Summary of Experience:																				

- I started to work since 1999 in the organization CNSPMU (medical institution). I was engaged in laying and connection of a computer network, installation of software.
- In 2004, I switched to the installation, configuration and maintenance of server and network equipment - from that moment began my training and excellence in system administration.
- I have 10+ years' experience in systems administration, including analyzing, designing, installing, maintaining, and repairing hardware, software, peripherals, and networks.
- Superior troubleshooting and technical support with migrations, network connectivity, and security and database applications.
- Good relations with co-work, management and end users.
- Good communication and problem solving skills.

Relevant Experience (From most recent):

Period: From – To	Name of activity/ Project/ funding organisation, if applicable:	Job Title and Activities undertaken/Description of actual role performed:
<i>May 2015- Present</i>	GALEX Studio, Moldova Company with an experienced team in IT services working on informational systems development. http://galex.md/	Job Title: Systems Administrator • Virtualization and high availability cluster. • Support and backup web sites for development and real (apache, IIS). Configuring load balancer between sites. • Support and backup SVN repositories.
<i>Jan 2014- Present</i>	Netinfo, Moldova Software Development and IT service company, headquartered in Chisinau, Moldova. http://netinfo.md/	Job Title: Systems Administrator • Administer Microsoft Windows Servers (Active Directory), Microsoft Workstations, Linux servers and network security devices. Number of computers about 60 devices. • Installation, migration (Exchange 2010 to Exchange 2013), setup and maintenance of the mail server Microsoft Exchange 2013. • Backup and restore network data with NAS Synology and FreeNAS • Virtualization and high availability cluster based on ProxMox (open source) and VmWare ESXi. • Installation and configuration of a single network of Wi-Fi (corporate and guest) on mikrotik equipment's using capsman technology. Covering the building in 3 floors • Organization of VPN for company employees. • Installing and configuration SVN, Git repositories. Migration SVN repositories to GITLab. • Support web sites for development and real (apache, IIS). Configuring load balancer between sites
<i>March 1999 – Present</i>	CNSPMU, National Practical-Science Center of Ambulance	Job Title: Systems Administrator • Administer Microsoft Windows Servers (Active Directory), Microsoft Workstations, Linux servers and network security devices. Number of computers over 400 devices. • Backup and restore network data with NAS Synology • Protection of the corporate network from viruses and spam using Dr.Web Enterprise Security Suite. • Installation, configuration and maintenance of the Mail Server (open source) based on Linux. • Virtualization based on ProxMox (open source) • Support hardware and software for image transmission DICOM format.

		• Partial implementation of Wi-Fi. • Organization of VPN for the company based on OpenVPN using SSL certificates. Integration into a single network 5 buildings from different parts of the city.
