

TULIP SERIES OUTFIT			
Item	Specification	MCX200	MCX200D
Optical System	Infinity Optical System	●	●
Eyepiece	EPI16x22mm	●	●
	Infinity Seidentopf Binoocular Viewing Head, Inclined at 30°, Interpupillary 47-78mm	●	●
Viewing Head	Infinity, Seidentopf Trinocular Viewing Head, Inclined at 30°, Interpupillary 47-78mm, Splitting ratio 30/50 (100X or 0.100 is optional)	○	○
	Wireless Digital Head with Built-in SMP Camera	○	○
	Inclinable Binoocular Viewing Head	○	○
Objective	Infinity Plan Objective NIS45	●	—
	Infinity Plan Objective NIS60	●	●
	Infinity Phase Contrast Objective NIS45	○	—
	Infinity Phase Contrast Objective NIS60	○	○
Nosepiece	Backward Quintuple Nosepiece(Non coding)	●	—
	Backward Quintuple Nosepiece(Coding)	—	●
Rackless Stage	Rackless Stage 230mm x 150mm, Moving Range 78mm x 54mm	●	●
	Inserted Abbe Condenser NA1.25(Including Empty Plate)	●	●
Condenser	Bright Field - Phase Contrast Plate (4x-100x Universal)	○	○
	Bright Field - Dark Field Plate	○	○
Focusing System	Coaxial Coarse and Fine Adjustment, Coarse Stroke 37.7mm per Rotation, Fine Stroke 0.2mm per Rotation, Fine division 0.002mm, Moving Range 30mm	●	●
	1W S-LED	—	—
Illumination	3W S-LED (LCD Display Magnification, Timing Sleep, Brightness Indication and Lock, etc.)	—	●
	3W LED, Two Wave Range (B, G, U, V can be combined), Fly-eye Lens Illumination	○	○
Fluorescence attachment	1x Photo Attachment	○	○
	0.54x Photo Attachment	○	○
Accessories	Simple Polarization Set	○	○
	Camera	○	○
Filter	App Software	—	○
	TULIP	●	●

TULIP SERIES
BIOLOGICAL MICROSCOPE

Environmentally Friendly · Operating Comfort · High Performance

TULIP BIOLOGICAL MICROSCOPE

micros
Austria

Water is used instead of cedar oil for 100x water-immersion objective. Excellent image, easy to operate and better for environment.

TULIP Biological Microscope

Comfortable and Efficient, Various Observations, Intelligent, Environmentally Friendly

3/6 TULIP BIOLOGICAL MICROSCOPE

Excellent Optical Design

NIS Infinity Optical System

NIS Infinity plan objectives can provide high contrast and very flat image up to FN 22. With FN 22 wide field eyepieces, the system always brings you sharp, excellent resolution and high signal to noise ratio imaging.

22mm Wide Field of View

The Tulip microscope achieves the wide field of 22mm view with 10x eyepieces for a more comprehensive observation content and faster sample observation. The eyepiece adopts a flat field distortion-free design to prevent the edge of the field from being imaginary and stray light.

Various Observation Methods

With the deepening of research in various fields, a single observation mode can no longer meet the daily scientific research work. As a continually upgradable microscope, TULIP can be extended on basic models to show a variety of observation capabilities.

Observation Methods	Bright Field	Dark Field	Phase Contrast	Fluorescent	Simple Polarizing
	●	●	●	●	●

Multifunctional Universal Condenser

Tulip offers universal condensers for bright field, dark field and phase contrast. The observation methods could be quickly switched by switching the slider. The phase contrast and bright field slider is universal for 4x-100x objectives also, simple and fast to use. The N.A. value index on the aperture diaphragm of the condenser is easily set to get exact size of diaphragm to correspond with the different objectives.

LED EPI-Fluorescent Illumination

LED EPI-Fluorescent illumination is safety and convenient. You don't need time to warm up or cool down. You don't need to align the bulb, and the long lifetime of LED bulb is up to 5000 hours. There are two filters position available and switching is fast and easy.

Infinity Optical System

TULIP is suitable for all kinds of microscopic using, especially for beginners and the users with long time micro-operation. The TULIP series of microscopes are fully optimized for the needs of such users. In terms of the objectives, the image quality and ease of use are achieved.

Intelligent operating system

Start4 working mode Lock mode ECO mode Sleep mode

3/6 TULIP BIOLOGICAL MICROSCOPE

This is an unbounded microscope

Tulip has the multifunctional digital head, the user does not have to be confined in front of the microscope. Instead, it can be used for mobile microscope teaching and outdoor field observation through mobile terminals and external mobile power. The objective, eyepiece, and observation tube are effectively anti-mold treated, so you can ensure a consistently clear image and extend the life of the microscope, even when working in hot and humid environments.

3/6 TULIP BIOLOGICAL MICROSCOPE

Easier to store, transport and accept

The microscope is compact and can be placed in an ordinary classroom closet. It has a special carrying handle, and is also lightweight and stable. The microscope back plate is designed with a hub device to effectively store the long power cord, improve the cleanliness of the laboratory, and reduce the tripping accident caused by the long power cord during the carrying process. The wooden storage box is an optional accessory that is very convenient for storage and carrying.

Ergonomic Design

In daily scientific research teaching and pathological diagnosis, working in front of the microscope for a long time has become the norm, and the consequent use fatigue often leads to physical discomfort, thereby reducing work efficiency and effectiveness. This TULIP microscope uses an ergonomic design, high eye-point, low-hand focus mechanism, low-hand stage and other ergonomic designs to ensure the user can perform microscope operation in the most comfortable situation... The focus knob, illumination control knob and stage handle are all in close proximity. The user can put both hands on the table while working, and can operate TULIP with minimal movement.
