

Company Presentation

ERICSSON

Ericsson is one of the leading providers of Information and Communication Technology (ICT) to service providers. We enable the full value of connectivity by creating game-changing technology and services that are easy to use, adopt, and scale, making our customers successful in a fully connected world.

Our comprehensive portfolio ranges across Networks, Digital Services, Managed Services and Emerging Business; powered by 5G and IoT platforms.

Networks – We develop, deliver and manage telecommunication networks by providing hardware, software, and services to enable the full value of connectivity. From 5G and IoT to virtualization, we are supporting digital transformation for the next generation of mobile services.

Digital Services – Digitalization is a powerful driver of change, transforming all aspects of business. We help service providers to embrace this change with network management and operations (OSS), revenue and customer management (BSS), communication services, core network and network functions virtualization (NFV), infrastructure, and application development and maintenance (ADM).

Managed Services – With managed services we create real value and business differentiation by taking an integrated approach covering all aspects of our customers' businesses. By managing and optimizing telecom networks and IT operations with highly industrialized processes and a truly global delivery model, we enhance operators' ability to meet – and exceed – consumer expectations.

Emerging Business – We accelerate new and sustainable businesses beyond Ericsson's traditional core business. Technologies like 5G, artificial intelligence, automation, VR/AR, and edge computing are opening up new, vast opportunities for our customers, partners and our company. Our current businesses are targeting high growth markets where our technology is relevant, e.g. Industry 4.0 and smart manufacturing, IoT connectivity, connected vehicles, security and edge computing. Innovation is at our core, and Ericsson ONE is where new, game-changing ideas are brought to life.

We are a world leader in the rapidly changing environment of communications technology – by providing hardware, software, and services to enable the full value of connectivity.
