

# Defibrillation Electrode

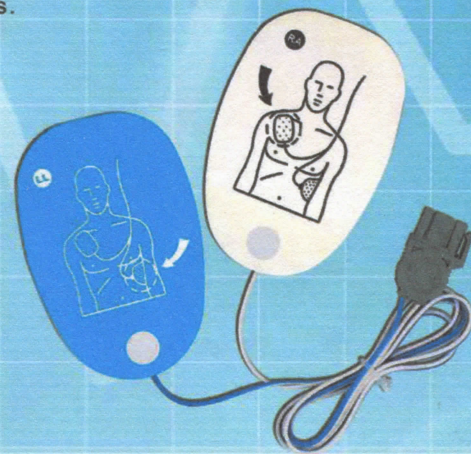

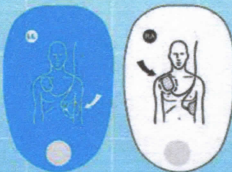

OBS Defibrillation Pads are produced by high quality of hydrogel with excellent adhesivity through our unique automatical production line. It's hydrogel is overlapping design which can avoid the exposure of conductive film and provide homogeneous and uniform distribution of current on the surface to avoid burn happen.

OBS Defibrillation Pads are equipped with different connectors compatible with different brand of defibrillators.

## Defibrillation Pad Model

> Defibrillation Pad Model: **OBS-DE/P**

1 pari / □ , 25 □ / □ , 4 □ / □
