

Field Service Information No. 05 / 12

- ☒ **Dialog Advanced** **New Spare Part: Preset Pressure Controller for RVFPA/RVFPE, DDE and RVDA**
Dialog+
Dialog + SW 9.xx

1. Modified Spare Part

The new Pressure Controllers are preset by the manufacturer for the different positions inside the machine and have to be ordered and used accordingly.

2. Service Activities

In the event of the need to replace a pressure controller at RVFPA, RVFPE, DDE or RVDA, replace with new preset part (refer to the table below).

The value of the factory setting is printed on the color coded label.

It is not necessary to check and calibrate the new type of pressure controller upon replacement, but it is still possible if required.

	color of label	setting / position	remarks
	white	0.5 bar / RVDA	HDF-Online only
	yellow	0.4 bar / DDE, RVDA	
	blue	1.3 bar / RVFPA, RVFPE	

3. Ordering

The new preset pressure controllers can be ordered through Ms Heike Sinning, Tel.: *49 (0) 5661-713662 B. Braun Avitum AG, Germany or email: heike.sinning@bbraun.com.

Art. No.	Qty.	Description
34561706	1	Pressure Controller 0,4 bar (RVDA, DDE)
34561714	1	Pressure Controller 0,5 bar (RVDA, only HDF Online)
34561722	1	Pressure Controller 1,3 bar (RVFPA/RVFPE)

The spare parts for the pressure controllers without presettings (3451727B and 3451664B) are obsolete. However, the inventory can be consumed until depleted.

With best regards
