

Nr. 168 din 31.10.2018

Recommendation Letter

The Moldovan Branch office of the Foundation Liechtenstein Development Service has contracted SRL ANDRA Electro-Service for the planning and implementation of a photovoltaic system (15 KWp) in the partner VET school No.4 in Balti. The project included also the paperwork related to the approval of the project and the documents necessary for putting the system into function. The contract was closed mid-February 2018 and all the works were completed by end of October 2018.

The quality of the installed system meets the expectations of the above-mentioned partner VET school active in initial vocational training for electricians.

Kind regards

Pius Frick
