

1-1 Picture of real products

RED, GRASS GREEN, LIGHT GRAY, BLUE, DARK GRAY, YELLOW, BROWN, PURE BLACK, PURE WHITE colors are available for purchase's choice. Yellow color is chosen to introduce 15 Liter bins With pedal as follows.

1-2 Technical data of 30L waste bins

Product Model	ENL-15
Dimension	270*260*340 mm
Volume	15L
Body and Lid	PP, One-time injection molding, Seamless
Weight	0.75kg
Color and Logo	As buyers' requirement

- ◆ Appearance of performance: Surface smooth, no bubbles, impurities, trachoma, cracks, easy cleaning; Heat, cold, and chemical corrosion, impact resistance, anti-aging, strong and durable.
- ◆ Parts easily installation, cooperate with precision, lid sealed well.
- ◆ Corrosion resistance, with enough mechanical strength and good impact toughness.
- ◆ The product has acid resistance, alkali resistance and corrosion resistance. Normal working temperature: $-35^{\circ}\text{C} \sim +65^{\circ}\text{C}$;
- ◆ The service life is 6 years, during service life. The structure of garbage bin will not be fragile and deformed.
- ◆ The printing pattern on the surface of the barrel has been specially treated. It is firm and not easy to fall off.

1-3 Detailed Information of Dust Bin's components

- The body and lid is made of 100% Virgin PP raw material with one-time injection molding, no juncture, surface smooth, easy to clean.
- Unique design in the front and back of the body is a new patented technology, makes the sides of the bin bear enough mechanical strength and greater impact.

- The trash can is flip-type, pedal is made of 100% Virgin PP raw material with one-time injection molding. The first built-in bottom of the barrel body is embedded in the design, which is more beautiful, longer in service life, flexible and convenient to open the pedal. The opening angle is more than 60 degrees.
- Foot flip mechanism reliability test: Repeated stepping on 20000 times, the pedal flip mechanism is free from deformation and damage, and the lid is opened and closed.

- The spoon is connected with the foot so that the pedal can be used flexibly. One-time injection moulding, high strength and durability, so that the barrel body is closely connected with the barrel cover and will not fall off.

- Bucket bottom reinforcement. Based on years of customer experience in using methods, our company's original anti-wear design of the bottom of the barrel, which can increase the wear resistance of the bottom of the barrel. It has wear resistance, weather-ability, corrosion resistance, environmental protection, prevent the bottom of the barrel from wearing in the use process, and prolong the service life of the product.

- LOGO printing. Logo can be add both on the lid and body of trash bins, The barrel surface printing pattern has been specially processed. The pattern (font) is clear, clear and firm. Its surface is smooth and firm. The surface pattern reflects light. (Subject to the buyer's actual notification)
