Concerto™ Helix/3D

Detachable Coil System

The Concerto™ Detachable Coil System is a stretch-resistant, detachable coil that can be repositioned easily prior to detachment and uses enlaced microfilament technology called LatticeFX™.

Softness with smooth navigation

- Soft coils track easily through tortuous anatomy to access distal locations*
- Soft distal pusher reduces microcatheter kickback during deployment*

Reliable deployment

- Fully resheathable, after complete or partial deployment, and easily repositionable*
- Coil detaches instantaneously with proven reliability*

Optimal framing

- Conformable 3D shape with excellent stability*
- Designed to create a complex frame for filling*

Enhanced thrombogenicity

- Fibers increase thrombogenicity of the coil compared to bare metal equivalents†
- Nylon and PGLA fiber system features the unique LatticeFX™ technology which promotes thrombosis response†

*Internal data on file

VENOUS

I.D. Instant Detacher

Detacher for Concerto™ Detachable Coil System,
One detacher required per procedure.

Each box contains:
Five instant detachers.
