

# MINI-LINK 6600

### MINI-LINK the Network Node

Building an efficient microwave backhaul network with end-to-end performance in mind; requires high node capacity, compact and modular building practice and advanced packet functionality. The microwave nodes also need to be capable of handling single hops as well as advanced hub sites for larger networks. By combining MINI-LINK outdoor units and indoor units, all network scenarios are supported with superior performance and lowest possible cost of ownership.

Ericsson is the market leader in microwave transmission and has over 40 years of microwave experience with more than 3.5 million radio units delivered to over 180 countries.

## High Capacity Node and Radio Link

MINI-LINK 6600 is the high capacity indoor node in a split-mounted microwave system. It supports

switching capacity up to 90 Gbps, multiple high capacity radio links with a capacity up to 2.5 Gbps. With high modulation schemes 8k QAM, XPIC, MIMO, Multi-band booster, wide channels like 112MHz and multiple 10G interfaces it ensures deployment flexibility and future readiness.

### **Advanced Packet Functionality**

MINI-LINK 6600 has an integrated Ethernet switch/router supporting Customer and Provider mode switching, IP Routing and MPLS L3 VPN.

### Flexible and modular building practice

In MINI-LINK 6600, compact nodes as well as modular nodes using plug-in units are available. This makes it easy to customize configurations. The full range of MINI-LINK outdoor units can easily be combined in many different ways:

traditional frequencies (6-42 GHz), Vband 60 GHz, E-band 70/80 GHz, single and dual carrier, Coax and Ethernet interface.

#### Efficient network migration

MINI-LINK 6600 support any network migration from one generation of Radio technology to next on the Road to 5G. There is a topology flexibility in MINI-LINK 6600 to build hop based, tree, stars or ring based topologies to best support the network need.

For cost efficient migration MINI-LINK 6600 is hop compatible with MINI-LINK TN. Upgrading to MINI-LINK 6600, the radio units, antennas, and cabling can be reused.
