APP Sp. z o.o. declares with full responsibility that the APP TS 400 (APP index 010904) is a glass fabric produced from glass fiber strands (type E - glass fiber made of aluminum-boron-silicon glass) with the same warp and weft. Designed for manual lamination with chemically cured polyester resin. After hardening, the laminate is highly resistant to mechanical stress, vibrations and oscillations.

Weight: 400 g/m<sup>2</sup>

Advantages:

- allows reconstruction of missing fragments,
- good resin saturation,
- hardens in a wide range of temperatures,
- good resistance to chemical agents, not subject to water corrosion,
- low value of electrical permittivity,
- high mechanical resistance,
- high resistance to vibrations.
