

GARBAGE COMPACTOR TRUCK

6 Rear light
Convenient for night work of sanitation workers.

5 Balance valve
Protect oil cylinder.

4 Arc container
Stable structure and increase the volume of container.

3 Back pressure valve
Two way compression, increase the loading capacity.

2 Hydraulic oil tank
High cooling efficiency, stable oil temperature and pressure.

1 Electric control system
CAN electric control with one key unloading. With better dustproof, shockproof, anti-circuit broken, waterproof function. Equipped with power takeoff buzzer to avoid oil pump or gearbox broken caused by unlock of power takeoff.

7 Approach switch
Use the induction switch oil pressure control to switch action. Each action is more accurate and the electric control system is more stable.

8 Turning structure
Kinds of structure for option:
1. garbage bin turning structure
2. dust pan
3. swing arm

9 Slide structure
Embedded slider structure, with connecting shaft, wear resistance, no deformation.

10 Oil pump
External structure with high pressure and fast cycle speed.

11 Double sewage box
Avoid leakage and second pollution.

12 Gear oil pump
Famous brand with high quality.

13 Hydraulic valve
High precision and stability.
