Profile

Senior Full-Stack Developer / Web Engineer

Full-stack developer with a strong technical foundation and multidisciplinary experience in software solutions, IT infrastructure, and web development. With an initial legal background, Alexandr transitioned into IT, progressing through relevant roles in international companies and digital agencies. Focused on delivering stable, optimized, and scalable products.

Employment History

Full-Stack Developer | Amigo Studio

JANUARY 2019 – PRESENT

Full-Stack Developer with a strong technical foundation and hands-on experience in building and maintaining web applications end-to-end. I work across front-end and back-end, integrate APIs and databases, and focus on stable, optimized, and scalable delivery. Comfortable collaborating with product and design teams, clarifying requirements, and shipping improvements through iterative releases.

Web Developer | iLab

MARCH 2013 – DECEMBER 2019

Web Developer with practical experience in building and maintaining websites and landing pages. I implement responsive layouts, work with CMS when needed, and integrate basic forms, analytics, and third-party services. I focus on clean code, performance, and stable delivery, collaborating with designers and stakeholders to turn requirements into working web pages.

IT Specialist | Telecom Service

SEPTEMBER 2010 – APRIL 2013

IT Specialist in the Internal IT Department, responsible for day-to-day technical support and stable operation of workplace infrastructure. I handle user requests, set up and maintain hardware and software, manage access and accounts, and troubleshoot issues across office and remote environments. I also support basic network and security routines, ensuring systems run reliably and staff can work without interruptions.

Junior Specialist 1C & Support | Meta Systems

MAY 2015 – JUNE 2020

Junior 1C Specialist & Support, assisting with basic 1C setup and daily user requests. I help users with common issues, support data checks and routine operations, and document cases for faster resolution. I coordinate with senior specialists when tasks require deeper configuration or fixes, focusing on stable work and clear communication.

Education

License, Moldova State University (USM), Faculty of
Law

SEPTEMBER 2004 – MAY 2008
