

Bridge Electrodes

EB Neuro Bridge Electrodes grant a fast and easy positioning of EEG electrodes together with its high quality the recording, the durability of the materials. EB Neuro electrodes are in Ag/AgCl, available in adult and pediatric versions and orderable in a box of 12.

Code	Description
B9100940021	ADULT Bridge Electrodes
B9100940020	PEDIATRIC Bridge Electrodes
B9100940024	Toolkit for Adult Bridge Electrodes

Connection cables

Available both with Alligator Clip or 2mm Banana Connector, they allow the connection of your Bridge Electrodes with the Amplifier. They are available in box of 12 and with cable 120 centimeters length (customizations of the cable lengths are possible).

Code	Description
B9720350001	Connection Cables for Bridge Electrode; 2mm Banana/FMM 1,5mm
B9720350002	Connection Cables for Bridge Electrode; Alligator Clip/FMM 1,5mm

PTS Rubber Headcap

EBNeuro Rubber Headcap are made in PTS, a special tube soft, elastic and colored. PTS grants a long duration and it is very resistant to the wear of use.

Code	Description
B9720440001	NEONATAL Headcap 4X1
B9720440011	PEDIATRIC Small Headcap 6X2
B9720440012	PEDIATRIC Medium Headcap 6X2
B9720440013	PEDIATRIC Large Headcap 6X2
B9720440021	ADULT Small Headcap 6X4
B9720440022	ADULT Medium Headcap 6X4
B9720440023	ADULT Large Headcap 6X4

Ear Clip Electrodes

EB Neuro Ear Clip Electrodes are available in several materials (Ag/AgCl, Ag/AgCl sintered, Ag/Au, Sn) to be connected to all the kind of EEG electrodes or headcaps.

Code	Description
B9720136001	Sn, Cable 100cm
B9720135001	Ag/AgCl Sintered, Cable 100cm
B9720134001	Ag/AgCl, Cable 100cm
B9720131001	Au, Cable 100cm

Items in **Bold** are the ones shown in the pictures.
