MOTIONCORE TECHNOLOGY

Today's hearing aids analyze hearing situations solely on acoustic criteria, then classify them into a small range of predefined "acoustic environments". But when people rely on their senses to keep them safe and sound, hearing clearly in every situation is a must – especially when they're on the job and moving through the day, where environments can change quickly.

Our latest range of hearing aids use proven MotionCore technology to automatically recognize and adapt to more hearing situations than ever. This ensures users automatically hear speech clearer and get the most reliable impression of their environment. M-Core hearing aids are designed to be durable, practical and easy-to-use, so your customers can rely on Rexton in any situation.

UP TO 20 TIMES MORE HEARING SITUATIONS THAN BEFORE, AUTOMATICALLY

High Resolution Soundpro

Using a combination of inputs including real-time motion data, signal to noise ratio, and sound directionality, High Resolution Soundpro can continuously adjust the sound settings to provide the most reliable impression of the user's environment, automatically.

Motion Sensor

MotionCore technology features an integrated real-time motion sensor that detects a user's movement, and uses the data to even more accurately determine their sound situation. With this, M-Core hearing aids can automatically detect up to 127 different sound situations.

My Voice

The hearing aid recognizes the user's specific voice pattern, and integrates it naturally into what they hear. In turn, this provides the user with a natural-sounding voice that leads to high acceptance rates. And for that the user will communicate more and be more socially active, greatly improving their quality of life.

Streaming

Audio signals from smartphones, TVs or devices can be streamed wirelessly to the hearing aids; directly or via transmitter. Direct Audio Streaming is available from iOS smartphones, and Android smartphones can stream with the addition of the Smart Mic accessory.

REXTON APP: A HEARING AID WEARER'S ALL-IN-ONE SMARTPHONE COMPANION

The Rexton App allows wearers to control their hearing aids conveniently and discreetly, e.g. change programs, volume, tone.

Download the Rexton App now!

RECHARGEABLE BTE POWER

NOW WITH MOTIONCORE

Our latest generation of BTE hearing aids comes completely rechargeable, even up to our High Power models with an unbelievable runtime of up to 61 hours on a single charge. They also feature MotionCore technology, which automatically recognizes and adapts to more hearing situations than ever. With new performance levels and our first rechargeable Superpower BTE, more users can automatically get the most reliable impression of their environment than ever. M-Core B-Li hearing aids are designed to be durable, practical and easy-to-use, so your customers can rely on Rexton in any situation.

Lithium-ion power for every need

- Up to 61 hours wear time on a single full charge
- 30-minute fast charge delivers up to six hours of wear time
- Automatic drying function integrated in the optional Dry&Clean charging station

MYCORE

A PERFECT COMBINATION OF NATURAL SOUND AND DIRECT STREAMING

DIRECT STREAMING

Optimally connected to smartphones, TV's and more

MY VOICE

Natural perception of wearer's own voice

STEREO ILOCK

Improves the signal-to-noise ratio in difficult listening situations

VOICE RANGER

Easier one-on-one listening in noisy situations

DYNAMIC EXTENDER

Automatically optimizes the dynamic bandwidth of sounds

DISCREET AND READY TO FIT

inoX combines the discretion of a custom model without having to take an ear impression. It is not only 20% smaller than its predecessor but also offers enormous sound thanks to the MyCore technology. Even directional characteristics are imbedded in a binaural fitting. With its high flexibility inoX can be fitted to nearly every ear.

THE CUSTOM MADE IN-THE-EAR PRODUCT FEATURING DIRECT AUDIO STREAMING

The Sterling ITE is Rexton's first hearing aid with Direct Audio Streaming technology via Bluetooth® and standard wireless. This makes the hearing aid a universally networked in-ear communication center. Binaural signal processing ensure easier listening in loud environments. The small-sized remote or App enable wearers to discreetly change volume, programs and more.

GREAT NEW FEATURES AND BENEFITS IN A SMALL HEARING AID

The Emerald M is the ideal combination of small size and long battery lifetime. With up to 75dB of gain, Emerald M fits for even severe hearing loss. The size 13 battery and low power consumption of the hearing aid ensure longest running time. Direct connectivity to iPhones, TVs and other Bluetooth® enabled devices via Smart Transmitter 2.4 and Smart Mic. My Voice ensures a wearer's natural own voice experience by processing it differently than other voices and sounds. And the optional battery door with integrated T-Coil ensures optimal understanding in locations equipped with loop system.

MOSAIC P

Performance Level 80 | 60 | 40 | 30 | 20

MOSAIC P: POWER - PURE AND SIMPLE

Mosaic P is perfect for patients who need extra amplification. The Mosaic P features a long-lasting battery with low power consumption and the flexibility you need to treat even severe hearing loss. Direct connectivity to iPhones, TVs and other Bluetooth® enabled devices via Smart Transmitter 2.4 and Smart Mic. My Voice ensures a wearer's natural own voice experience by processing it differently than other voices and sounds. Optional battery door with integrated T-Coil ensures optimal understanding in locations equipped with loop system.

PROVEN DESIGN

This hearing system provides a pleasant sound experience with excellent listening comfort and high amplification power. Wireless functionality up to 65 dB possible. Binaural signal processing ensures easier listening in loud environments. Smart Key or Rexton App enables wearers to discreetly change volume, programs, and more. Sterling ITC is available with an optional telecoil.

ACCESSORIES & APPS

THE COMPACT SMART MIC

**DIRECT AUDIO STREAMING FROM
PRACTICALLY ANY BLUETOOTH-ENABLED
ANDROID SMARTPHONE**

The new Smart Mic enables hands-free telephone calls without your customer needing to pick up his/her smartphone. In challenging hearing environments it can easily be used as an additional microphone.

SPECIAL FEATURES

- Direct streaming from Android smartphones
- Listen to music in stereo quality
- Can be used as a conference microphone

THE PRACTICAL SMART TRANSMITTER 2,4

**THE BLUETOOTH® TRANSMITTER FOR
TELEVISIONS AND STEREO SYSTEMS**

The Smart Transmitter 2,4 allows direct transfer of stereo sound from audio sources such as television sets and stereo systems to the hearing systems. Simply place the hearing systems on the transmitter and the pairing process begins. The transmitter can be paired with multiple hearing systems at the same time for shared enjoyment with friends.

SPECIAL FEATURES

- No separate remote control needed
- Connecting/pairing is particularly easy
- Several hearing system users can connect simultaneously
- Analog and digital audio inputs (Cinch and TOSLINK)

THE HANDY SMART KEY

SMALL AND PRACTICAL

With Smart Key, programs and volume can be easily adjusted. A keylock prevents buttons from being inadvertently pressed. A status LED indicates whether the remote control is enabled.

SPECIAL FEATURES

- Small and handy
- Control via high-frequency sounds

THE COMPREHENSIVE REXTON APP

ONE FOR ALL

The Rexton App allows your customers to control their hearing system conveniently. In MotionCore and MyCore hearing aids, telephone calls are forwarded directly from the iPhone and take priority over other audio signals; streamed music can be listened to in stereo, directly and without any additional device. With TruCore hearing aids and the Smart Connect you can stream music and telephone calls through this app.

The free Rexton App turns a smartphone into a discreet remote control for the hearing systems. With this app, the hearing systems can be customized and operated for the following settings: hearing program, volume and tone, without the need for any additional accessories.

Download
the Rexton App now!

SPECIAL FEATURES

- Hearing programs and volumes can be adjusted discreetly
- The volume can be set individually for the right and left hearing system
- The Rexton App creates an environment profile for its user. This renders optimization easier for you when it comes to fine-tuning and after sales care

THE FUNCTIONAL SLIM-RIC TRAVEL CHARGER

WITH QI CHARGING

Featuring an ultra-convenient Qi wireless charging system for the internal power bank and advanced lithium-ion technology, the sleek and compact design provides up to four days hearing on-the-go.

The fast charge feature provides up to five hours wear time in just 30 minutes, while the case can be fully recharged in just three hours.

SPECIAL FEATURES

- 4 days on the go (3 times recharging)
- The size is optimized to accommodate:
- Devices with Mini Receivers 2.0 length 0-3
- Mini Receivers 2.0 types S, M, and P

THE FAST SMART LI-ION POWER

FAST, INDUCTIVE CHARGING

Once the hearing systems are placed in the charging station, the charging process starts automatically. Charging takes place inductively, that is, without direct contact. A complete charge takes approximately 4 hours. Even after just 30 minutes, the hearing systems are ready for another 7 hours of use. The three LEDs display the charging status of the hearing systems.

SPECIAL FEATURES

- Drying function during charging
- Hearing systems automatically switch off when they are placed in the charging station and turn on when they are removed
- Automatic switch-off guarantees overcharge protection
- Standard power supply with micro-USB connector
- Compatible with standard power banks

THE COMFORTABLE CHARGING STATION

The new Charging Station: Not only easy to use for your customers, but also great for the environment. A full charge easily carries through the day, even with streaming music. And - if needed - a quick charge option ensures additional hours of functionality – with only thirty minutes charging time.

SPECIAL FEATURES

- New design with case cover
- Drying function during charging
- Automatic switch-off guarantees overcharge protection
- Inductive charging
- Standard power supply with micro-USB connector

THE NEW CHARGING STATION B-P

ROBUST AND FUNCTIONAL

The all new Charging Station for the P Li-Ion G6. A powerful hearing aid needs a powerful and long lasting charger. Its' galvanic charging system ensures a lossless charging process.

The new housing has a robust and scratch resistant design and is very easy to use. Just lay the hearing aids into the intended slots to charge it over night or make use of the 30 minute fast charging functionality.

SPECIAL FEATURES

- New robust and scratch resistant design
- 30-minute fast charge functionality
- Fixed USB charging cable
- Included power adapter

THE NEW CHARGING+ STATION B-P

ADVANCED PRACTICABILITY

The all new Charging+ Station B-P is the premium version compared to the standard charger with additional features for the new P Li-Ion G6.

It is equipped with an interated drying functionality, an integrated UV cleaning light and offers also a fast 30 minute fast charging functionality.

It's robust and scratch resitant finish is ideal for the daily use and for a long lasting operation.

SPECIAL FEATURES

- New robust and scratch resistant design
- 30-minute fast charge functionality
- Fixed USB charging cable
- Included power adapter
- Integrated drying functionality
- Integrated UV cleaning functionality

THE NEW CHARGING STATION B-HP

ROBUST AND FUNCTIONAL

The all new Charging Station for the HP Li-Ion G6. A highly powerful hearing aid needs a powerful and long lasting charger. Its' galvanic charging system ensures a lossless charging process.

The new housing has a robust and scratch resistant design and is very easy to use. Just lay the hearing aids into the intended slots to charge it over night or make use of the 30 minute fast charging functionality for a quick boost of extra wearing time if you're in a hurry.

SPECIAL FEATURES

- New robust and scratch resistant design
- 30-minute fast charge functionality
- Fixed USB charging cable
- Included power adapter

THE NEW CHARGING+ STATION B-HP

ADVANCED PRACTICABILITY

The all new Charging+ Station B-HP is the premium version compared to the standard charger with additional features for the new HP Li-Ion G6.

It is equipped with an integrated drying functionality, an integrated UV cleaning light and offers also a fast 30 minute fast charging functionality.

It's robust and scratch resistant finish is ideal for the daily use and for a long lasting operation.

SPECIAL FEATURES

- New robust and scratch resistant design
- 30-minute fast charge functionality
- Fixed USB charging cable
- Included power adapter
- Integrated drying functionality
- Integrated UV cleaning functionality

RELY ON REXTON

It's a tough world out there, and even tougher when your hearing starts to go. At Rexton, we won't let hearing loss hold you back. Good hearing is critical: From getting the job done, to getting home safely and being there for the people who count on you, we know what's at stake. That's why we work hard to deliver proven hearing technology in the most reliable way. We understand what reliability means in real life, and make practical, easy-to-use products you can count on. Our hearing aids have been getting the job done since 1955, so whatever life throws at you, you can rely on Rexton.
