### 3. Evaluation

#### Administrative compliance

The Evaluation Committee used the Administrative compliance grid in the tender dossier to assess the compliance of each tender with the administrative requirements of the tender dossier.

#### Technical evaluation

All voting members of the Evaluation Committee used the evaluation grid in the tender dossier to assess the technical offers of the tenders that met the administrative requirements, as listed in the

Tender opening report. The completed evaluation grids are attached to this report, together with a summary of the evaluators' comments on the strengths and weaknesses of the technical offers.

Based on the provisional average scores given by the Evaluation Committee to the technical offers, the references of the key experts proposed by the following tenderers (which achieved a provisional average score around 75 points or more) were verified:

<b>Tender envelope number</b>	<b>Tenderer name</b>	<b>Provisional average score</b>

MD-IDNO-1010600010328	<b>I.C.S. Reliable Solutions Distributor S.R.L.</b>	

The references which were verified are diplomas and documents proving experts' professional experience of EU projects, as mentioned in their CV, and/or other references provided by the tenderer.

On completion of the verification, the members of the Evaluation Committee considered whether or not it was necessary to adjust the provisional scores given to the experts. Any changes are clearly indicated by the members on their evaluation grids with a note explaining why the change was made.
