**Decision rules:**

Pass/fail criteria

For solid ingress test:

**IP2X:**

If contact possible with live parts: fail

Otherwise: pass

**IP3X/4X:**

For luminaires without draining holes, nor ventilation slots for forced cooling, penetration of the test probe in the enclosure: fail

For luminaires with draining holes, or ventilation slots for forced cooling, if contact possible with live part: fail

Otherwise: pass

**IP5X/6X**

By visual inspection:

If possible hazard due to presence of conductive dust: fail

If no possible hazard due to the presence of conductive dust: IP5X granted

No presence of talcum: IP6X granted

For liquid ingress test:

**IPX3/X4/X5/X6:**

By visual inspection:

If possible hazard due to presence of water: fail

If no possible hazard due to the presence of water and no efficient way to evacuate the water: fail

If no possible hazard due to the presence of water and an efficient way to evacuate the water: pass

No presence of water: pass

**IPX7/X8:**

By visual inspection:

Presence of water: fail

No presence of water: pass
