

Viscoelastic Mattress

TECHNICAL SPECIFICATION DATA SHEET

MT 02 Viscoelastic Orthopedic Mattress provides comfort to user. The special filling material in its top surface provides the weight to distribute on the mattress by surrounding its user. The dense filling material in the bottom surface increases the lying comfort by providing adequate support to the user. The air passages in the tube design provide air circulation and prevent heat accumulation.

- Adapt to the patient's individual weight, body shape, to provide maximum comfort
- Upper layer / Viscoelastic foam
- Lower layer / high- density (HD) foam polyurethane, 28kg/m³
- Mattress dimensions: 200x90cm
- Mattress thickness: 12cm
- Mattress cover fabric is 100% polyester covered with a 100% polyurethane layer
- Breathable, Antiallergic, Liquid-free, Fire resistant, Resistant to disinfection
- Closed with a zipper, with a protective flap to prevent liquids from penetrating inside the mattress at the location of the zipper
- Suitable for washing in water with a temperature of at least 70 °C and drying in dryer
- Loading cap. 230 Kg
