

Since 1947

MC3

Optima

MCB

Electrosurgical Solutions

Powered by Lamidey Noury Medical

Optima

The complete system for electrosurgery in one unit

Full electrosurgical units 370W

Complete electrosurgical unit with a wide range of monopolar and bipolar effects

Endosection

Specific waveform dedicated to endoscopic polypectomy

Argon system

Argon Plasma Coagulation with the optional Argon module system (in option)

PLASMA EDGE

The gold standard of bipolar plasma resection power dedicated for bipolar TUR and hystero-resection procedure

Thermocision

A unique system which can Seal, Dissect and Cut in one instrument dedicated for Thyroid and delicate procedure.

Vessel sealing system

Safe and efficient up to 7mm vessel with validation signal after sealing process

MCB

Your bipolar station power

PLASMA EDGE

The gold standard of bipolar plasma resection power dedicated for bipolar TUR and hystero-resection procedure

Thermocision

A unique system which can Seal, Dissect and Cut in one instrument dedicated for Thyroid and delicate procedure.

Vessel sealing system

Safe and efficient up to 7mm vessel with validation signal after sealing process

Seal

Your reliable partner

Full electrocautery units 370W

Complete electrocautery unit with a wide range of monopolar and bipolar effects

Vessel sealing system

Technology Power Feedback (TPF) with validation signal after sealing process

Micro-coagulation Bipolar

Specific and precise coagulation without charring and sticking dedicated for neurosurgery, spinal and laparoscopic surgery

MC3

The cost effective solution

Full electrocautery units 370W

Complete electrocautery unit with a wide range of monopolar and bipolar effects

Micro-coagulation Bipolar

Specific and precise coagulation without charring and sticking dedicated for neurosurgery, spinal and laparoscopic surgery

Standard Accessories

Patient Plate

Reusable

Single use

Monopolar Pencil

Reusable

Single use

Forceps

Bipolar

Monopolar

Argon

Argon Plasma coagulation is an electrosurgical technique using an ionised gas stream as vector of the High Frequency coagulation current, for the fast haemostasis of large surfaces and the devitalization of tissues.

The endosection power combined with our precise argon beam gives the perfect solution in open surgery, laparoscopy, and endoscopy application.

Argon Probe

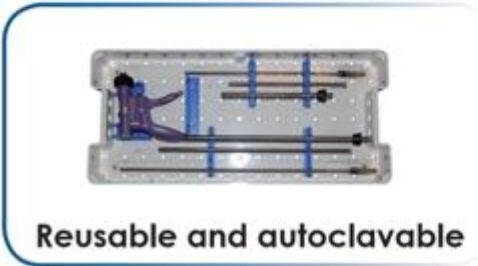

Reusable

Argon Open and Laparoscopy electrodes

Reusable

Reusable and Cutting, Vessel Sealing Forceps

Bipolar Plasma Resection System

PLASMA™
EDGE

Working element compatible to existing resectoscope

Full bipolar electrode range

#VRU1/VRU11
Thin Loop

#VRU2/VRU21
Thick Loop

#VRUB/VRUB1
Ball Electrode

#VRUN/VRUN1
Needle Electrode

#VRUV/VRUV1
Vaporization Electrode

Lamidey Noury designed and manufactured!

With the globalization in the medical device industry, it is essential for us today to define exactly what it means by designing and manufacturing a new product range.

Our range is not a list of imported products from Europe or Asia with a Lamidey-Noury sticker on it. Due to OEM procedures, it's very easy for any European company to declare itself as the official manufacturer of a complete product line, CE marked without participating in any designing and manufacturing process.

This is a fact and we invite you to consult other catalogues of these so called manufacturers, and you will notice most of the product are perfectly similar except colours, packaging, name but all remain exactly the same.

We are against these sort of practices, which disillusion the customers and a cause of considerable damage to innovation.

Today, our range of products that we propose to you have been successfully designed, optimized and finalized thanks to the help of our surgeon partners.

Nothing less than extraordinary for a manufacturer, we have been continually in the service of surgical innovation ever since 1947.

French manufacturer of electrosurgical solutions since 1947
