

# hybrid

the ideal combination

# hybrid

## Hydrophilic guidewire

Designed to facilitate the insertion of catheters into intracranial vascular branches for diagnostic or therapeutic use.

O.D. as small as .007"

access treatment

### Optimized navigation

#### Trackability and pushability

given by the stainless steel proximal part

#### Shape retention and suppleness

thanks to the distal part in Nitinol

#### Smooth navigability

enhanced by the hydrophilic coating

#### Visibility

ensured by the distal radiopaque coil tip

### Access in

#### tortuous vasculature

thanks to the double angle

shaped tip and broad options of

O.D. as small as .007"

radiopaque  
coil tip

available in  
multiple lengths

## HYBRID007 & HYBRID008D

## HYBRID1214D

HYBRID are guidewires designed to facilitate the insertion of catheters into intracranial vascular branches for diagnostic or therapeutic use. Class III CE0297 in compliance with Medical Device Directive (MDD 93/42/EEC amended by 2007/47/EC). Manufactured by BALT Extrusion SAS. Carefully read the instructions for use before use. Not reimbursed. First CE marking: 2010. SONIC are braided micro-catheters intended for selective and hyper selective vascular catheterization for diagnostic or therapeutic purposes. Class III CE0297 in compliance with Medical Device Directive (MDD 93/42/EEC amended by 2007/47/EC). Manufactured by BALT EXTRUSION SAS. Carefully read the instructions for use before use. Not reimbursed. First CE marking: 2005. BALTACCI are micro-catheters intended for selective and hyperselective vascular catheterization for diagnostic and therapeutic purposes. Class III CE0297 in compliance with Medical Device Directive (MDD 93/42/EEC amended by 2007/47/EC). Manufactured by BALT EXTRUSION SAS. Carefully read the instructions for use before use. Not reimbursed. First CE marking: 1998. MAGIC are micro-catheters intended for selective and hyperselective vascular catheterization for diagnostic and therapeutic purposes. Class III CE0297 in compliance with Medical Device Directive (MDD 93/42/EEC amended by 2007/47/EC). Manufactured by BALT EXTRUSION SAS. Carefully read the instructions for use before use. Not reimbursed. First CE marking: 1998. VASCO+ are reinforced micro-catheters intended: for injection of diagnostic or therapeutic products; to position pushable coils "SPIRALES" or detachable coils especially the ones of MDS « mechanical detachment system »; for the use of the self-expanding stent LEO+ or SILK+. Class III CE0297 in compliance with Medical Device Directive (MDD 93/42/EEC amended by 2007/47/EC). Manufactured by BALT EXTRUSION SAS. Carefully read the instructions for use before use. Not reimbursed. First CE marking: 2004. COPERNIC are occlusion catheters indicated for use in the neurovasculature and peripheral system to temporarily stop or control blood flow, to treat vasospasms and embolization of aneurysms with balloons. Class III CE0297 in compliance with Medical Device Directive (MDD 93/42/EEC amended by 2007/47/EC). Manufactured by BALT EXTRUSION SAS. Carefully read the instructions for use before use. Not reimbursed. First CE marking: 1998.
