- Tiny pore size: with micron-sized pore size and different precision levels available, it can capture tiny particles and microorganisms to ensure product purity.
- Lightweight design: Compared with metal filters, plastic needle filters are lighter and easier to operate and replace.
- Multiple applications: widely used in medical, pharmaceutical, laboratory, food production and other fields for separating particles, particulates, microorganisms, maintaining product quality and safety.

Product Usage

Urine container is used for the collection of specimens. It widely used in Hospital and Laboratory. The main material is polypropylene. The urine container is clean convenient and safe to use, which provides a guarantee for the standardization and standardization of specimen analysis.

Features

- Made of PP(polypropylene) material with high chemical compatibility, which has good sealing performance, preventing the specimen from being contaminated and splashing, preventing patients and medical staff from contacting the specimen;
- The volume scale of the cup body is clear and easy to read, and the large-area frosted surface is easy to write;
- Various styles, capacities and lid colors are designed to suit the needs of different specimen collection and experiments;
- EO Sterilization is available;
- Bulk pack or individual packing;
- Customize label is available according to customer's requirement.

Urine Transfer Device

TYM116

TYM121

TYM122

TYM123

Product Usage

This urine transfer device include a collection container and a vacuum tube,mainly used for urine collection.

Features

- Vacuum Urine container is made of medical pp virgin material and vacuum tube is made of PET material;
- Has good sealing performance prevent sample leakage;
- The device is much convenient for specimen storage and transportation, also can avoid the contact between people and Specimen.

Urine Drainage Bag

TYM201

TYM203

TYM204

TYM205

TYM206

Product Usage

Urine collection bag is used to collect urine that is passed from the bladder through a catheter or sheath.

Features

- Disposable urine bag is made of medical grade PVC (two layers);
- Double sealed PVC to prevent spilling of fluids;
- Effective inlet valve(anti-reflux valve), Tight outlet valve, can be easily operated with one hand;
- Wide lengths of inlet tube, 90cm, 110cm, 130cm, 150cm;
- Preventing bending or twisting for easy flow of urine;
- Precise, easy to read scale(every 100ml), accurately determine the amount of urine collected;
- EO Sterilized;
- Strengthened holes for hanging with standard hangers;
- Individual packaging: PE, Blister, paper-foil.

Model No.	Description	Capacity	Packing

TYM312	URS-14	14	Urobilinogen, bilirubin, ketone, creatinine, blood, protein, microalbumin, nitrite, leukocytes, glucose, specific gravity, pH, VC, calcium.

Vaginal Speculum

Product Usage

Disposable Vaginal Speculum is designed to hold back the anterior and posterior vaginal walls after opening so that the cervix may be visualized, and has a screw for maintaining the open position during examination. Choose a speculum of appropriate size according to history such as parity, age, menopausal stage and experience from previous smear taking.

Features

- Perfectly smooth and streamlined edges
- Upper and lower part made of polystyrene
- For use less than 60 minutes
- E.O. sterilized, single use
- Individual package: OPP, PE, Blister, Paper-foil

Model No.	Type	Size	Material	Packing
TYN101	Side Screw	SML	Polystyrene	1pc/individual bag, 100pcs/ctn

Cervical Brush

Product Usage

The disposable cervical brush swab is used for the smear of clinical cervical cells after sampling. It is suitable for TCT, LCT, LPT, HPV and other liquid based cytology smear system. The products based on the cervical anatomical structure design, shape appropriate cervical anatomical structure, product by the sampling head and handle for cervical sampling a soft texture, without any damage, cell package and storage and operation, simple analysis the advantages of the cervical mucosa.

Features

- Made of polyethylene, polypropylene
- Broom and standard type, allows for obtaining from the cervix, cervical canal and transformation zone
- Soft bristle tips to prevent cell samples from damage
- Optimal outreach thanks to the long handle
- Single-use
- E.O. Sterilized
- Individual packaging: OPP, PE, Blister, Paper-foil

Model No.	Description	Material	Packing
TYN201	Standard	PA66+304+PP+Epoxy	100pcs/bag, 2000pcs/ctn

TYN203	Broom	PE+PP	100pcs/bag, 2000pcs/ctn

Cervical scraper

Product Usage

It is mainly used for gynecological, cervical cancer and venereal disease examination (eg, AIDS, Syphilis, Gonorrhea and Gynecological-related diseases) and it is essential medical equipment.

This scraper is painless and quick and very hygienic by disposable use. Also it is certificated the safety which is harmless to human body with strict clinical demonstration.

TYN301-308

Features

- With round tip & with tongue-shape tip.
- Non-sterilized or sterilized by ethylene oxide.
- Wooden spatula, can be used in conventional smear, such as scraping and collection of cervical cells.

Tongue Depressor

Product Usage

Tongue Depressor are used as medical diagnostic instruments and are an important part of a physician's office.

Made of high quality wood/plastic and do not have odor or taste.

Can be used for spreading ointments, mixing medications, or splints.

Features

- Ideal for Medical use
- Wooden tongue depressor is made of high-quality natural wood that delivers a smooth, comfortable sensation in the mouth
- Round edges for oral safety, spreading ointments and stirring liquid medications
- Smooth Texture- precision cut to avoid rough edges
- Odorless and Tasteless
- Sturdy and Firm

wooden stick

TYN501
TYN502

Product Usage

Our wooden stick are made of natural wood/Bamboo and are polished to surface so they don't hurt your skin. Comfortable to grip, not thin, but not bulky either. It is suitable for laboratories, hospitals, schools and homes.

Features

- Clean and uniform in size and color, smooth surface, sturdy, straight
 - Are all disposed by high temperature, fumigation and sterilization.
- The shelf life is more than one year under the condition of normal temperature

Transport Swab With Gel

TYO101

TYO102

TYO103

TYO104

Product Usage

Transport swabs for specimen transport is composed of collection swab, tip and PP sealing tube, mainly used for sampling, storage, transportation of microbe specimen.

Features

- Swab stick optional in material: wood, PS, PS, ABS, Stainless steel;
- Swab tips optional in material: cotton, polyester fiber (Viscose), Rayon, Dacron, Nylon;
- Size :12x170mm;
- Dry Swab, with medium, with sealed tube, add Charcoal is available;
- Purpose: avoid pollution of the microbe before test.

Flocked Swab

TYO201

TYO202

TYO203

TYO204

TYO205

TYO206

Product Usage

Flocked swabs are specimen collection devices that are ideal for use in rapid diagnostic testing. They are capable of efficiently collecting organisms and cells at the collection site and have the ability to rapidly release cells. These single-use tools feature perpendicular nylon fibers that are affixed to the surface of a swab, optimizing specimen collection.

Features

- The stick material is available in virgin PP, PS or ABS;
- Breaking point design to facilitate sample handling, storage and transportation;
- The swab tip material is available in superior flocked nylon and rayon;
- Flocked tip maximize the sampling efficiency;
- Gamma-irradiation/E.O. sterilization.

Model No.	Description	Stick Material	Sterilization	Packing
TYO201	Oral Flocked Swab	ABS 30mm breakpoint	EO Sterile	500pcs/bag, 10000pcs/ctn

TYO304

TYO305

TYO306

Product Usage

Sampling swab are used to store microbiological samples and transport them to clinical laboratories.

Features

- Composed by stick, tip and sealing tube;
- The stick material is available in stainless steel, wood, PP, PS or ABS;
- The swab tip material is available in superior absorbent cotton, artificial cotton, polyester fiber;
- The sealing tube material is available in virgin PP/PS;
- Special treatment on the stick makes the tip wrapped on the stick tightly;
- Complete sampling kits for the safe collection, transport and preservation;
- Adapted to sampling from the parts of urethra and so on;
- Used for sampling from the parts of vagina, urogenital canal, etc.

Autoclavable bags

Product Usage

Infectious waste is sterilized with the use of high temperature autoclave bags. Bags are ideal for processing hazardous materials up to 275° F(135° C). Imprinted with a biohazard symbol and an indicator which changes to “Autoclaved” when contents are successfully sterilized. Or the white indicator changes into gray.

Features

- Custom size, logo, color, thickness and packing available
- Material: Made from durable, high-quality polyethylene or polypropylene.
- Autoclave compatibility: Withstands high temperatures and pressures.
- Sealable closure: Securely seals to prevent contamination.
- Sterility indicator: Verifies successful sterilization.
- Size options: Available in various sizes for different items.
- Transparency: Allows easy visibility of contents.
- Tear resistance: Prevents ripping or puncturing.
- Batch labeling and tracking: Enables easy identification and traceability.
- Environmental considerations: Made from recyclable materials.

Biohazard Bags

Product Usage

In hospital and laboratory according to the Classified Catalogue of Medical Treatment Waste and Regulation on the Administration of Medical Treatment Waste.

Medical waste, Pathological waste, Injury waste, Drug-induced waste, Chemical waste. Different colored bags will have different usage. Normally have black, clear, red, blue, white, yellow, purple and green colors. Biohazard bags can be made into end open bag, bags on roll, with drawstring, with adhesive tape, and T-shirt type. Material can use HDPE, LDPE and PP. Thickness 0.5-2.5mil.

Features

- Custom size, logo, color, thickness and packing available;
- Color-coded: Easily identifiable with bright red, orange, or yellow color;
- Material: Made of thick, durable, and leak-proof plastic;
- Sterility: Treated to ensure cleanliness and prevent microbial growth;
- Printed labels: Prominent biohazard symbols and warnings;
- Secure closure: Reliable sealing mechanism, such as drawstrings or zippers;
- Compliance with regulations: Designed to meet safety and waste management guidelines;
- Variety of sizes: Available in different sizes to accommodate various amounts of waste.

Specimen Transport Bags

TYP301-307

Product Usage

High quality specimen bag improves lab processing efficiency and accuracy-saving time and improving care. Dual pouch design features a re-closable poly bag for secondary leakage containment plus an attached open-end document pouch to keep paperwork with the specimen.

The bag can be made with zip-lock and adhesive tape, with pocket, thickness range from 1.7-2mil.

Features

- Custom size, logo, color, thickness and packing available
- Sealable Closure: Specimen transport bags are designed with a sealable closure mechanism, such as a zip-lock or adhesive strip, to securely seal the bag and prevent leakage or contamination of the specimen.
- Biohazard Labeling: Many specimen transport bags are prominently labeled with biohazard symbols and warnings to indicate the presence of potentially infectious or hazardous materials. This ensures that the bags are handled appropriately and with caution.
- Absorbent Pads: Some specimen transport bags have built-in absorbent pads or liners to contain any spills or leakage that may occur during transportation. This helps prevent cross-contamination and maintains the integrity of the specimen.
- Durability: Specimen transport bags are typically made from durable and puncture-resistant materials, such as polyethylene or polypropylene, to withstand the rigors of transportation and handling.
- Transparency: Most transport bags are made from transparent material, allowing easy visual inspection of the specimen inside without the need to open or manipulate the bag.
- Tamper-evident: Many specimen transport bags are designed with tamper-evident features, such as a perforated tear strip or a unique seal identifier, to provide evidence of any unauthorized access to the bag during transit.
- Size Variety: Specimen transport bags are available in various sizes to accommodate different types and quantities of samples. This allows for efficient and organized transportation of specimens.
- Compliance with Regulations: Specimen transport bags may be certified or compliant with specific regulations or standards, such as UN3373 for the transport of biological substances. This ensures that the bags meet the necessary requirements for safe transportation.

Sharp container

Product Usage

Widely used for collecting syringes, infusion sets, disposable needles; other medical devices that contact blood.

Features

- Ideal for use around the hospital, medical house etc.
- Versatile, with a comprehensive accessories range.
- Safe and user friendly.
- Safe and easy to handle.
- Easy to clean due to smooth surfaces and rounded internal corners.

Bandage

TYQ701

TYQ702-704

TYQ705

TYQ706-708

Product Usage

Adhesive bandages, also known as plasters or Band-Aids, have multiple uses in wound care. They protect wounds from dirt and bacteria, aid in healing, control bleeding, secure dressings, provide pain relief, and offer convenience. Waterproof options are available for use during activities like bathing or swimming. Material: PE, PVC, EVA, PU, Fabric, Elastic Fabric, Cotton.

Features

- Customizable size;
- Adhesive: With a sticky side, they stick firmly to the skin;
- Breathable: They let air in to help wounds heal faster;
- Flexibility: Made of flexible materials for a comfortable fit and easy movement;
- Protectiveness: They form a shield against dirt, bacteria, and further injury;
- Easy-to-use: Simple to apply and remove, perfect for minor cuts, scrapes, and blisters;
- Variety of sizes: Many sizes and shapes to fit different wounds and body areas;
- Waterproof: Some can be used in water, keeping wounds dry while showering or bathing.

Heparin Cap

Product Usage

Heparin cap is mainly used as injection way and injection port, widely accepted and approved by medical institutions.

Features

- Material: PC;
- Color: Yellow, Transparent;
- Sterilization: EO Sterile;
- Packing: 1pc/blister packing, 100pcs/box, 20 boxes/carton.

Model No.	Color	Packing
TYQ801	Yellow	2000pcs/ctn
TYQ802	Transparent	2000pcs/ctn

Laboratory/Medical Equipment

Electrode analyzer

Semi-auto Electrolyte Analyzer
NW-S600

NW-E

Introduction

The electrolyte analyzer is based on the advanced ion selective electrode (ISE) technology and has been designed to meet the requirements and characteristics of international markets. The electrolyte analyzer uses English display system and has prompting for each operation, which is very convenient to all users. The electrolyte analyzer can print testing report, store at most 512 tests, and 31 tests for each of the 2 QC levels.

Method: Ion selective electrode (ISE) method

Sample: Whole blood, serum, plasma and diluting urine

Sample Volume: 150ul

Test Item: K, Na+, Cl-, Ca++, pH, Li

Features

- Advanced ion electrodes to keep longer life-span;
- Transparent electrode cavity to observe more easily;
- Double parameter correction and accurate sample measurement;
- Scrutinized quality control test;
- 24-hour continuous working competence to test sample at any time;
- One-point/two point automatic calibration to help quality control data processing.

Item	Range	Resolution	CV
Electrode			
PH	4-9mmol/L	0.01mmo/L	<1%
Potassium ion(K)	0.5-10mmol/L	0.01mmo/L	<1%
Sodium ion (Na+)	80-200mmol/L	0.1mmo/L	<1%
Chloride ion (Cl-)	50-200mmol/L	0.1mmo/L	<1%
Ionized calcium (Ca++)	0.1-5mmol/L	0.01mmo/L	<2%
Lithium ion (Li+)	0.3-3mmo/L	0.01mmo/L	<2%

Full-auto Electrolyte Analyzer
NW-F900

NW-E

Introduction

Test Principle: Ion selective electrode(K, Na+, Cl-, Ca2+, pH(H+), Li+), gas sensor

Test Method: Direct method

Calibration Mode: Manual+Automatic

Test Item: K, Na+, Cl-, Ca2+, pH(H+), Li+, TCO2

Features

- **Operation method :** Full English Menu .(Can do different language as required)
- **Program function:** Calibration program, sample- test program , QC program , Set-up program, Diagnosis and maintenance program , Data management program
- **Data storage:** The test result for sample storage = 1000 samples.
- **Display:** Graphic lattice LCD display
- **Printer:** Built-in thermal printer
- **Communication Interface :** RS-232CSerial interfac

Item	Range	Resolution
K+	1.00-16.0mmol/L	0.01mmo/L
Na+	30.0-200.0mmol/L	0.1mmo/L
Cl-	30.0-200.0mmol/L	0.1mmo/L
Ca++	0.50-5.00mmol/L	0.01mmo/L
Tco2	5.0-60.0mmol/L	0.1mmo/L
PH	6.00-9.00mmol/L	0.01mmo/L
Li +	0.3-3mmol/L	0.01mmo/L

Electronic precision balance
NW-B series

Product instrument

NW-B series electronic precision balance also use the electromagnetic gauge transducer, weighing quickly, reliably, adding Artificial design, many types to select, high performance cost ratio, have been the first selective product.

Features

- Artificial design, originaive structure, handsome appearance, New generation of electromagnetic gauge transducer reliably guaranties the precision of the products. With many application programs, such as automatic fault detection, linear four point calibration, overloading protection and so on;
- Large back-lighted LCD makes the operator more comfortable;
- Inside decurrently weighing hook.

Function

- Having the functions of counting, unit ounce etc) steady change ,full scale flay , zero point track, the operation is simple and reliable;
- Installed with RS232C interface inside, the produces can be directly connected to computers and printers etc.

Model No.	Weight scope	Accuracy	Pan size	Size	Work distance	N/W

NW-2104S	0-210g	0.1mg	φ80mm	350x215x340mm	240mm	6.8Kg

Automatic Inside Cal Electronic Analyzer
NW-C series

Product instrument

NW-C type electronic balance is the newest product which is invested all by our company in 2008 after the NW-B type electronic balance In 2007. the main difference is that this one is more Convenience. equipped with advanced ,reliable automatic adding weight structure, which makes the balance have the function of automatic calibration inside .this function improve the precision and accuracy, and makes this type balance on top.

Features

- Artificial design, originaive structure, handsome appearance, New generation of electromagnetic gauge transducer reliably guaranties the precision of the products;With many application programs, such as automatic fault detection, linear four point calibration, overloading protection and so on;
- VLSI assure the precision, the automatic adding weight adopt two cams structure, which makes the product more stable and quick;
- The balance has the application programmer for heating ,calibrating and screen protecting;
- Large back-lighted LCD makes the operator more comfortable .

Function

- Having the functions of counting, unit conversion(karat, ounce etc) steady change ,full scale flay , zero point track, the operation is simple and reliable;
- Equipped with automatic calibration inside, which makes the operation of balance more simple and quick, the function more stable , the read more accurate;
- Installed with RS232C interface inside, the produces can be directly connected to computers and printers etc;
- Inside decurrent weighing hook.

Centrifuge

800

800D

800-1

800 digital

80-1

80-2

Product Usage

The frame of this instrument is made of metal .Its model is beautiful, and it has the advantages of small volume, low weight,large capacity,low noise,high efficiency and so on. It can be used in hospitals and biochemical labs for qualitative analysis of serum, urea and plasma.

Features

- Separating the liquid from the solid particles or the liquid mixture of different density;
- Equipped with speed and timer control;
- Widely used in the laboratory, medical, chemistry and so on.

Thermostat water bath

HH-S1

HH-S2

HH-S4

HH-S6

water
bath

Product Usage

Thermostat water bath ,is mainly used for laboratory distillation, drying, concentration, and temperature and stain chemicals or biological products, can also be used for heating and other constant temperature test.

Features

- Temperature is controlled accurately and automatically with digital show;
- The container of the instrument is made of stainless steel with a super function of anti-cauterization;
- Box is made of high quality cold-rolled steel plate,The surface of Baking Paint, with strong rust resistance;
- The lid is ring, suitable for different size using measuring cup.

Model	HH-S1	HH-S2	HH-S4	HH-S6

Blood Mixer

NW019-1

NW019-2

NW019-3

Product Usage

The roller mixer adopts microcomputer control technology. The operation is simple and easy to use, and it can roll and shake all kinds of commonly used test tubes. The roller mixer is especially suitable for mixing blood, viscous liquids and liquid-solid suspensions. It is suitable for preventing blood coagulation. The blood sample can be free of anticoagulant and will not damage blood cells.

Features

- It can carry out two functions(Roll and Swing),adapted to mixing of blood samples, adhesive materials and liquid - solid suspensions;
- Driven by High performance DC declaration Motor, running stable, no noise, long lifetime;
- Compact structure makes it less space occupation. Adapted for obvious environment;
- Reasonable space between the rolls makes it fit for different size tubes;
- According to actual requirements, we can supply corotation-reverse cross model;
- The roller can be lengthened within a certain range to fit for more tubes.

Model No.	Description	Packing
NW019-1	Blood Mixer, 5 Roll	4sets/ctn
NW019-2	Blood Mixer, 7 Roll	2sets/ctn
NW019-3	Blood Mixer, 14 Roll	2sets/ctn

Drying Oven

Electric Thermostatic Drying Oven

Introduction

- Microprocessor control;
- With double glass window (10L, 15L, 20L not have);
- Digital display setting and actual temperature;
- PID self-tuning, over temperature alarm;
- High temperature resistant asbestos rope for sealing the door;
- Suitable for drying, baking, dewaxing, sterilization, solidifying;
- Internal material: Galvanized and stainless steel materials are optional.

Electric Blast Drying Oven

Introduction

The product for industrial and mining enterprises, laboratories, scientific research units for drying, baking, melting wax, sterilization purpose.

DHG9015-9245

Features

- The shell is made of high quality cold-rolled steel with metallic paint spray;
- The working room is made of high quality galvanized sheet or corrosion-resistant stainless steel, safe and easy to use;
- Hot air circulation system consists of low-noisy fan and optimal air duct, reaching a constant temp inside the working room;
- Intelligent temperature controller is based microprocessor with PID parameters controlling function. Digital display set and actual temperatures;
- With double-layer glass observation window, easy to watch the materials in the chamber;
- High temperature resistant silicone for sealing the door, high-temperature heat pipes for the heating element to ensure safety and longer life;
- Internal material: (A) for stainless steel materials.

Vacuum Drying Oven

Introduction

Vacuum Drying Box is widely used in biochemistry, chemical and pharmaceutical, health care, agricultural research, environment protection and other areas of research and application for powder drying, baking and all kinds of glass containers disinfection and sterilization. Especially for those drying heat-sensitive, labile, oxidizing material and decomposed to carry on fast and effective drying process.

DZF6021-6051

Features

- The chamber is cuboid so as to maximize the volume. Microcomputer intelligent temperature controller, makes temperature control accurate and reliable;
- The working room uses ordinary sprayed steel plate or stainless steel plate, good cold-roll shelf sheets cover, with anti-static plastic coating;
- Storage, heating, experiments and drying are all doing in the environment with no oxygen or filled with inert gas, so oxidation will not happen;
- The tightness of the door can be adjusted by user optionally. Wholly-shaped silicone rubber door seal ensures the high vacuum degree in chamber.

Incubator

Introduction

Microprocessor control,
with double glass window(10L not have)
digital display setting and actual temperature
High temperature resistant asbestos rope for sealing the door
Internal material:Galvanized and stainless steel materials are optional
suitable for constant temperature tests
suitable for bacteria cultivation, breeding, ferment.

Introduction

Microprocessor control,
Digital display setting and actual temperature
Over temperature alarm,PID self-tuning
Digital display running timer,
With glass observe window(10L not have)
Automatic alarm after operation
Internal material:Galvanized and stainless steel materials are optional
Suitable for constant temperature tests
Suitable for bacteria cultivation, breeding, ferment.

High-power magnetic stirrer

CJ-881

99-1A

CJ-881A

DJ-2A

Introduction

The product is widely used in various institutions, environmental protection, scientific research, health and epidemic prevention, chemical, medical and other units in the laboratories for stirring and mixing the liquid solution.

Features

- Brushless DC motor, low noise, stable speed, long service life;
- With high quality magnetic steel and PTFE agitation, heat-resistant, wear-resistant, chemical corrosion resistance, strong rotation;
- Stainless steel working plate, corrosion resistance;
- Big power, big mixing capacity, low power consumption, no fire, no noise.

Introduction

A biological microscope is a precision optical instrument used to observe biological sections, biological cells, bacteria, live tissue culture, fluid precipitation, and other transparent or semi transparent objects, as well as powders, small particles, and other objects. Biological microscopy is used by medical and health institutions, universities, and research institutes to observe microorganisms, cells, bacteria, tissue cultures, suspensions, sediments, etc. It can continuously observe the process of cell and bacterial proliferation and division in culture medium. Widely applied in fields such as cytology, parasitology, oncology, immunology, genetic engineering, industrial microbiology, botany, etc.

Features

- Infinite optical system provides excellent optical performance;
- Innovative object mechanisms, clear specimen observation, and convenient operating methods are designed specifically for cell culture observation, making them an innovative solution for routine examinations;
- Infinite flat field long working distance objective lens makes it easier to observe the state of living cells, with a flatter field of view, higher brightness, and stronger contrast when observing specimens;
- Equipped with a standard phase contrast ring plate, with an adjustable center, it can observe sharp images of low contrast or transparent specimens.

Model	XSZ-BK2003	XSZ-BK5000	XSZ-N117A
Eyepiece	WF 10X/18mm	WF 10X/20mm	WF 10X/18mm
Objective	Achromatic 4X\10X\40X (S)\100X (S, OIL)	Infinity Plan 4X\10X\40X (S)\100X (S, OIL); Infinity Plan 20X (S)	Achromatic 4X\10X\40X (S)\100X (S, OIL)
Viewing Head	Binocular Head, Inclined 30° Rotatable 360° Interpupillary Distance 48-75mm	Trinocular Head, Inclined 30° Rotatable 360° Interpupillary Distance: 48-75mm	Binocular Head, Inclined 30° Rotatable 360° Interpupillary Distance 48-75mm

Illumination	6V/20W Halogen Lamp	Kohler Illumination 12V/20W Halogen Lamp	LED Light

Blood pressure monitor

Arm blood pressure monitor

Product Usage

The arm blood pressure monitor is a medical instrument that detects blood pressure through an electronic display.

It measures blood pressure by means of an air bag and an electronic instrument.

When used, the air bag is placed over the arm and air is pumped into the bag to expand it and then gradually deflate it.

During this process, the electronic device detects changes in blood flow and digitally displays information such as high pressure, low pressure and heart rate.

It is widely used in different places such as hospitals, clinics, homes, etc.

It is convenient for various people to monitor and manage their blood pressure.

NW-108

Product Name	Arm blood pressure monitor
Display Method	LCD digital display
Test Method	Oscillographic method
Operation mode	Continuous operation
Pressure range	0~300MMHG(0~40KPA)
Pressure accuracy	Within ± 3 MMHG(± 0.4 KPA)
Pulse rate range	40~200 times/MIN
Cuff Range	22~49cm
Weight of the machine	Approx.260G (without battery)
Overall Dimension	140x115x70 mm

Wrist blood pressure monitor

Product Usage

Wrist blood pressure monitor is a medical device for blood pressure measurement using modern electronic technology and the principle of indirect measurement of blood pressure.

It is used to measure the patient's blood pressure at the wrist area.

NW-W01

Product name	Wrist blood pressure monitor	Product weight	Approximately 110g (excluding batteries)
Storage capacity	2 people 99 sets of measurement data	Measurement of Wrist circumference	13.5-19.5cm
Measuring position	Wrist	Power supply	d.c.3V(2 AA batteries)
Display mode	Liquid crystal digital display	Measuring range	Blood pressure 0mmHg(OkPa)~280mmHg(37.3kpa) Pulse rate40/min~195/min
Measuring mode	Oscillographic depressurization measurement	Allowable error value	Blood pressure ± 0.4 kPa (± 3 mmHg) Pulse rate $\pm 5\%$
Storage environment	Temperature-20° ~+55° Relative humidity:~93% RIAtmospheric pressure range 500hPa~1060hPa	Working environment	Temperature 5° ~40° relative humidity; $\leq 80\%$ R atmospheric pressure range 70KPA~106kpa
Product accessories	PP environmental protection Box,product description, Certificate,warranty card		

Oximeter

NW-C101A2

Product Usage

The main function is to measure oxygen saturation: oxygen saturation is an important indicator of the oxygen status of the body, and the normal value should not be lower than 94%;

Pulse rate can be measured:

Pulse rate refers to the number of times the heart beats per minute, which is between 60-90 beats per minute in a normal person and may speed up during stress and exercise.

Features

- Compact and portable, one key measurement;
- Infrared detection, fast and accurate;
- Silicone finger pad, comfortable to wear;
- Automatic shutdown, energy saving and power saving;
- Imported chip, accurate measurement;
- Non invasive testing, goodbye to pain;
- Multi-directional display, easy to read;
- Large font, clear content.
