

Cure - Aid[®]

Description:

Cure-Aid[®] plasters and dressing strip: adhesive plasters that consists of an absorbent low-adherent pad placed on different backing materials coated with pressure sensitive adhesive.

Cure-Aid[®] Blue Metal & X-ray Detectable plasters and dressing strip: supplied with an Aluminum sheet and thin metal strip under the pad which is detectable in most metal detectors and X-ray equipment. Bright blue color for easier visual detection.

Cure-Aid[®] Eye pad: Island dressing made of absorbent pad, placed centrally on non-woven backing material coated with pressure sensitive adhesive and with opaque black polyurethane layer to protect the eye from light. Designed to keep the injured eye safely covered during the healing process.

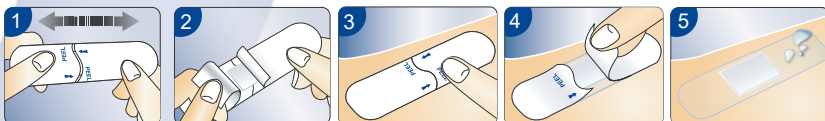

Cure-Aid[®] is available with different backing materials:

- 1- **Polyethylene Foam:** semipermeable, waterproof and with small open cells that can hold fluid.
- 2- **Polyethylene film:** perforated film supplied with multiple colors e.g. transparent, white, skin color.
- 3- **Printed films:** waterproof and dirt-repellent kids plaster with fun motifs.
- 4- **Polyurethane film:** waterproof, bacteria-proof and virus-proof plasters that protect the wound from external contamination.
- 5- **Non-woven:** soft fabric suitable for patients with sensitive skin.
- 6- **Non-woven Ultra:** additional upper polyurethane layer laminated to the non-woven backing, protects the wound from external contamination and suitable for sensitive skin.
- 7- **Universal:** additional upper polyethylene layer laminated to the non-woven backing, protects the wound from external moisture and suitable for sensitive skin.
- 8- **Thermoplastic Polyurethane:** TPU makes the plaster breathable and flexible.
- 9- **100% Cotton Fabric:** Low irritant Rigid Fabric and Flexible Elastic adhesive plaster. Supplied in special shapes designed for fingertips and joints. Also supplied as Side Way Elastic Fabric (transversely stretch-able) that adapts well even to highly contoured parts of the body. Stretch is very well tolerated even by patients with sensitive skin.
- 10- **Paper Non-Woven:** medical paper backing suitable for patients with sensitive skin.
- 11- **PU Tough:** scrim net substrate laminated with Polyurethane film which makes the plaster rigid.

Cure-Aid[®] Plasters and dressing strip: product line is available in sterile and non-sterile variants

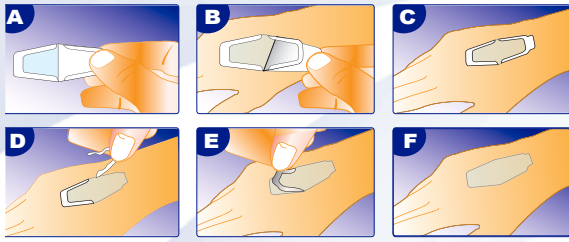

Cure-Aid[®] is available with different applications systems:

- 1- Wave-cut application system.

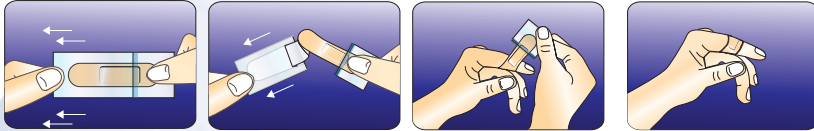

Cure - Aid[®]

2- Frame Style application system.

3-Cure-aid easy open.

Features:

Cure-Aid[®] plasters and dressing strip:

- Breathable with high permeability to water vapor and oxygen.
- Low-adherent absorbent pad that doesn't stick to the wound.
- Highly conformable and flexible plasters suitable for curves and contours of body.
- Easy to apply and with rounded edges to prevent dressing from curling up.

Cure-Aid[®] Blue Metal & X-ray Detectable plasters and dressing strip:

- A necessity in food-processing plants where a foreign object in finished product can be a disaster
- Waterproof.
- Visually Detectable.
- X-Ray and metal detectable.

Cure-Aid[®] Eye pad:

- Protects the eyes from dust and grime.
- Soft and comfortable absorbent pad.
- Strong elastic bandage secures pad firmly in place.

Intended Purpose:

Cure-Aid[®] plasters and dressing strip:

Intended for the protection of minor acute wounds such as cuts, skin scratches, abrasions, lacerations and after blood drawing or vaccination.

Cure-Aid[®] Blue Metal & X-ray Detectable plasters and dressing strip:

Ideal to cover minor wounds, abrasions, superficial wounds and skin cuts in food processing factories, restaurants,...etc.

Cure-Aid[®] Eye pad:

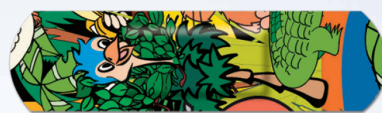

Intended for patients with minor eye injuries, foreign objects embedded in their eyes and with lazy eye disorder. Besides, the pad can be used after eye trauma e.g. corneal abrasion and may provide initial protection from possible risk of infection.
