

APPAVISC

Hydroxypropyl Methyl Cellulose Ophthalmic Solution USP

PRODUCT DESCRIPTION:

Appavisc is a viscoelastic solution of optimum viscosity. It contains highly purified grade of HPMC 2% w/v. It is clear isotonic sterile, non-inflammatory, used as a lubricant and protector in IOL surgery.

COMPOSITION

Each mL contains:

Hydroxy Propyl Methyl Cellulose USP... 2% w/v

Sterile Isotonic base q.s.

→ Product Features

- Clear Visualization
- Preservative free sterile solution
- Optimum Viscosity
- Better chamber maintenance
- Friendly with corneal endothelium
- Provide excellent Lubrication
- Simple to remove from the anterior chamber

→ Packaging:

Primary Packing - 5ml Glass vials, rubber stopper, aluminium seal & pouch

Secondary Packing - Carton box with 23G Sterile Cannula.

→ Shelf Life:

24 months

→ Storage:

Store between 15°C-25°C

INDICATIONS: Appavisc is indicated as a surgical aid (medical device) during surgical procedures involving the anterior chamber of the eye, including extraction of the lens and insertion of intraocular lenses. It maintains the depth of the anterior chamber during the whole surgical procedure and permits greater operative precision without the risk of damaging the endothelium of the cornea or other intraocular tissues.

DOSAGE AND ADMINISTRATION: APPAVISC (Hydroxypropyl Methyl Cellulose Ophthalmic Solution USP) should be carefully introduced into the anterior chamber using the sterile cannula. It may be applied into the chamber prior to or following delivery of intraocular lens (IOL). It may be used to coat an intraocular lens as well as tips of surgical instruments prior to implantation which protect the corneal endothelium from possible damage during cataract surgical procedure.

SUPPLY: APPAVISC

(Hydroxypropyl Methylcellulose Ophthalmic Solution USP) is a sterile, non-pyrogenic, viscoelastic preparation supplied in 5mL glass Vials with single use sterile cannula.
