POST-OP COMPRESSION GARMENTS & LYMPH SUPPORT GARMENTS 2023

We take responsibility – everything from one supplier

ANITA – a family business since 1886.

As a 100% family-owned business in the 4th generation, we have been taking responsibility for over 135 years – for our employees, our products and our environment. It is important for us to embody this attitude in all our daily operations.

We interact fairly and respectfully with each other, cultivating a positive culture in all areas including within our company. No matter where we are in the world.

We are one of the few manufacturers who develop and produce our own products almost exclusively in our own production sites – worldwide and according to the highest European quality standards. Good working conditions and a fair wage structure – at all of our sites.

We strive for durable quality products that last almost forever and are manufactured with respect for people and the environment. All our products are developed in-house at ANITA, extensively tested, carefully produced and checked before they go to the end consumer. On average, they consist of 25 parts and pass through around 50 pairs of hands in various work steps, with a great deal of attention to detail.

Tested and certified

- Verified by a range of independent tests with regard to functional suitability, effect and quality
- Certified as an aid; approved and listed with an aid number
- ANITA has a certified quality management system that complies with DIN EN ISO 9001 and DIN EN ISO 13485 to ensure the quality of products throughout the entire value chain.

The TriProVita system

Special bras, breast forms and special swimwear are the three types of products found at the heart of ANITA's TriProVita system. The breast forms are the perfect match for Anita care special bras and swimwear. This attuned trio from Anita care offers optimum support following breast surgery and a whole new lease of life.

We guarantee complete coverage from one source, with everything you need for maximum reliability and wearing comfort.

Anita cares.

Dear customers, our Anita care bras feature high functionality and a perfect fit

All Anita care special bras come without underwire.

In the following you will find a short description of our functions C1, C2 and C3, as well as our function-related icons. These identifiers can be found after each Article No.

Anita care bras always come equipped with:

- Straps that are wider in larger cup sizes
- Additional back reinforcement that increases in larger sizes

Light function C1

Identifier: "C1" following the Article No.

Anita care initial care bras with "LIGHT" function feature:

- More lightweight, softer materials

Medium function C2

Identifier: "C2" following the Article No.

Anita care bras with "MEDIUM" function feature:

- Supportive materials are used for the entire bra, some with additional support functions

High function C3

Identifier: "C3" following the Article No.

Anita care bras with "HIGH" function feature at least one of the following:

- Robust, supporting materials in the cup
- Supportive materials at the back
- Wide, padded straps

Also after partial and restorative breast surgery

For especially sensitive skin and after radiation therapy

A detailed outline description can be found on page 118

You can also find the function descriptions online at:
www.anita.com/functions

FAVOURITES

Key products that we believe in and which have a huge amount of potential. We pay particular attention to these styles in our consumer communications.

Wider straps in the larger sizes to relieve strain on the neck and shoulders

Four-position fastener for optimum feeling of comfort

CARE

STYLE 5349X.001

D So fühle ich mich sicher

Nach der OP ist der optische Ausgleich ein essenzieller Faktor – das Gewicht ist jedoch entscheidend für das Wohlbefinden der Kundin. Vollprothesen mit vollem Gewichtsausgleich bieten hier Ihrer Kundin die Möglichkeit neben der Optik auch das Gewicht voll auszugleichen. Die unterschiedlichen Formen bieten hierbei Ausgleich im Ober- und im Achselbereich.

- Natürliches Empfinden in Optik und Gewicht
- Flacher Rand und unterschiedliche Formen zur perfekten Versorgung unterschiedlicher Bedürfnisse

EN Gives me a feeling of security

Visual balance is an essential factor for feeling good after breast surgery – as is a good balance of weight. Full prostheses with the right weight balance mean that your customers will not only look symmetrical, but also feel well balanced. The various shapes of the prostheses offer balance in the upper chest area and underarm area.

- A natural feel in terms of look and weight
- Flattened edges and a variety of shapes allow the treatment of a variety of needs

F Je me sens en sécurité

Après une opération, la compensation visuelle est essentielle, mais le poids de la prothèse l'est tout autant pour se sentir bien. Les prothèses pleines offrent une compensation complète en termes de poids, une solution idéale pour vos clientes. Les différentes formes offrent une compensation optimale dans les parties supérieures et axillaires du sein.

- Sensation naturelle en termes de visuel et de poids
- Bordure plate et différentes formes pour répondre idéalement aux différents besoins

Full breast forms	Weight reduction of up to**	 Triangular form	 Triangular shape with a reduced footprint	 Triangular shape with Flex-Gap fold	 Triangular shape with adhesive pad	 Triangular shape with textile backing	 Triangular shape with textile backing, can be filled	 Asymmetric triangular shape	 Drop-shaped	 Heart shape

* 2-layer breast forms

** Same shape and size as a standard gel breast form (approx. figures)

ES Así me siento segura

Después de una cirugía, la compensación visual es un factor esencial - pero también el peso es clave para el bienestar de la paciente. Las prótesis totales ofrecen a su cliente la posibilidad de compensar no solo el efecto óptico, sino también el peso. Las diferentes formas de nuestras prótesis brindan compensación incluso en zonas superior e inferior de las axilas.

- Sensación natural en apariencia y peso
- Borde plano y diferentes formas para satisfacer a la perfección todas las necesidades.

I E mi sento sicura

Dopo l'intervento, la compensazione a livello estetico rappresenta un fattore importantissimo, ma anche il peso è essenziale per assicurare il benessere della donna. Le protesi complete con piena compensazione del peso soddisfano entrambe le esigenze. Le diverse forme offrono in tal senso una compensazione ottimale nella parte superiore e laterale del seno.

- Sensazione di naturalezza a livello estetico e di peso
- Lembi piatti e forme diverse per una compensazione ottimale a seconda delle varie esigenze

NL Zo voel ik mij zeker

Na de operatie is optische balans een essentiële factor - het gewicht is echter bepalend voor het welzijn van de cliënt. Een volledige prothese met volledig gewichtcompensatie biedt uw klant de mogelijkheid om, naast de optiek, ook het gewicht in balans te brengen. De verschillende vormen bieden compensatie in het bovenste en onderste okselgebied.

- Natuurlijk gevoel in optiek en gewicht
- Vlakke randen en verschillende vormen voor perfecte verzorging bij verschillende behoeften

Find the right size for your customer following our step-by-step guide

When it comes to bras, base your measurements on a well-fitting bra, preferably one without underwires.

The measured size serves as a guideline. The actual size for the best comfort of each customer can only be determined by trying the item on!

Method 1

Underbust measurement (1)

Take the measurement by holding the tape directly under the bust. This measurement determines the bra size.

Bust measurement

Take the bust measurement (2) by holding the tape horizontally over the widest point of the breast.

Use the chart to find out the cup size

Pants size

To work out the pants size, measure the waist (3) by holding the tape horizontally around the smallest part of the waist. Measure the hips (4) by holding the tape horizontally around the widest part of the hips.

If there is a considerable difference between the waist and hip measurement, always take the larger size.

Method 2

2. Bust measurement

Slightly lift the naked breast. Measure from the breastbone to the centre of the back. Deduct 2cm and then double the resulting value. (1. Underbust measurement and 2. cup size are calculated in the same way as with method 1)

Breast form measurement table

From the bra size to the breast form size

① Find bra size ② Find cup size ③ Select breast form

Example: bra size **85** (UK/US size 38) **C** = breast form size **90** (Int. 7)

The explanations provided here are intended as a guide to help you choose the most suitable breast form for your customer. They can never be wholly accurate as each body type is different and surgical procedures vary - you should therefore also rely on your own experience and intuition. If you aren't 100% sure, try the T-shirt test to check that the breast form fits well and remains invisible under tight-fitting clothing.

Tips for garment care

- Wash by hand with soap or take into the shower
- If breast forms have a textile backing, the fabric should not be pulled or torn
- Dab the wet textile section with some paper or a towel; drying time is around one hour
- Sharp or pointed objects (including animals' claws) can irreversibly damage the film
- Please do not use aggressive detergents or solvent-based cleaning agents

Additional care tips for adhesive breast forms

- Neutral liquid soap (without silicone) and water is sufficient
- Do not use fabric or paper towels for drying to prevent residues being left on the adhesive surface
