Instruction Manual

REFRIGERATOR

MODEL:EUROLUX SD185NW
EUROLUX SD185NS

Please read carefully before using our products.
Please keep this operation instruction properly
for future reference.

1.3 Electricity related warnings

- Do not pull the power cord when pulling the power plug of the refrigerator. Please firmly grasp the plug and pull out it from the socket directly.
- To ensure safe use, do not damage the power cord or use the power cord when it is damaged or worn.

- Please use a dedicated power socket, and the power socket shall not be shared with other electrical appliances. The power cord should be firmly contacted with the socket or else fires might be caused.
- Please ensure that the grounding electrode of the power socket is equipped with a reliable grounding line.

- Please turn off the valve of the leaking gas and then open the doors and windows in case of leakage of gas and other flammable gases.
- Do not unplug the refrigerator and other electrical appliances considering that spark may cause a fire.

- Do not use electrical appliances inside the food storage compartments of the appliance, unless they are of the type recommended by the manufacturer.

1.4 Warnings for using

- Do not arbitrarily disassemble or reconstruct the refrigerator, nor damage the refrigerant circuit; maintenance of the appliance must be conducted by a specialist.
- Damaged power cord must be replaced by the manufacturer, its maintenance department or related professionals in order to avoid danger.

- The gaps between refrigerator doors and between doors and refrigerator body are small, be noted not to put your hand in these areas to prevent squeezing the finger. Please be gentle when switching off the refrigerator door to avoid falling articles.
- Do not pick foods or containers in the freezing chamber when the refrigerator is running, especially metal containers in order to avoid frostbite.

- Do not allow any child to get into or climb the refrigerator; or otherwise suffocation or falling injury of the child may be caused.

- Do not place heavy objects on the top of the refrigerator considering that objectives may fall when switching the door, and accidental injuries might be caused.
- Please pull of the plug in case of power failure or cleaning. Do not connect the freezer to power supply within five minutes to prevent damages to the compressor due to successive starts.

1.5 Warnings for placement

- Do not put flammable, explosive, volatile and highly corrosive items in the refrigerator to prevent damages to the product or fire accidents.
- Do not place flammable items near the refrigerator to avoid fires.

- The refrigerator is intended for household use, such as storage of foods; it shall not be used for other purposes, such as storage of blood, drugs or biological products, etc.

- Do not store beer, beverage or other fluid contained in bottles or enclosed containers in the freezing chamber of the refrigerator; or otherwise the bottles or enclosed containers may crack due to freezing to cause damages.

1.6 Warnings for energy

Warning for energy

- 1) Refrigerating appliances might not operate consistently (possibility of defrosting of contents or temperature becoming too warm in the frozen food compartment) when sited for an extended period of time below the cold end of the range of temperatures for which the refrigerating appliance is designed.
- 2) The fact that effervescent drinks should not be stored in food freezer compartments or cabinets or in low-temperature compartments or cabinets, and that some products such as water ices should not be consumed too cold;
- 3) The need to not exceed the storage time(s) recommended by the food manufacturers for any kind of food and particularly for commercially quick-frozen food in food-freezer and frozen-food storage compartments or cabinets;
- 4) The precautions necessary to prevent an undue rise in the temperature of the frozen food while defrosting the refrigerating appliance, such as wrapping the frozen food in several layers of newspaper.
- 5) The fact that a rise in temperature of the frozen food during manual defrosting, maintenance or cleaning could shorten the storage life.
- 6) The necessity that, for doors or lids fitted with locks and keys, the keys be kept out of the reach of children and not in the vicinity of the refrigerating appliance, in order to prevent children from being

1.7 Warnings for disposal

Refrigerant and cyclopentane foaming material used for the refrigerator are flammable. Therefore, when the refrigerator is scraped, it shall be kept away from any fire source and be recovered by a special recovering company with corresponding qualification other than be disposed by combustion, so as to prevent damage to the environment or any other harm.

When the refrigerator is scraped, disassemble the doors, and remove the seal of the lower door and shelves; put the doors and shelves in a proper place, so as to prevent trapping of any child.

Correct Disposal of this product:

This marking indicates that this product should not be disposed with other household wastes throughout the EU. To prevent possible harm to the environment or human health from uncontrolled waste disposal, recycle it responsibly to promote the sustainable reuse of material resources. To return your used device, please use the return and collection systems or contact the retailer where the product was purchased. They can take this product for environmental safe recycling.

2 Proper use of refrigerators

2.1 Placement

- Before use, remove all packing materials, including bottom cushions, foam pads and tapes inside of the refrigerator; tear off the protective film on the doors and the refrigerator body.

- Keep away from heat and avoid direct sunlight. Do not place the freezer in moist or watery places to prevent rust or reduction of insulating effect.
- Do not spray or wash the refrigerator; do not put the refrigerator in moist places easy to be splashed with water so as not to affect the electrical insulation properties of the refrigerator.

- The refrigerator is placed in a well-ventilated indoor place; the ground shall be flat, and sturdy (rotate left or right to adjust the wheel for leveling if unstable).

- The top space of the refrigerator shall be greater than 30cm, and The refrigerator should be placed against a wall with a free distance more than 10cm to facilitate the opening and closing and heat dissipation.

2.2 Door handle installation

Precautions before installation:
Information in the Instruction Manual is only for reference. The physical product may differ.
Before installation of accessories, it shall be ensured that the refrigerator is disconnected from power. Before installation of the door handle, precautions shall be taken to prevent fall of the handle from causing any personal injury.

List of tools to be provided by the user	
	Cross screwdriver

- ① insert pin ② screw ③ handle ④ nut cap

1) Remove the insert pin ①.

2) Adjust the handle ③ to the installing hole and tighten screw ②.

3) Cover the nut cap ④ of handle hole.

(The picture above is only for reference. The actual configuration will depend on the physical product or statement by the distributor)

2.3 Leveling feet

Precautions before installation:
Information in the Instruction Manual is only for reference. The physical product may differ.
Before installation of accessories, it shall be ensured that the refrigerator is disconnected from power.
Before adjusting the leveling feet, precautions shall be taken to prevent any personal injury.

1) Schematic diagram of the leveling feet

(The picture above is only for reference. The actual configuration will depend on the physical product or statement by the distributor)

2) Adjusting procedures:

- Turn the feet clockwise to raise the refrigerator;
- Turn the feet counterclockwise to lower the refrigerator;
- Adjust the right and left feet based on the procedures above to a horizontal level.

2.4 Door Right-Left Change

Precautions before installation:
Information in the Instruction Manual is only for reference. The physical product may differ.
Before Change the door, it shall be ensured that the refrigerator is disconnected from power. Before installation of the door handle, precautions shall be taken to prevent fall of the handle from causing any personal injury.

List of tools to be provided by the user	
	Cross screwdriver
	5/16" socket and ratchet

1) Remove right upper hinge cover plate①, upper cap cover plate②, and left hinge cover plate③.

- 2) Pull off the signal line of the door body and use socket and ratchet remove the screw of upper hinge. Remove the upper hinge

- 3) Remove the door body and take off the right hinge.

- 4) Turn over the lower hinge, install installation shaft on the other side of hinge (Fig. a) and install the adjusted lower hinge on the left side of refrigerator (Fig. b)

(a)

(b)

- 5) Install door body, with door body signaling cables changed from the right to the left; insert terminal; mount upper hinge (Fig. a); and place left upper hinge cover plate^①, upper cap cover plate^②, and right hinge cover plate^③ (Fig. b)

(a)

(b)

(The picture above is only for reference. The actual configuration will depend on the physical product or statement by the distributor)

2.5 Connecting for refrigerator and freezer cabinets

- 1) Put two cabinets together with only 10mm gap. Fix the connecting hinge to the place as shown in the picture.
- 2) Fit the lower connecting hinge at the bottom of two cabinets.

- 3) Put the bar inside the gap between two cabinets. The connecting Step finished..

(The picture above is only for reference. The actual configuration will depend on the physical product or statement by the distributor)

2.6 Changing the Light

Any replacement or maintenance of the LED lamps is intended to be made by the manufacture, its service agent or similar qualified person.

2.7 Starting

- Before initial start, keep the refrigerator still for half an hour before connecting it to power supply.
- Before putting any fresh or frozen foods, the refrigerator shall have run for 2-3 hours, or for above 4 hours in summer when the ambient temperature is high.

- Spare enough space for convenient opening of the doors and drawers or statement by the distributor.

2.8 Energy saving tips

- The appliance should be located in the coolest area of the room, away from heat producing appliances or heating ducts, and out of the direct sunlight.
- Let hot foods cool to room temperature before placing in the appliance. Overloading the appliance forces the compressor to run longer. Foods that freeze too slowly may lose quality, or spoil.
- Be sure to wrap foods properly, and wipe containers dry before placing them in the appliance. This cuts down on frost build-up inside the appliance.
- Appliance storage bin should not be lined with aluminum foil, wax paper, or paper toweling. Liners interfere with cold air circulation, making the appliance less efficient.
- Organize and label food to reduce door openings and extended searches. Remove as many items as needed at one time, and close the door as soon as possible.

3 Structure and functions

3.1 Key components

(The picture above is only for reference. The actual configuration will depend on the physical product or statement by the distributor)

Refrigerating chamber

- The Refrigerating Chamber is suitable for storage of a variety of fruits, vegetables, beverages and other food consumed in the short term.
- Cooking foods shall not be put in the refrigerating chamber until cooled to room temperature.
- Foods are recommended to be sealed up before putting into the refrigerator.
- The glass shelves can be adjusted up or down for a reasonable amount of storage space and easy use.

Note: Storage of too much food during operation after the initial connection to power may adversely affect the freezing effect of the refrigerator. Foods stored shall not block the air outlet; or otherwise the freezing effect will also be adversely affected.

3.2 Functions

(The picture above is only for reference. The actual configuration will depend on the physical product or statement by the distributor)

- 1) Key
A, SET: gear setting key
- 2) Display screen
- ① Gear 1
- ② Gear 2
- ③ Gear 3
- ④ Gear 4
- ⑤ Gear 5
- ⑥ Super

3) Display

For the first power-on, the display screen (including the key light) will be displayed in full for 3s, and then the gear in the middle displays the state of running

Display of normal running

On the occurrence of a failure, the corresponding LED light will give a combined display of failure code (loop display). Where there is no failure, the LED light will display the current running gear of the refrigerator.

4) Gear setting

The gear will be changed once every time when you press the key SET. Then, the refrigerator will run under the setting value after 15s.

5) Fast cool function

Enter: Circulating modulation rapid cooling mode

Operate: Indicator of rapid cooling lights up, and the refrigerator operates at 2°C.

Operate 150min under the rapid cooling mode

Temperature adjustment can exit from the rapid cooling mode

6) Storage upon power failure

In case of power failure, the instant working state will be locked and maintained until re-electrification.

7) Opening warning and alarm control

When the refrigerator or freezing chamber door gets open, the opening music will play. If the door is not closed in two minutes, the buzzer will sound once every minute until the door is closed. Press the button to stop the buzzer alarm.

3.3 Usage of water dispenser

②

(The picture above is only for reference. The actual configuration will depend on the physical product or statement by the distributor)

- ① Open the water tank cover and fill the water tank with drinking water to the "MAX" mark;
- ② Pour drinking water in the measuring cup into the ice maker as shown in Figure 1. Then close the refrigerator door. Several hours later, ice will have been formed.
- ③ The water dispenser is only for purified water other than any beverage or juice.

Tips: Do not take the water tank off for filling water.

4. Maintenance and care of the appliance

4.1 Overall cleaning

- Dusts behind the refrigerator and on the ground shall be timely cleaned to improve the cooling effect and energy saving. The interior of the refrigerator should be cleaned regularly to avoid odor. Soft towels or sponge dipped in water and non-corrosive neutral detergents are suggested for cleaning. The freezer shall be finally cleaned with clean water and dry cloth. Open the door for natural drying before the power is turned on.
- Do not use hard brushes, clean steel balls, wire brushes, abrasives, such as toothpastes, organic solvents (such as alcohol, acetone, banana oil, etc.), boiling water, acid or alkaline items clean refrigerator considering that this may damage the fridge surface and interior.
- Do not rinse with water so as not to affect the electrical insulation properties.

⚠ Please unplug the refrigerator for defrost and cleaning.

4.2 Cleaning of the water dispenser

- Disassembly: Draw the two sides of the water tank component with both hands at an upward inclination of 45°. When the lower part of the water tank component gets separated, the water valve component and water tank may move horizontally (towards the user), as shown in the following figure.
- Cleaning: Disassemble the water tank component for daily cleaning, as shown in the following figure.

(The picture above is only for reference. The actual configuration will depend on the physical product or statement by the distributor.)

4.3 Defrosting

- The refrigerator is made based on the air-cooling principle and thus has automatic defrosting function. Frost formed due to change of season or temperature may also be manually removed by disconnection of the appliance from power supply or by wiping with a dry towel.

4.4 Out of operation

- Power failure: In case of power failure, even if it is in summer, foods inside the appliance can be kept for several hours; during the power failure, the times of door opening shall be reduced, and no more fresh food shall be put into the appliance.
- Long-time nonuse: The appliance shall be unplugged and then cleaned; then the doors are left open to prevent odor.
- Moving: Before the refrigerator is moved, take all objects inside out, fix the glass partitions, vegetable holder, freezing chamber drawers and etc. with tape, and tighten the leveling feet; close the doors and seal them with tape. During moving, the appliance shall not be laid upside down or horizontally, or be vibrated; the inclination during movement shall be no more than 45°.

⚠ The appliance shall run continuously once it is started. Generally, the operation of the appliance shall not be interrupted; or otherwise the service life may be impaired

5 Frequently asked questions

5.1 You may try to solve the following simple problems by yourself.
If them cannot be solved, please contact the after-sales department.

Failed operation	Check whether the appliance is connected to power or whether the plug is in well contact Check whether the voltage is too low Check whether there is a power failure or partial circuits have tripped
Odor	Odorous foods shall be tightly wrapped Check whether there is any rotten food Clean the inside of the refrigerator
Long-time operation of the compressor	Long operation of the refrigerator is normal in summer when the ambient temperature is high It is not suggestible having too much food in the appliance at the same time Food shall get cool before being put into the appliance The doors are opened too frequently
Light fails to get lit	Check whether the refrigerator is connected to power supply and whether the illuminating light is damaged Have the light replaced by a specialist
Doors cannot be properly closed	The door is stuck by food packages Too much food is placed The refrigerator is tilted
Loud noise	Check whether the floor is level and whether the refrigerator is placed stably Check whether accessories are placed at proper locations
Door seal fails to be tight	Remove foreign matters on the door seal Heat the door seal and then cool it for restoration (or blow it with an electrical drier or use a hot towel for heating)
Water pan overflows	There is too much food in the chamber or food stored contains too much water, resulting in heavy defrosting The doors are not closed properly, resulting in frosting due to entry of air and increased water due to defrosting
Hot housing	Heat dissipation of the built-in condenser via the housing, which is normal When housing becomes hot due to high ambient temperature, storage of too much food or shutdown of the compressor is shut down, provide sound ventilation to facilitate heat dissipation
Surface condensation	Condensation on the exterior surface and door seals of the refrigerator is normal when the ambient humidity is too high. Just wipe the condensate with a clean towel.
Abnormal noise	Buzz: The compressor may produce buzzes during operation, and the buzzes are loud particularly upon start or stop. This is normal. Creak: Refrigerant flowing inside of the appliance may produce creak, which is normal.

DECLARAȚIE PRIVIND GARANȚIE

Prin prezentul act, compania Inoxplus SRL declară pe propria răspundere ca termenul de garanție propus este de 24 luni, livrarea din contul ofertantului pentru toate pozițiile.

Termenul de garanție începe din data primirii echipamentului (data facturii/actului de predare-primire) și va fi supus respectării normelor de folosire a utilajului în conformitate cu documentația și instrucțiunile de folosire ce vor însoți bunurile.

Evaluarea funcționalității acestora se va face prin participațiune în comun a unei comisii constituite din Vânzător și Comparator, ce ține de depistarea eventualelor circumstanțe care au dus la întreruperea funcționării corespunzătoare, acestea vor fi elucidate la fel în urma unui efort în comun, la sediul Beneficiarului, prin prezenta unui expert, la necesitate.

Defecțiunile în condiții de garanție tehnică vor fi eliminate la fața locului, sau la sediul Furnizorului, în termeni prestabiliți prin clauze contractuale.

Defectele parvenite în urma utilizării necorespunzătoare a echipamentului, ori a întrebuințării de către personalul necalificat și/sau neinstruit din partea Beneficiarului – vor duce la anularea termenului de garanție, iar costul remediilor de bună funcțiune a utilajului vor fi purtate în întregime de Comparator, inclusiv cheltuieli de transport și intervenție a echipei de deservire/reparație.

Cu respect,

Directorul General Inoxplus SRL

Dumitru Covalenco
