To Whom It May Concern:

Hereby, we

Company Name: ELEKTRO-MAG LABORATUVAR ALETLERİ SAN. VE TİC. A.Ş.
Address: I.O.S.B. Demirciler Sitesi B7 Blok No:153 İkitelli-34490 Basaksehir - İstanbul /
TURKEY
Phone number: +90 533 024 76 00

Kirantoni SRL

Address: Miron Costin street, nr. 18-132, Chisinau MD-2068, Republica Moldova
Phone number: (+373 22) 6008544

We, Elektro-mag, declare that end product of Elektro-mag M 4 Distilled Water Equipment electrical conductivity depends on intake quality water. Usually, mains water in the countries have enough quality to have less than $\leq 2.5 \mu\text{S/cm}$ electrical conductivity of the end product of our equipment.

However, some local mains water may have too much substances which increase the electrical conductivity and it may not possible to have less than $\leq 2.5 \mu\text{S/cm}$ electrical conductivity at the end of the distillation process.

This situation exists in all of the manufacturers product. Less than $\leq 2.5 \mu\text{S/cm}$ electrical conductivity can be guaranteed only by ultra pure distillation equipments which have different working principle.

Sincerely Yours

A.Selçuk Koçum
