

Sleeping Bag KT-015W

The Sleeping Bag is a part of the Military Modular Sleep System and is designed to be used separately or with the Intermediate Sleeping Bag. Made with a military spec rip-stop nylon shell and continuous filament polyester insulation fill, the Sleeping Bag is tough and warm. The mummy design with adjustable hood helps trap your body warmth inside the Sleeping Bag, the built in draft flap also prevents heat loss, a “boot box” at the bottom gives you plenty of foot room. Heavy duty durable Zippers on either end of the bag so that you can open it up from the bottom or top for ventilation. Zippers are dual sided and can be easily accessed from the inside for easy exit.
