ABOUT US

Founded in 1955, Sterimed Group today has presence in the fields of Medical and Surgical Devices, Industrial and Medical Adhesive Tapes, Eco-friendly non-woven bags among others. At Sterimed Group we take pride in delivering quality consistently for over 65 years, and growing on the trust and goodwill of our customers. Focusing on the future, we are expanding rapidly into newer products and geographies, and are slated to be amongst the fastest growing homegrown companies in the country.

Sterimed has been a significant player in medical disposables and devices, offering a range of over 100 products, and catering to the needs of the medical fraternity for over 65 years.

OUR VISION IS TO INNOVATE FOR TOMORROW AND IMPROVE PATIENT CARE, WITH A SHARP FOCUS ON QUALITY AND EXCELLENCE, AND ON DELIVERING WORLD-CLASS PRODUCTS.

QUALITY ASSURANCE

At Sterimed, Quality Assurance is at the heart of how we do things. Our comprehensive Quality Management System ensures exhaustive checks and testing at all stages in the production cycle, right from raw material procurement till packing of the finished products. And our state-of-the-art manufacturing facilities at Bahadurgarh near New Delhi meet the strictest international compliances and requirements.

Our rigorous quality control standards have earned us the WHO GMP certification, CE Marking as per European Medical Device Directive 93/47/EEC, EN ISO 13485:2016 certifications.

STRICT HYGIENE AND SAFEGUARDS

At Sterimed, we have set stringent hygiene and environment friendly standards. Walls and flooring at all facilities are epoxy coated to minimize bio load, and Special HEPA /micro filters are provided at all air handling equipment to minimize contamination in the manufacturing areas.

RESEARCH AND DEVELOPMENT

In line with our vision of Innovating for Tomorrow, there is immense focus internally on Research and Development. A modern laboratory equipped with pilot plant facilities works constantly on improving existing products and developing new innovative products for the portfolio.

GLOBAL PRESENCE

Sterimed Group's vision spans across geographies, catering to domestic as well as international markets covering more than 38 countries. With operations across Europe, Latin America, Africa and South-East Asia, the group is fast expanding its footprint globally.

Sterimed High Flow Foley Balloon Catheter

Conforming to ISO 20696

High Flow 2 Way | SMD 520
High Flow 3 Way | SMD 521

- Foley Balloon Catheter High Flow
- Grand Débit Foley Globo Sonda
- Cateter balão High Flow
- Cathéter à ballon High Flow

LESS TRAUMA DURING CATHETERIZATION
REDUCED TISSUE DAMAGE
LONGER IN-DWELLING TIME
TRAUMA FREE REMOVAL

- Used for short term urine drainage
- Made from natural latex rubber
- Silicon elastomer coated smooth surface for atraumatic catheterization
- High strength polymer layer in the middle of the catheter ensures wider inner diameter and hence high flow rate
- Minimises encrustation and subsequent catheter blockage and failure
- Smooth eye, ultra thin highly elastic balloon and hard non-return valve for trouble free inflation and deflation

High Flow Features:

Unique Four Layer System

Prevents allergy from proteins in the Latex

Minimised Encrustation & Catheter Blockage

TWO WAY		THREE WAY	
Size in FR	Balloon Capacity	Size in FR	Balloon Capacity

Colour Code	Black	Grey	White	Green	Orange	Red	Yellow	Voilet	Blue	Pink

A Study was conducted by a research team of **DOW CORNING, USA** to check the efficacy of the elastomer coating on the **STERIMED HIGH FLOW FOLEY BALLOON CATHETER**, which were compared to an uncoated catheter.

The results indicated a 54% fall in coefficient of friction. Meaning, the possibility of tissue damage and trauma is reduced to half. Further, the study checked the longevity of the coating under exposure to urine for upto 29 days.

The results indicated that the coating remained fully functional during the period of study. Further, the study clearly indicates an increase in coefficient of friction due to encrustation over a longer period, in case of an uncoated catheter.

However, in case of elastomer coated catheter, the coefficient of friction remains consistently low over the 29 days of study thus ensuring a smooth trauma free removal of the catheter.

Comparison of flow rates of **STERIMED HIGH FLOW FOLEY BALLOON CATHETER** VS Some leading brands in the market.

	Flow Rate / min	Standard as per BS EN 1616 : 1997
Sterimed High Flow	360	100
Brand B	355	100
Brand T	340	100
Brand R	340	100

Measured for Size 16 Fr Balloon capacity 30ml and method of measurement as per ISO 20696:2018

SUMMARY OF HEALTH DATA, PROFILE FOR SILICON ELASTOMER COATING

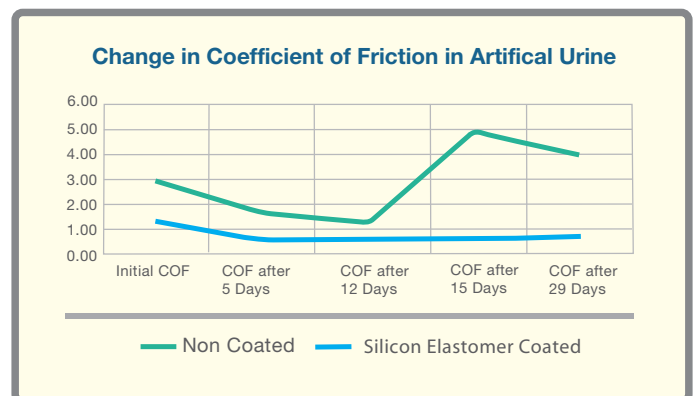

Latex sheet coated with Silicon Elastomer compared with uncoated latex sheet, initial cof after 24h, final cof after 5D, 10D, 15D, 29D

	Non Coated	Silicon Elastomer Coated
COF after 24 Hrs	2.98	1.38
COF after 5 Days	2.98	1.36
COF after 10 Days	2.98	1.32
COF after 15 Days	2.98	1.30
COF after 29 Days	2.98	1.05

Latex sheet coated with Silicon Elastomer - artificial urine, initial cof, final cof 5D, 10D, 15D, 29D

	Non Coated	Silicon Elastomer Coated
Initial COF	2.98	1.39
COF after 5 Days	1.76	0.69
COF after 10 Days	1.38	0.80
COF after 15 Days	4.89	0.74
COF after 29 Days	4.00	0.81

- Coefficient of Friction was measured based on the method and instrument technique developed by Dow Corning internally
- Artificial Urine was as per ISO 20696:2018
- Cured Latex Sheets were collected from external source.

Sterimed Regular Flow Foley Balloon Catheter

Cathsafe

Foley Balloon Catheterization Kit
SMD 518

CUSTOMIZABLE

-  Cathsafe - Foley Balloon Kateterisasi Kit
-  Cathsafe - Foley Globo Cateterismo Kit
-  Cathsafe - Foley Balão Cateterismo Kit
-  Cathsafe - Foley cathétérisme à ballonnet Kit

- Complete solution for the indwelling catheterization process
- Easy to use, store and transport
- Increases efficiency for medical practitioners

List of contents:

- Sterimed High Flow Foley Balloon Catheter / Sterimed BH Silicon Foley Balloon Catheter / Sterimed Star Foley Balloon Catheter
- Syringe
- Gauze Swab 7.5cmx7.5cmx12 ply
- Urine Culture Bottle 30 ml
- Urine Bag
- Povidone
- Lignocaine Gel
- Plastic forceps
- Drape sheet with rhomboid hole
- Water Proof drape
- Latex Gloves 2 pair
- Sterile Water

Packing

- Sterile, individually packed in peelable pouch pack.
- Carton of 30 Pcs.

Gross: 19.5kg

640 x 560 x 300mm

Sterimed Nelaton / Urethral Catheter

SMD 502

- Nelaton / Urethral Cateter
- Nélaton / Urétrhal Catéter
- Nelaton / Urethral Catheter
- Nélaton / Urétrhal Cathétér

- Used for short term bladder catheterization
- Made from non-toxic, non-irritant, medical grade PVC
- Radio opaque line provided through out the catheter for X-ray visualization
- Distal end with lateral eyes and proximal end funnel connector, for maximum drainage and easy connection to the urine bag

Packing

- Sterile, Individually packed in peelable blister pack.
- Box of 100; Master Carton of 1000.

ANAESTHESIA & CRITICAL CARE

Sterimed Endotracheal Tube - Cuffed (HVLP) & Plain

(Nasal/Oral)

Cuffed | SMD 701 C

Plain | SMD 701 P

Trachseal | SMD 701 CT

Endotracheal Tube - Cuffed hidung / lisan

Tubo Endotraqueal - Cuffed & Plain

Tubo endotraqueal - Cuffed & Plain

Tube endotrachéale - revers & Plaine

Conforming to ISO 5361

PHthalate FREE

- Used to maintain a patient airway and mechanically ventilate patients
- Made from a special non-toxic PVC coated with silicon elastomer which forms a bonded film over this tube and balloon.
- 100% Phthalate free.
- The tube is coated with non-stick, self-lubricating Silicon elastomer (Elastosyl) which forms a thin film on the surface.
- Elastosyl reduces the coefficient of friction by 80%, Reducing trauma significantly.
- Elastosyl coating forms a non-stick layer on the balloon preventing it from sticking to the trachea.
- Elastosyl offers a 100 % more bio-compatible surface to the tube and is much safer for the body.
- Low pressure high volume cuff provides excellent seal
- Made from non-toxic, non-irritant medical grade clear PVC
- Kink resistant, thin-walled, thermo-sensitive tube, softens at body temperature
- Smooth inside/outside surface for ease in intubation, extubation and suctioning
- Smooth polished murphy eye, distal end and tapered balloon end for atraumatic intubation and extubation
- Kink resistant inflation tube to ensure patient safety during cuff inflation and deflation
- Radio opaque line and markings provided to facilitate identification of tube position
- Universal 15 mm connector at proximal end
- E.T.O Sterile and Pyrogen free. For single patient use

Packing

- Sterile, Individually packed in peelable pouch / blister packed.
- Box of 25; Master Carton of 300

Gross: 5.8kg (300 pcs)
Gross: 11.5kg (300 pcs)

- Endotracheal Tube Sangat Tipis Cuff
- Tubo Endotraqueal Ultrafino - Cuff
- Tubo endotraqueal Ultra fino - Cuff
- Tube endotrachéale Très mince - Cuff

- Trach seal ultra is an ET tube with an ultra-thin polyurethane cuff.
- The thin cuff eliminates the layer folding problem present in conventional PVC cuffs and hence prevents the infectious secretions from percolating into the lungs.
- The thin polyurethane cuff offers a distinct advantage for the pediatric and neonate anatomy.
- It significantly reduces the cases of re-intubation and seals the trachea perfectly and trauma free.
- Used to maintain a patient airway and mechanically ventilate patients
- Made from non-toxic, non-irritant medical grade clear PVC
- Kink resistant, thin-walled, thermo-sensitive tube, softens at body temperature
- Smooth inside/outside surface for ease in intubation, extubation and suctioning
- Smooth polished Murphy eye, distal end and tapered balloon end for atraumatic intubation and extubation

Lockable obturator with provision for guidewire introduction

- Used to maintain a patient airway through tracheostomy and mechanically ventilate patients
- Made from non-toxic, non-irritant, medical grade clear PVC
- Kink resistant, thin-walled, thermo-sensitive tube, softens at body temperature
- **Lockable obturator** with facility to insert guide wires to facilitate intubation using the widely accepted Seldinger guide wire technique
- Anatomically designed tube and obturator with extra smooth and curved distal end for atraumatic intubation and extubation
- Smooth inside/outside surface for ease in intubation, extubation and suctioning
- Kink resistant inflation tube to ensure patient safety during cuff inflation and deflation
- Radio opaque line and markings provided to facilitate identification of tube position
- Universal 15 mm connector at proximal end
- E.T.O Sterile and Pyrogen free. For single patient use

Packing

- Sterile, Individually blister packed.
- Master carton of 100.

Gross: 6.5kg approx.

580 x 480 x 305mm

SIZES

3.5 mm, 4.0 mm, 4.5 mm, 5.0 mm, 5.5 mm, 6.0 mm, 6.5 mm, 7.0 mm, 7.5 mm, 8.0 mm, 8.5 mm, 9.0 mm

Sterimed Suction Catheter Closed System (24 hrs / 72 hrs)

Conforming to ISO 8836

With bronchoscopy port

SMD 700CS

- Suction Catheter Closed System (24 jam / 72 jam)
- El catéter de succión de sistema cerrado (24 hrs / 72 hrs)
- Sucção Catheter System Closed (24 horas / 72 horas)
- Des systèmes d'aspiration fermé cathéter (24 heures / 72 heures)

PHTHALATE FREE

- Used to maintain ventilation and oxygen therapy while suctioning in mechanically ventilated patients
- Minimises the risk of Ventilator Associated Pneumonia (VAP)
- Made from non-toxic, medical grade PVC
- Catheter with lateral eyes, smooth tip and depth markings for maximum patient comfort
- MDI port provides an effective, quick and convenient way of drug delivery
- Irrigation port with one way valve allows lavage and irrigation of the suction catheter
- On/off valve allows suction catheter tip to be isolated and creates an enclosed cleaning chamber. No risk of fluid going into the respiratory track
- Transparent connectors and durable sleeve facilitates catheter manipulation and prevents infiltration of blood and sputum
- 360° swivel elbow enables rotation for enhanced patient comfort and reduces torque
- Wedge for easy removal of ET Tube from the catheter.
- Flexi-mount connector for higher convenience.

Sterimed Catheter Mount

SMD 727

-  Kateter Mount
-  Montaje del catéter
-  Montagem de cateter
-  Support de cathéter

- Provided with Suction & Bronchoscopy Ports.
- Compatible with all Breathing and Ventilator circuits.
- Double swivel connector and flexible tubing provides mobility and flexibility to the patient end of the circuit.
- The tubes are made of a special flexible co-polymer and have a minimal compliance with low dead space volume.
- The catheter mount is fitted with a double swivel connector
- Each catheter mount has a 22 mm female / 15 mm male end to connect to the breathing system and 15 mm female end to connect to the endotracheal tube or laryngeal mask.

Packing

- EO Sterile/ Disposable/ Individual Packed.
- Master Carton of 100/200 pcs.

Gross: 5.5/6.4kg

650 x 310 x 200mm
660 x 320 x 380mm

Conforming to ISO 9360

Sterimed HME Filter

SS 752

-  HME Filter
-  HME Filtro
-  Filtro HME
-  HME Filtre

Packing

- Individually Blister Packed.
- Master Carton of 100 pcs (Adult).
- Master Carton of 125 pcs (Paediatric).

Gross: 4.8/4.9kg

430 x 380 x 330mm

- Used in mechanically ventilated and laryngectomy patients to heat and moisturize the air and help prevent complications that arise when patients lose the ability to breathe through their nose and upper airway. Captures heat and moisture on expiration and returns it to the patient in inspiration.
- Suitable for spontaneously breathing patients with a tracheostomy tube.
- Electrostatic filter with 99.99% filtration capacity.
- Lightweight, compact design reduces circuit weight.
- Low resistance to flow reduces work of breathing.
- ISO standard 15 mm and 22 mm fitting connects to breathing circuit.
- Supplied clean and individually packaged.
- Available in adult and paediatric options.

Sterimed Oxygen Mask

SMD 704

- Oxygen Mask
- Máscara De Oxígeno
- Máscara de oxigênio
- Masque d'oxygène

- Used for efficient oxygen administration to patient
- Made from soft, non-toxic, medical grade PVC
- Elastic strap and aluminum nose clip for proper adjustment of mask
- Multi-channel tube ensures regular supply of oxygen even if the tube is accidentally kinked
- Proximal end of tube provided with universal connector for easy connection with oxygen source

Packing

- Non- Sterile, individually packed in a polybag.
- Box of 20; Master Carton of 200.

Gross: 22kg (Adult) 740 x 425 x 425mm

SIZES	TUBE LENGTH

Sterimed Thoracic Trocar Catheter

SMD 1001

- Thoracic Trocar Kateter
- Catéter Trocar Torácica
- Trocar torácica Cateter
- Thoracique trocarts catheter

- Used for rapid non-operative plueral and chest drainage
- Made from non-toxic, medical grade PVC
- Catheter is snugly fixed over the trocar, and provided with large smooth eyes for efficient drainage
- Smooth taper shape tip
- Markings at 5, 10, 15 and 20cm from the distal end to measure depth of placement
- Proximal end fitted with taper shape connector for easy connection to drainage bottle/bag

Packing

- Sterile, individually packed in peelable pouch pack.
- Box of 10; Master Carton of 100.

Breathing Exerciser

SS 1031

- Berolahraga Pernapasan
- Ejercitador Respiratorio
- respiração Exerciser
- respiration exerciseur

- Used as a breathing exerciser to increase lung capacity in patients with decreased lung function
- Made from rigid, non-toxic medical grade PVC
- Specially designed with 3 stage chambers to provide more efficient exercise to patient at a step up basis
- Device comprises a base and a central part with a 3 stage chamber, each containing spheres of different sizes, weight and colour
- Provides lung exercise on a step-up basis, as the spheres rise proportionately to the breathing effort exerted by the patient
- Can be dis-assembled into parts for cleaning and disinfection
- Non-sterile

Packing

- Sterile / Disposable / Individual Printed Box Packing.
- Box of 1/Master Box of 50.

Gross: 10.5kg approx.

660 x 380 x 420mm

Colour Code	Green	Blue	Black	White	Green	Orange	Red	Yellow

A Study was conducted by a research team of **DOW CORNING, USA** to check the effects and efficacy of Silicon Elastomer Coating on **STERIMED PVC NASOGASTRIC TUBES**.

The results indicated an astounding fall of almost 83% in the coefficient of friction which clearly indicates that elastomer coated nasogastric tubes will cause much less trauma and tissue damage while intubation.

A further study was conducted to check the behavior of elastomer coating in acidic conditions similar to those in the alimentary canal.

Results showed that over a period of time, the coefficient of friction increased in case of uncoated tubes whereas the coated tubes maintained a consistently low coefficient of friction over 30 days.

The efficacy and inertness of the product remained intact over the 30 days trial. The effectiveness of the coating not only reduces tissue damage during intubation but also reduces damage and trauma during removal.

SUMMARY OF HEALTH DATA, MSDS AND REGULATORY PROFILE FOR SILICON ELASTOMER COATING

FALL IN COEFFICIENT OF FRICTION BY OVER 80%

PVC sheet coated with Silicon Elastomer - 0.1N Acetic Acid, initial cof, final cof, 2D, 5D, 10D, 30D

	Silicon Elastomer Coated	Non Coated
0 Days	0.33	1.94
2 Days	0.36	1.86
5 Days	0.28	2.04
15 Days	0.36	2.22
30 Days	0.31	3.14

- Coefficient of Friction was measured based on the method and instrument technique developed by Dow Corning internally
- Compounded PVC granules were given by Sterimed and was molded into sheet at Dow Corning Daman facility

Steripore / Steripore+

Microporous Tape

SS 106

-  Tape Mikro
-  Cinta Microporosa
-  Tape microporosa
-  bande microporeux

A

Soft and Hypoallergenic

B

Easy to cut and tear

C

Suits contoured surfaces

D

Highly porous – allowing the skin to breathe

E

Firm yet easy to remove

F

Suitable for sensitive skin

- Used for fixation of dressing, tubing, osteomy pouches etc on patients
- Made from micro-porous non-woven fabric
- Uniformly coated with hypoallergenic, non-toxic, non-irritant adhesive
- Easy to peel off without causing discomfort or skin irritation
- High porosity allows skin to breathe, and high resistance to water and vapour prevents the tape from peeling off
- Suitable on sensitive body parts, for infants and adults
- Manufactured as per British Pharmacopia (BP) guidelines

GYNAECOLOGY & PAEDIATRICS

Sterimed Manual Vacuum Aspiration (MVA Kit)

Double Valve

SMD 805

-  Aspirasi Vacuum Manual (MVA Kit)
-  La Aspiración Manual Endouterina (Ameu Kit)
-  Manual de Aspiração a vácuo (MVA Kit)
-  Aspiration manuelle (MVA Kit)

- Used for Manual Aspiration procedure (Medical termination of pregnancy)
- Made from medical grade polypropylene
- Kit consists of MTP Syringe, Karman Cannula, lubricating oil
- The MTP Syringe provides high vacuum suction during abortion procedure
- Smooth cannula with rounded tip and smooth eyes for atraumatic cannulation
- Available in single valve and double valve syringe
- Karman Cannula SMD 800 available separately as well in size 4mm - 12mm

Packing

- Sterile, individually packed in peelable pouch pack.
- One Pack of Double Valve Syringe consist of: 1 Double Valve Syringe, Connectors, Lubricating Oil and 4, 5, 6, 7, 8, 9, 10, 12mm Cannula
- Complete Pack is finally Packed in a Box.
- Carton of 35 Box

Gross:16.7kg

680 x 305 x 650mm

Sterimed Infant Mucus Extractor

SMD 803

-  Infant Mucus Extractor
-  Aspirador Infantil De Mucosidades
-  Infant Muco Extractor
-  Infant mucus Extractor

- Used for aspiration of secretion from oropharynx in newly born babies
- Made from non-toxic, medical grade PVC
- Transparent chamber for visual examination of the content
- Round open tip for atraumatic intubation, and proximal end with funnel connector for easy connection to the suction equipment
- Optional: available with filter and without filter models

Packing

- Sterile, individually packed in peelable pouch pack.
- Box of 25; Master Carton of 250.

Gross: 10.100kg

790 x 480 x 280mm

SIZES	
Chamber Capacity	25ml
Catheter Size	10 FG

Sterimed Umbilical Cord Clamp

SMD 801

- Umbilical Cord Clamp
- Abrazadera Cordón Umbilical
- Cordão Umbilical Braçadeira
- Pince cordon ombilic

- Used for clamping the umbilical cord of newly born babies
- Made from non-toxic, medical grade PVC
- Permanent locking system to prevent clamp reopening
- Finger grip to facilitate easy holding and locking of the clamp

Packing

- Sterile, individually packed in peelable pouch pack.
- Box of 100; Master Carton of 2000.

Gross: 10.5kg

670 x 300 x 480mm

Sterimed Umbilical Catheter

SMD 1103

- Kateter Umbilical
- Catéter Umbilical
- cateter umbilical
- cathéter ombilical

SIZES

Total Length - 40cm

SIZES					
FG	4	5	6	8	10
Colour Code	Red	Grey	Green	Blue	Black

- Used to access the umbilical vessels of pre-mature or newly - born babies
- Made from non-toxic, medical grade PVC
- Smooth round tip for atraumatic insertion and well-finished surface facilitate smooth passage in the vein
- Markings at every cm to ascertain depth of insertion, radio opaque line ascertain position during scans
- Proximal end provided with Luer female connector for easy connection to the I.V. therapy equipment

Packing

- Sterile, individually packed in peelable pouch pack.
- Box of 100; Master Carton of 1000

Gross: 8.5kg

680 x 305 x 650mm
