DURABILITY and LIFETIME OF THE PREMIUM PREPARED MICROSCOPE SLIDES MADE BY JOHANNES LIEDER, GERMANY

The lifetime of a prepared slide depends on the technical efforts which are applied to the slides during their production. A well prepared microscope slide should stay much longer than the warranty we have to give by law for two years.

The manufacturing of prepared microscope slides is a long, difficult, painstaking and costly process, and there are companies trying to shorten and simplify the process of manufacturing with the result of fading colors, bubbles and clouding mounting media after short time.

The slides of LIEDER are prepared with all our over 65 years experience, using only the most expensive and durable staining technologies, removing any rest of acids or water before clearing the slides, and using only strictly neutral mounting media. Therefore, we can give a guarantee for the durability of our LIEDER slides for 20 (twenty) years.

The prerequisite of this long guarantee is that the slides are stored on a cool and dark place. Keep boxes containing slides in the upright position (like a book in a shelf), to achieve that the slides are stored in the horizontal position.

Please do not hesitate to contact us again in case of further questions.

Best regards
