ZARYS International Group is a company with 29-year experience in the medical device industry. Since the foundation in 1989 ZARYS has surmounted a variety of business, trading and economic upheavals in becoming the market leader in healthcare distribution in Poland.

ZARYS offers a wide range of products including dressings, surgical drapes, examination gloves, disposable medical devices for urology, gynecology, oxygen therapy and many other items. The company is still extending its product list in order to meet new market needs.

What distinguishes ZARYS from the competitors is strong ethics and continuous search for new solutions. In order to meet our clients' expectations we are constantly reviewing our product range. All of our devices are selected very carefully with great attention paid to current needs, quality convenient availability. The company has the pleasure to cooperate with highly qualified health care specialists, who share with us their expertise and understanding of the latest trends in clinical practice.

We offer products under our own brand and distribute the world's top manufacturers' medical devices. Our team believe that maintaining fair and reliable relationships with our international partners is the key to turn a business opportunity into a majorsuccess story, therefore we regularly visit our customers and suppliers in their own countries and handle challenges together.

Our values, strategies and comprehensiveness guarantee successful and satisfactory cooperation.

MEDICAL GLOVES pp.6-11

- 8 nitrile examination gloves **easyCARE nitrile** powder-free
- 9 nitrile examination gloves **easyCARE nitrile** pink, powder-free
- 9 nitrile examination gloves **easyCARE nitrile** black, powder-free
- 10 latex examination gloves **easyCARE latex** powdered
- 10 latex examination gloves **easyCARE latex PF** powder-free
- 11 vinyl examination gloves **easyCARE vinyl** powdered
- 11 vinyl examination gloves **easyCARE vinyl PF** powder-free

BASIC MEDICAL DEVICES pp.12-53

basic disposable equipment

- 14 injection needle **dispoFINE**, sterile
- 15 safety injection needle **dispoGUARD**, sterile
- 15 pressure-activated safety lancet **safeLANCE**, sterile
- 17 single-use syringe, 2-part, luer **duoNEX**, sterile
- 17 single-use syringe, 3-part, luer **dicoNEX**, sterile
- 18 single-use syringe, 3-part, luer-lock **dicoNEX**, sterile
- 18 single-use catheter syringe, 3-part **dicoNEX**, sterile
- 19 single-use catheter syringe, 3-part **dicoNEX**, sterile
- 19 tuberculin syringe **dicoTUBER**, sterile
- 20 insulin syringe **dicoSULIN**, sterile
- 20 insulin pen needle **dispoSULIN**, sterile
- 21 stomach tube/duodenal tube, sterile
- 22 feeding tube, sterile
- 22 suction catheter, sterile
- 23 suction catheter with vacuum control, sterile
- 23 suction catheter frozen surface, phthalate-free, sterile
- 24 vaginal speculum cusco type, sterile
- 24 withdrawal cannula **dicoSPIKE**, sterile
- 25 umbilical cord clamp, sterile
- 25 cervical brush standard, sterile
- 25 cervical brush special, sterile

infusion therapy

- 26 infusion set **easyFLOW IS**, sterile
- 27 extension tube for infusion pump, sterile
- 27 transfusion set **easyFLOW TS**, sterile
- 28 3-way stopcock, sterile
- 28 3-way stopcock with extension tube, sterile
- 29 needle-free valve, sterile
- 29 cannula stopper, sterile

urological catheters and urine bags

- 30 foley catheter 2-way, silicone-coated latex, sterile
- 31 foley catheter 3-way, silicone-coated latex, sterile
- 31 foley catheter 2-way, 100% silicone, sterile
- 32 foley catheter 3-way, 100% silicone, sterile
- 32 foley catheter with tiemann tip, silicone-coated latex, sterile
- 33 pezzet catheter, silicone-coated latex, sterile
- 33 nelaton catheter, sterile
- 34 tiemann catheter, sterile
- 34 urine bag hanger, non-sterile
- 34 urine bag, sterile
- 35 urine bag with sample port, sterile
- 35 samples taking urine bag, sterile

oxygen therapy

- 36 oxygen mask with tubing, sterile
- 37 nebulizer mask with tubing, sterile
- 37 non-rebreather mask with tubing, sterile
- 38 multi-vent mask with tubing, sterile
- 38 nasal oxygen cannula, sterile
- 39 oxygen tubing, sterile
- 39 nebulizer with mouthpiece and tubing, sterile
- 39 nebulizer with corrugated tube, mouthpiece and tubing, sterile

anaesthesia products

- 40 laryngeal mask PVC, sterile
- 41 laryngeal mask silicone, sterile
- 41 endotracheal tube uncuffed, sterile
- 42 endotracheal tube cuffed, sterile
- 42 reinforced endotracheal tube cuffed, sterile
- 43 endotracheal tube holder, sterile
- 43 dual-limb breathing circuit, sterile
- 44 catheter mount/double swivel connector, sterile
- 44 intubation stylet, sterile
- 44 air cushion anaesthetic mask, non-sterile
- 45 tracheostomy tube cuffed/uncuffed, sterile
- 45 oropharyngeal airway/guedel airway, sterile

general surgery

- 46 surgical suction tube, sterile
- 47 surgical suction cannula yankauer, sterile
- 47 surgical suction set, sterile
- 48 T-KEHR silicone tube, sterile

other disposable products

- 49 latex-free tourniquet, non-sterile
- 49 automatic tourniquet, non-sterile
- 50 ID wristband, non-sterile
- 50 dental brush with suction, non-sterile
- 50 oral swab, non-sterile
- 51 entrance mat, non-sterile
- 51 microscope slides, non-sterile
- 52 wooden tongue depressor
- 52 PE gloves, non-sterile
- 52 PE apron, non-sterile
- 53 **gripSAFE** reusable safe shaft for surgical blades

DRESSINGS pp.54-79

gauze and non-woven dressings

- 56 | **GAZA lux** dressing gauze, non-sterile
- 57 | **GAZA lux** cutting gauze, non-sterile
- 57 | **GAZA lux S** cutting gauze, sterile
- 58 | **KOMPRI lux** gauze swab, non-sterile
- 59 | **KOMPRI lux S** gauze swab, sterile
- 60 | **SERVI lux** gauze lap sponge, non-sterile
- 60 | **SERVI lux S** gauze lap sponge, sterile
- 61 | **NONVI lux** non-woven swab, non-sterile
- 61 | **NONVI lux S** non-woven swab, sterile
- 62 | **NONVI lux S** with Y-incision, non-woven swab, sterile
- 62 | **MULTIabsorb** ABD pad, non-woven & cellulose, non-sterile
- 62 | **MULTIabsorb S** ABD pad, non-woven & cellulose, sterile
- 63 | **elastoLUMENAL** eye pad, superabsorbent, multi-layer, non-sterile
- 63 | **elastoLUMENAL S** eye pad, superabsorbent, multi-layer, sterile

adhesive tapes and dressings

- 64 | **SENSIplast** adhesive fabric tape
- 65 | **PLASTIplast** adhesive fabric tape
- 65 | **SOFTplast** adhesive non-woven tape
- 66 | **SILKplast** adhesive silk tape
- 66 | **FILMplast** adhesive PE tape
- 67 | **POREplast** adhesive perforated non-woven tape
- 67 | **elastopor** adhesive non-woven dressing tape
- 68 | **NONVIplast** non-woven plaster with dressing
- 68 | **FABRIplast** fabric plaster with dressing

special purpose dressings

- 69 | **elastopor STERIL** non-woven dressing with absorbent pad, self-adhesive, sterile
- 70 | **elastopor STERIL D** non-woven swab with absorbent pad, incision and O-hole, self-adhesive, sterile
- 70 | **elastopor IV** non-woven IV cannula dressing, self-adhesive, sterile
- 71 | **elastoDERM** foil dressing, self-adhesive, sterile
- 72 | **elastopor EYE** non-woven eye dressing with absorbent pad, self-adhesive, sterile
- 72 | **elastoNASAL** non-woven nasal cannula fixation plaster, self-adhesive, non-sterile
- 73 | **paraffINET** paraffin gauze dressing, sterile

dressing fixation

- 74 | **elastoBAND BASIC** knitted supporting bandage, non-sterile
- 75 | **elastoBAND FLEX** elastic supporting bandage woven, non-sterile

stiffening dressings

- 76 | **orthoBAND** P.O.P. bandage
- 77 | **orthoSYNTHETIC** orthopedic padding, synthetic, polyester
- 77 | **orthoNATURAL** orthopedic padding, natural, viscose

additional products

- 78 | **alkoCLEAN** gauze pad moistened with 70% isopropyl alcohol
- 79 | **thermCARE** rescue blanket, silver-gold, non-sterile
- 79 | **elastoSLING** triangular sling, non-sterile

MEDICAL CLOTHING pp.80-99

surgical clothing and medical gowns

- 82 | surgical shirt, long-sleeved, PP non-woven, non-sterile
- 83 | surgical shirt, short-sleeved, PP non-woven, non-sterile
- 83 | surgical shirt, short-sleeved, PP non-woven, non-sterile
- 83 | surgical trousers, with ties, PP non-woven, non-sterile
- 84 | surgical suit, short-sleeved shirt + trousers, SMS non-woven, non-sterile
- 85 | medical gown with knitted cuffs, PP non-woven, non-sterile
- 85 | medical gown with elastic cuffs, PP non-woven, non-sterile

caps and protective masks

- 86 | medical bouffant cap, non-woven
- 86 | **DONA** medical bouffant cap
- 87 | **LILI** medical cap with rubber
- 87 | **POLA** medical cap with rubber
- 87 | **SOL** medical cap with ties
- 88 | **ABI** medical cap with ties
- 88 | **NINO** medical cap
- 88 | **KOKO long** medical cap with snood
- 89 | **DORA long** medical cap with snood
- 89 | medical mask with ties or with earloops, non-sterile

patient clothing

- 90 | patient's gown, tied up, SMS non-woven, non-sterile
- 91 | patient's gown, Y-neck, PP non-woven, non-sterile
- 91 | patient's gown, V-neck, Spunlace non-woven, non-sterile
- 91 | patient's gown, for delivery, SMS non-woven, non-sterile
- 92 | colonoscopy boxers, SMS non-woven, non-sterile
- 92 | colonoscopy boxers, PP non-woven, non-sterile
- 93 | gynecological skirt, PP non-woven, non-sterile
- 93 | examination underpants, single-use, non-sterile

shoe covers and slippers

- 94 | shoe covers, non-sterile
- 95 | shoe covers, calf-high, non-sterile
- 95 | non-woven slippers, single-use, non-sterile

bedclothes and absorbent underpads

- 96 | disposable medical pillow case, non-sterile
- 96 | disposable medical quilt cover, non-sterile
- 97 | disposable medical bedding set, non-sterile
- 97 | absorbent underpad, single-use, non-sterile
- 98 | disposable medical bed sheet, non-sterile

138	fluid collection pouch, two-chamber
139	fluid collection pouch, cone-shaped, with outlet tip
139	absorbent drape
139	elastoFILM incise film

Medical gloves

EXAMINATION GLOVES are indicated for transient use during medical examination, diagnostic and therapeutic procedures in order to prevent the risk of transferring biological material to the patient, as well as to protect healthcare professionals from acquiring infections from patients. Gloves are subjected to the standards harmonised with the Medical Devices Directive 93/42/EEC and Personal Protective Equipment Directive 89/686/EEC. ZARYS's range of examination gloves - easyCARE includes latex, vinyl and nitrile gloves. All of our gloves are compliant with the international standards, which guarantees high protection level.

LATEX GLOVES

Made of natural rubber, latex gloves are considered the best protective barrier against bloodborne pathogens and some of the chemical substances. Moreover, latex gloves are highly resistant and flexible, which ensures comfort of using. They conform perfectly to the hand to minimize its fatigue. They are a perfect choice for professionals who appreciate both durability and comfort.

NITRILE GLOVES

Made of synthetic, acrylonitrile butadiene rubber, nitrile gloves are an alternative for latex gloves. They do not contain rubber proteins therefore they do not cause skin irritation. easyCARE nitrile powder-free examination gloves are top quality products which highly resist permeation by chemicals, viruses and bacteria. Thin walls and textured finger surface enhance grip and guarantee excellent tactile sensitivity.

VINYL GLOVES

easyCARE vinyl examination gloves are an optimal combination of practicality and cost-effectiveness. They are made of polyvinyl chloride. The gloves are a perfect solution for those individuals who are sensitive to latex proteins and latex. They are characterized by good resistance to oil, ozone, grease and acids. Vinyl ensures a perfect fit to the hand. The material guarantees high comfort of use. It is valued for its anti-static properties and high elasticity. easyCARE vinyl and vinyl PF do not contain phthalates.

nitrile examination gloves

easyCARE nitrile powder-free, a'100

features:

- comply with MDD 93/42/EEC (CE class I)
- comply with EN455
- comply with ASTM D6319
- comply with PPE Directive 89/686/EEC category I
- approved for food contact
- protection against chemicals, viruses and bacteria
- latex-free to eliminate the risk of allergies
- powder-free to eliminate powder-induced irritation
- AQL 1.5
- chlorinated donning side for comfortable fit
- thin walls for great sensitivity
- beaded cuffs for easy donning
- textured at fingers to enhance grip
- resistant to tearing
- no sagging or slipping off
- ambidextrous
- non-sterile
- colour: blue
- colour-coded packaging for easy size recognition
- 100 gloves by weight
- available in sizes XS-XL

BESTSELLER

nitrile examination gloves

easyCARE nitrile powder-free, a'200

features:

- comply with MDD 93/42/EEC (CE class I)
- comply with EN455
- comply with ASTM D6319
- comply with PPE Directive 89/686/EEC category III
- approved for food contact
- protection against chemicals, viruses and bacteria
- latex-free to eliminate the risk of allergies
- powder-free to eliminate powder-induced irritation
- AQL 1.0
- chlorinated donning side for comfortable fit
- polymer-coated working side for higher durability
- thin walls for great sensitivity
- beaded cuffs for easy donning
- textured at fingers to enhance grip
- resistant to tearing
- no sagging or slipping off
- ambidextrous
- non-sterile
- colour: blue
- colour-coded packaging for easy size recognition
- 200 gloves by weight
- available in sizes XS-XL

nitrile examination gloves

easyCARE nitrile pink, powder-free

features:

- comply with MDD 93/42/EEC (CE class I)
- comply with EN455
- comply with PPE Directive 89/686/EEC category I
- approved for food contact
- protection against chemicals, viruses and bacteria
- latex-free to eliminate the risk of allergies
- powder-free to eliminate powder-induced irritation
- AQL 1.5
- chlorinated donning side for comfortable fit
- thin walls for great sensitivity
- beaded cuffs for easy donning
- textured at fingers to enhance grip
- resistant to tearing
- no sagging or slipping off
- ambidextrous
- non-sterile
- colour: pink
- colour-coded packaging for easy size recognition
- 100 gloves by weight
- available in sizes XS-L

nitrile examination gloves

easyCARE nitrile black, powder-free

features:

- comply with MDD 93/42/EEC (CE class I)
- comply with EN455
- comply with PPE Directive 89/686/EEC category I
- approved for food contact
- protection against chemicals, viruses and bacteria
- latex-free to eliminate the risk of allergies
- powder-free to eliminate powder-induced irritation
- AQL 1.5
- chlorinated donning side for comfortable fit
- thin walls for great sensitivity
- beaded cuffs for easy donning
- textured at fingers to enhance grip
- resistant to tearing
- no sagging or slipping off
- ambidextrous
- non-sterile
- colour: black
- colour-coded packaging for easy size recognition
- 100 gloves by weight
- available in sizes XS-XL

latex examination gloves

easyCARE latex powdered

features:

- comply with MDD 93/42/EEC (CE class I)
- comply with EN455
- comply with PPE Directive 89/686/EEC category I
- protection against chemicals, viruses and bacteria
- approved for food contact
- AQL 1.5
- lightly powdered with cornstarch to facilitate donning and prevent skin
- drying usually connected with talcum powder
- low protein content
- beaded cuffs for easy donning
- smooth surface
- resistant to tearing
- no sagging or slipping off
- ambidextrous
- non-sterile
- colour: natural latex
- colour-coded packaging for easy size recognition
- 100 gloves by weight
- available in sizes XS-XL

latex examination gloves

easyCARE latex PF powder-free

features:

- comply with MDD 93/42/EEC (CE class I)
- comply with EN455
- comply with PPE Directive 89/686/EEC category I
- protection against chemicals, viruses and bacteria
- approved for food contact
- AQL 1.5
- powder-free to eliminate powder-induced irritation
- low protein content
- polymer-coated
- beaded cuffs for easy donning
- textured surface
- resistant to tearing
- no sagging or slipping off
- ambidextrous
- non-sterile
- colour: natural latex
- colour-coded packaging for easy size recognition
- 100 gloves by weight
- available in sizes XS-XL

vinyl examination gloves

easyCARE vinyl powdered

features:

- comply with MDD 93/42/EEC (CE class I)
- comply with EN 455
- comply with PPE Directive 89/686/EEC category I
- approved for food contact
- AQL 1.5
- beaded cuff for easy donning
- smooth surface
- no slipping off
- ambidextrous
- DEHP-free
- non-sterile
- colour: transparent white
- colour-coded packaging for easy size recognition
- 100 gloves by weight
- available in sizes XS-XL

11

vinyl examination gloves

easyCARE vinyl PF powder-free

features:

- comply with MDD 93/42/EEC (CE class I)
- comply with EN 455
- comply with PPE Directive 89/686/EEC category I
- approved for food contact
- AQL 1.5
- beaded cuff for easy donning
- smooth surface
- no slipping off
- ambidextrous

injection needle

dispoFINE sterile

features:

- sheath and the hub made of polypropylene
- thin walls assure adequate stream pace
- tip sharpened in three surfaces (back cut)
- bevel type: LB/BL standard long bevel
- small injection and sliding force
- surface of the tubes covered with a sliding agent (silicone)
- glued needle elements to prevent their separation (glue - epoxy resin)
- hubs coloured in accordance with the ISO code allowing fast recognition of the needle size
- latex-free
- DEHP-free
- non-pyrogenic, non-toxic
- EO sterilized
- individual packaging: blister-pack

indication:

- device designed for intravenous, intramuscular and hypodermic injections

pressure-activated safety lancet

safeLANCE sterile

features:

- easy to use, minimizes unpleasant feelings
- special construction allows for stable and secure grip
- lancet tip is automatically inserted into the finger pad and then retracted so that the needle is not visible before or after puncturing
- correctly matched size of the lancet allows to get optimal amount of blood with minimal patient's pain
- optimal contact surface of the lancet allows for precise application at the desired spot and correct puncture depth
- design ensures safety for medical personnel and patient by eliminating accidental puncture and infection
- perfect guidance of the lancet needle inside the housing reduces vibration, thus decreases patient's pain and prevents damage to the skin tissue
- single-use
- latex-free
- DEHP-free
- sterilized by radiation

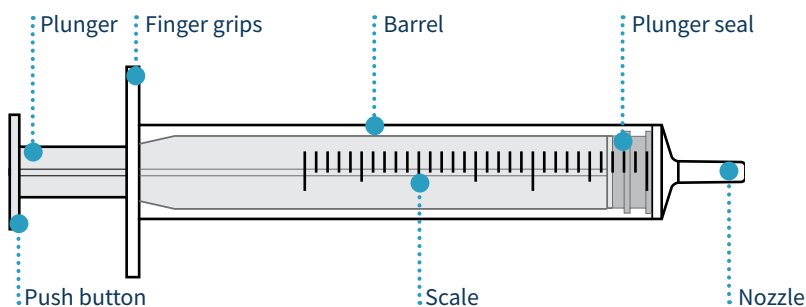

indication:

- capillary blood sampling from the fingertip or ear flap for testing glucose level, gasometry, acid-base balance, lactate concentrations

construction of the syringe

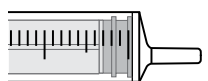

**GET TO KNOW
OUR SYRINGES**

nozzle types:

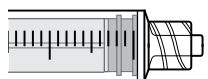

Luer slip, centric

the tip of the syringe is pushed into the hub of the needle or other device (e.g. catheters) and twisted. It allows to remove the connection immediately if necessary

Luer slip, eccentric

the eccentric location of the tip is used in procedures involving the administration of drugs and fluids where closer proximity to skin is necessary

Luer-lock

designed to secure connection between the syringe and the device (needle, tube, catheter, stopcock, etc.). The tip is equipped with thread to screw in the syringe to prevent disconnection.

catheter tip 90°

the type of connection used for rinsing (cleaning) catheters, stomach tubes and feeding purposes

catheter tip 45°

nozzle cut at 45 degrees increases the lumen surface

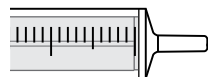

insulin and tuberculin syringes

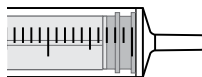

special design of the plunger seal reduces the drug/liquid residues

duoNEX

syringe type:

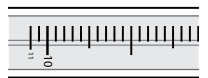

2-part - without plunger seal

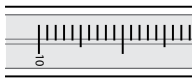

3-part - with plunger seal

scale type:

duoNEX sterile

features:

- transparent barrel made of polypropylene allowing perfect visualization of the content
- green contrasting plunger
- luer nozzle
- smooth plunger sliding
- limitation flange securing against accidental removal of the plunger
- name of the syringe and manufacturer's logo placed on the barrel
- extended graduation
- clear, legible and permanent black graduation facilitating dosage, adequately:
 - every 0.1 ml for the volume of 2 ml
 - every 0.2 ml for the volume of 5 ml
 - every 0.5 ml for the volume of 10 ml
 - every 1 ml for the volume of 20 ml
- single-use
- non-pyrogenic, non-toxic
- DEHP-free
- latex-free
- EO sterilized
- packaging: 1 pc./blister-pack, 70/100 pcs/box

indication:

- 2-piece syringe for intravenous, intramuscular and hypodermic injections
- indicated for drug withdrawal/application and body fluids samples collection

insulin pen needle

dispoSULIN sterile

features:

- made of polypropylene, polyethylene and stainless steel
- triple-point needle blade allows easy and atraumatic skin penetration
- covering the needle with silicone lubricant reduces resistance during injection
- thin walls of the needle ensure easy flow of the drug and the right flow rate
- colored cap and the paper cover of the packaging make it easy to quickly recognize the size of the needle
- available in various sizes, allowing you to adapt to individual needs
- universal, compatible with all pen models
- single-use
- non-pyrogenic
- latex-free
- DEHP-free
- EO sterilized
- intermediate packaging: 100 pcs

indication:

- for subcutaneous injection
- dedicated for use with pre-filled pens (insulin pens)

stomach tube/duodenal tube

sterile

features:

- made of PVC
- made of material resistant to twisting and bending
- atraumatic, slightly rounded closed tip
- four side holes with soft edges
- colour-coded connectors for size recognition, numerical size identification on the packaging
- available in 4 lengths: 800 mm, 1000 mm, 1250 mm and 1500 mm
- single-use
- latex-free
- contains phthalates
- EO sterilized
- individual packaging: paper-foil

indication:

- to be inserted through the nose or oral cavity into the stomach or duodenum
- drainage of stomach/intestinal content
- decompression of the stomach (air or food evacuation)
- gastric lavage
- taking samples of stomach content
- control of bleeding from the upper section of digestive tract
- evaluation of secretory function and administration of drugs, fluids and/or food content into the stomach or duodenum

feeding tube

sterile

features:

- made of material resistant to twisting and bending
- transparency of the drain allows visual inspection
- an atraumatic, slightly rounded closed tip facilitates insertion of the catheter
- drain equipped with two alternate end holes with gently stretched edges
- connector compatible with the conical end of the luer syringe
- integrated stopper allows the tube to be closed tightly
- colour-coded connectors for size recognition, numerical size identification on the packaging
- 3 depth markers placed on the drain allow verification of the correct placement of the tube after insertion
- individually packed straight
- single-use
- latex-free
- EO sterilized
- individual packaging: paper-foil

indication:

- device introduced through the nose or mouth of the patient for enteral feeding

withdrawal cannula

dicoSPIKE sterile

features:

- ergonomic design enables easy handling
- hermetic safety snap cap protects from contamination
- possibility of collecting drugs from packages of various capacities
- fully hermetic and safe connection due to sharp spike
- integrated air filter protects from microbial contamination
- compatible with luer and luer-lock connectors
- single-use
- latex-free, PVC-free
- DEHP-free
- non-pyrogenic
- EO sterilized
- individual packaging: paper-foil

indication:

- the device designed for drug withdrawal from multi-dose vials and bottles of various volumes

umbilical cord clamp

sterile

features:

- made of polypropylene
- safe clamping teeth with rounded edges do not cut the umbilical cord
- serrated clamping surface of the arms stabilize the clamp on the umbilical cord, after closing it is not possible to open the clamp again
- lock catch prevents accidental opening
- universal size
- single-use
- non-pyrogenic
- latex-free
- does not contain phthalates harmful to the child's health
- EO sterilized
- individual packaging: blister-pack

indication:

- the device is designed for clamping the umbilical cord of a newborn in a labour ward in order to close the lumen of the umbilical blood vessels after cutting it off of the placenta

ref.	colour	intermediate packaging	bulk packaging
ZDPB	white	50 pcs	50 x 50 pcs

cervical brush

standard sterile

features:

- straight, allows for obtaining samples from the cervical canal
- soft bristle tips to prevent cell samples from getting damaged
- optimal outreach thanks to the long handle
- single-use
- latex-free
- DEHP-free
- EO sterilized
- individual packaging: paper-foil

indication:

- obtaining cell samples from the cervix in smear tests

ref.	type	intrmediate packaging	bulk packaging
SC-001	standard	100 pcs	10 x 100 pcs

cervical brush

special sterile

features:

- made of polyethylene
- broom type, allows for obtaining samples from the cervix, cervical canal and transformation zone
- soft bristle tips to prevent cell samples from getting damaged
- optimal outreach thanks to the long handle
- single-use
- latex-free
- DEHP-free
- EO sterilized
- individual packaging: paper-foil

indication:

- obtaining cell samples from the cervix, cervical canal and transformation zone in smear tests

ref.	type	intrmediate packaging	bulk packaging
SC-002	special/ broom	100 pcs	10 x 100 pcs

INFUSION THERAPY

WWW.ZARYS.COM

infusion set

easyFLOW IS sterile

features:

- made of high quality latex-free materials
- sharp spike of the drip chamber with anti-slip surface that guarantees tight and reliable connection with fluid containers
- air-vent with anti-bacterial filter and colored (blue) flap
- flexible droplet chamber, size 6 cm, equipped with additional pressure wings to facilitate insertion into containers with liquids
- dropper: 20 drops = 1 ml +/- 0.1 ml, filter 15 µm protecting against larger particles
- min. 150 cm - long, soft, flexible drain, universal luer-lock drain tip
- name of the manufacturer placed on the roll clamp
- precise roll clamp with integrated spike holder which facilitates product disposal after use
- roll clamp equipped with holder for securing the drain's position
- both tips of the device additionally secured with protective caps
- non-pyrogenic, non-toxic
- single-use
- latex-free
- EO sterilized
- blister pack type with a colored code (blue) identifying the instrument type

indication:

- device for fluid transfer in infusion therapy

ref.	type	intermediate packaging	bulk packaging
IS	standard	25 pcs	10 x 25 pcs
IS-BF	phthalate-free	25 pcs	10 x 25 pcs

extension tube for infusion pump

sterile

features:

- made of PVC
- available in transparent and amber type
- 45 cm or 150 cm long drain
- diameter of the drain - outer: 2.4 mm; inner: 1.24 mm
- luer-lock tips - male and female
- amber colour of the drain protects the photosensitive drugs against UV radiation
- latex-free, DEHP-free
- non-pyrogenic, non-toxic
- single-use, EO sterilized
- individual packaging: blister-pack

indication:

- device indicated for infusion therapy
- used to extend infusion line

ref.	tube length	type	intermediate packaging	bulk packaging
P450-BF	45 cm	phthalate-free	50 pcs	24 x 50 pcs
P1500-BF	150 cm	phthalate-free	50 pcs	24 x 50 pcs

amber type

ref.	tube length	type	intermediate packaging	bulk packaging

transfusion set

easyFLOW TS sterile

features:

- made of high quality latex-free materials
- sharp spike of the drip chamber with anti-slip surface that guarantees tight and reliable connection with fluid containers
- air-vent with anti-bacterial filter and red flap
- pliable drip chamber, dropper: 20 drops = 1 ml +/- 0.1 ml, special 200 µm blood filter
- min. 150 cm-long, soft, flexible drain, universal luer-lock drain tip, precise roll clamp
- both tips of the device additionally secured with protective caps
- non-pyrogenic, non-toxic
- single-use, EO sterilized
- individual packaging: paper-foil

indication:

- administration of blood and blood products

ref.	type	intermediate packaging	bulk packaging
TS	standard	25 pcs	10 x 25 pcs
TS-BF	phthalate-free	25 pcs	10 x 25 pcs

3-way stopcock

sterile

features:

- made of polycarbonate
- transparent design
- clear optical identifier of open/close position (marked flow directions), operating in 360 degrees
- consistent, straight flow channels and an optimal internal diameter ensure correct pressure measurement
- rotating luer-lock
- all inlets protected with stoppers
- single-use
- non-pyrogenic, non-toxic
- resistant to lipids
- latex-free
- DEHP-free
- EO sterilized
- individual packaging: paper-foil

indication:

- device designed for managing the flow of infusion fluids during administration
- allows to switch the infusion flow path
- for blood pressure monitoring, direct drug / fluid supply

ref.	colour	intermediate packaging	bulk packaging
KT-002	blue	50 pcs	20 x 50 pcs

3-way stopcock

with extension tube sterile

features:

- three-way stopcock with an extension tube of various lengths (from 7 cm to 100 cm)
- transparent design
- rotating luer-lock
- clear optical identifier of open/close position (marked flow directions)
- made of polycarbonate
- all inlets protected with stoppers
- single-use
- non-pyrogenic, non-toxic
- resistant to lipids
- latex-free
- DEHP-free
- EO sterilized
- individual packaging: paper-foil

indication:

- device designed for managing the flow of infusion fluids during administration
- allows to switch the infusion flow path
- for blood pressure monitoring, direct drug/fluid supply

KTP-100	100 cm	50 pcs	20 x 50 pcs

needle-free valve

sterile

features:

- housing made of transparent material - polycarbonate
- high-quality silicone membrane allows multiple port injections
- flat injection surface - smooth and evenly ended port membrane that facilitates disinfection
- metal-free, suitable for MRI examination
- male connector of the transparent port is secured with a cap allowing for aseptic removal of the item from the packaging
- can be used for 7 days or 100 activations
- priming volume: 0.09 ml
- high flow rate: 350 ml/min
- withstands injection fluid pressure of 3 bars (44 PSI)
- withstands back pressure of 2 bars (29 PSI)
- latex-free
- DEHP-free
- EO sterilized
- individual packaging: paper-foil

indication:

- intended for closing infusion ports
- device intended for multiple, needle-free injections (liquid drug administration, blood sample taking)
- protects infusion lines from contamination and infection during infusion therapy
- does not require using safety caps
- dedicated for standard luer and luer lock tips

ref.	type	intermediate packaging	bulk packaging
PB-N	blue	100 pcs	20 x 100 pcs
PB-T	transparent	100 pcs	20 x 100 pcs

cannula stopper

sterile

features:

- construction allowing for precise and safe closing of standard ports
- LUER LOCK STOPPER with male tip
- COMBI STOPPER with male and female tip dedicated for securing luer lock tips in infusion and transfusion sets
- non-pyrogenic
- single-use
- latex-free
- DEHP-free
- EO sterilized
- individual packaging: foil-paper

indication:

- device designed for plugging of intravenous cannulas, ports and catheters
- to be used along with other devices during infusion therapy protecting from blood splits and infections

ref.	type	intermediate packaging	bulk packaging
KDKLL	luer lock	250 pcs	10 x 250 pcs
KDKC	combi	100 pcs	50 x 100 pcs

UROLOGICAL CATHETERS AND URINE BAGS

WWW.ZARYS.COM

foley catheter

2-way, silicone-coated latex, sterile

features:

- universal end of the catheter fits into standard connectors in urine bags
- made of soft and flexible latex, resistant to bending and twisting
- atraumatic, slightly rounded special tip facilitating insertion of the catheter
- tip with two side holes with soft rounded edges
- silicone-coated surface to allow for its atraumatic insertion
- easy to fill and to empty, tear-resistant balloons of various capacities
- rubber valve to ensure balloon tightness
- CH 6, CH 8, CH 10 size has a nylon guide to facilitate catheterization
- single-use
- DEHP-free
- device contains latex
- EO sterilized
- double packaging: internal - foil, external - paper-foil

indication:

- catheterization of the urinary bladder

urine bag hanger

non-sterile

features:

- made of strong and durable plastic
- special clamp prevents tube bending
- suitable for round and square bed frames
- latex-free
- DEHP-free

indication:

- hanging standard urine collection bags

ref.	packaging unit	bulk packaging
WNM01	50 pcs	4 x 50 pcs

urine bag

sterile

features:

- made of 0.22 mm thick, latex-free PVC (double wall)
- double sealed PVC to prevent spilling of fluids
- capacity 2000 ml
- effective inlet valve
- tight T-valve, can be easily operated with one hand
- connecting drain with universal tip, standard length 90 cm (other lengths available: 110, 130, 150 cm)
- drain made of material preventing its bending or twisting and allowing easy flow of urine
- precise, easy-to-read scale (every 100 ml)
- strengthened holes for hanging, matching standard hangers
- white back wall making urine easy to notice
- single-use
- latex-free
- EO sterilized
- individual packaging: foil

indication:

- 24-hour collection of urine and other body fluids

urine bag

with sample port sterile

features:

- capacity 2000 ml
- made of 0.40 mm thick PVC (double wall)
- self-tightening port for sample taking
- effective inlet valve
- tight T-valve, can be easily operated with one hand
- connecting drain with universal tip, standard length 120 cm (other lengths available: 90, 110, 130, 150 cm)
- drain made of material preventing its bending or twisting and allowing easy flow of urine
- precise, easy-to-read scale, graduated every 100 ml
- additional scale positioned diagonally which allows for reading capacities of 25, 50, 100, 150 ml
- strengthened holes for hanging, matching standard hangers
- white back wall making urine easy to notice
- single-use
- latex-free
- EO sterilized
- individual packaging: foil

indication:

- 7-day collection of urine and other body fluids

samples taking urine bag

sterile

features:

- bag with a capacity of 100 ml, size 19 cm x 7 cm
- made of delicate, durable PE foil
- easy-to-read scale, adequate for diuresis measurements, highly accurate - every 10 ml
- adhesive part of the bag coated with anti-allergic, high-quality glue
- additional sealing made of anti-allergic foam protects against the wall sticking of the bag, thanks to which free flow of urine is possible
- available in male and female versions
- optimal urine sample collection in infants and small children
- single-use
- latex-free
- DEHP-free
- EO sterilized
- individual packaging: foil

indication:

- urine sample collection in infants and small children

OXYGEN THERAPY

WWW.ZARYS.COM

oxygen mask with tubing sterile

features:

- made of transparent, non-toxic PVC
- adjustable nose metal plate and rubber fastening
- equipped with a 210 cm (+/- 5%) long tube with universal connectors
- tube with star cross-section resistant to bending
- revolving connector that allows adjusting to patient's position
- single-use
- latex-free
- EO sterilized
- individual packaging: paper-foil

indication:

- delivery of oxygen with precise regulation of concentration
- for medium oxygen concentration

nasal oxygen cannula

sterile

features:

- made of medical PVC
- very soft tips with smooth edges
- fastening under the chin with a soft, sliding adjustment ring
- various spacing of the nasal part of the cannula depending on the size
- universal connector compatible with any source of oxygen
- tube with star cross-section, resistant to bending
- available in 3 sized: for adults, for children and for infants with 140 cm, 200 cm, 300 cm and 500 cm tubes
- latex-free
- EO sterilized
- individual packaging: foil

indication:

- oxygen delivery through the nose

ANAESTHESIA PRODUCTS

WWW.ZARYS.COM

laryngeal mask

PVC sterile

features:

- made of medical PVC
- elastic mask body with detailed description (patient's weight, size, cuff volume)
- elliptic shape and flexible sealing of the cuff ensure safe breath control
- universal, transparent connector: 15 mm
- single-use
- latex-free
- EO sterilized
- individual packaging: tyvec
- for mask with syringe and lubricant: added luer syringe allows the cuff to be filled with the minimum amount of air required to ensure effective sealing
- for mask with syringe and lubricant: lubricant contained in the packaging (silicone oil) allows the outer surface of the cuff to be moisturized before insertion

indication:

- device intended for direct maintaining the airway patency

air cushion anaesthetic mask

non-sterile

features:

- due to the high quality of materials used, ventilation is conducted in an atraumatic and safe way for the patient
- anatomically shaped inflatable cuff, ensures perfect tightness of the mask with minimal pressure
- device, when applied to the face, tightly covers the patient's mouth and nose without compressing the eyes
- clear shell provides continuous visual observation of the patient
- colour-coded retaining rings, easy for size recognition
- full size range allows to properly choose the size of the mask depending on the age of the patient
- all sizes are equipped with inflatable check valve to adjust air amount for best cushion fitting auto patient's face
- single-use, non-sterile, latex and DEHP-free
- packaging: 1 pc./medical foil

indication:

- device intended for the administration of a gas mixture coming through devices for artificial ventilation
- enables performing medical procedures including artificial ventilation, administration of anesthetic gas and carrying out emergency treatment, of an unconscious patient
- device used in hospitals (operating theaters, intensive care units, emergency departments) as well as during pre-hospital care by rescue teams carrying out rescue operations in an unconscious patient

tracheostomy tube

cuffed / uncuffed* sterile

features:

- made of medical, thermoplastic PVC
- swivel connector, diameter: 15 mm
- flexible wings on the sides of the tube enable fixing straps to stabilize its position
- soft, low-pressure cuff
- pilot balloon in contrasting colour clearly indicates the level of the cuff's inflation
- 2 fixation straps
- size marked on the wings
- atraumatic curved cannula
- X-ray detectable
- equipped with obturator
- single-use
- latex-free
- EO sterilized
- individual packaging: tyvec

indication:

- device is used by professional medical personnel to control respiratory tracts in people after tracheostomy

oropharyngeal airway

guedel airway sterile

features:

- made of high quality PE (polyethylene)
- distinct anatomic curve of the airway helps to create passage to the upper respiratory tract to allow for free flow of anaesthetic gases and air
- colour coded sizes
- numeric marking of the size on the airway
- single-use
- latex-free
- DEHP-free
- EO sterilized
- individual packaging: foil

indication:

- device is used during artificial lung ventilation procedures
- ensure patency of the upper respiratory tract
- increases the effectiveness of the rescue action
- facilitates the stabilization of the endotracheal tube

GENERAL SURGERY

WWW.ZARYS.COM

surgical suction tube

sterile

features:

- made of soft and flexible PVC of optimal thickness to prevent the tube from collapsing and facilitate operating at the same time
- available types of connectors:
 - funnel-funnel
 - funnel-kapkon
 - funnel-funnel cut-to-fit
- available sizes:
 - CH 24 (outer diameter: 8.0 mm, inner diameter: 5.6 mm)
 - CH 30 (outer diameter: 10.0 mm, inner diameter: 7.1 mm)
- grooves on the surface of the tube prevent it from bending, twisting and collapsing
- smooth inner surface prevents secretions and body fluids from sticking to the walls of the tube and ensures correct and optimal flow
- all types of connectors are compatible with standard suction cannulas
- single-use
- EO sterilized
- double packaging: internal - foil, external - paper-foil

indication:

- to evacuate secretions and body fluids

surgical suction cannula

yankauer sterile

features:

- ergonomically-shaped suction cannula consists of a plastic handle and suction tip
- transparent handle and suction tip allow for observation of secretion being removed
- light handle to minimize hand fatigue
- four side holes and one central opening
- bent in two points at a slight angle
- available with or without suction control
- smooth inner surface prevents secretions and body fluids from blocking the cannula
- universal stepped connector ensures tight connection with a wide range of suction connecting tubes
- single-use
- EO sterilized
- double packaging: internal - foil, external - paper-foil

indication:

- to evacuate secretions and body fluids from the operating field

surgical suction set

sterile

features:

- set components:
 - suction cannula: CH 21 bent in two points at a slight angle, available with or without suction control
 - 210 cm long suction connecting tube: CH 24 (outer diameter: 8.0 mm, inner diameter: 5.6 mm)
- tube made of soft and flexible PVC of optimal thickness for easy operating and to prevent the tube from collapsing
- universal funnel-type connectors at both tips of the suction connecting tube can be fitted to all types of suction devices at one end and suction cannulas at the other (suction cannula can be replaced during surgical procedures)
- grooves on both connectors prevent them from bending
- grooves on the surface of the tube prevent it from bending, twisting and collapsing
- smooth inner surface prevents secretions and body fluids from sticking to the walls of the tube and ensures correct and optimal flow
- single-use
- EO sterilized
- double packaging: internal - foil, external - paper-foil

indication:

- to evacuate secretions and body fluids from the operating field

T-KEHR silicone tube

sterile

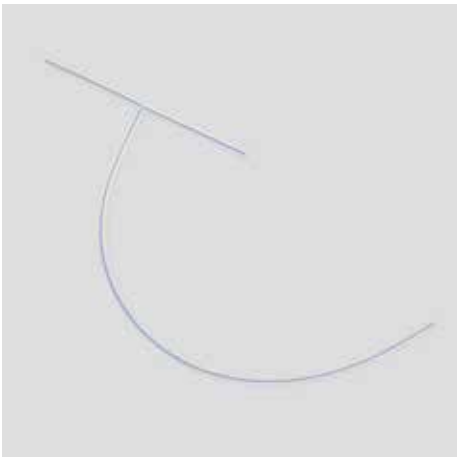

features:

- made of soft and flexible silicone, resistant to bending and twisting
- biocompatible material reduces tissue reaction and increases patient's comfort
- drainage observation possible, thanks to transparent material
- atraumatic, slightly rounded special tip facilitating insertion of the catheter
- X-ray detectable line
- arm length: 500 mm x 180 mm
- available with perforated arm
- single-use
- EO sterilized
- double packaging: internal foil, external paper-foil

indication:

- indicated for biliary drainage

latex-free tourniquet

non-sterile

features:

- made of a wide stretch TPE strap (thermoplastic elastomer)
- latex-free material prevents allergic reactions and skin irritation
- high tensile strength
- single-use bands reduce the risk of infection
- total roller length 11.25 m
- available in blue and pink colour
- individual packaging: paper dispenser that allows convenient sharing of perforated tourniquets
- minimum package contains 25 tourniquets

indication:

- compressing veins at blood collection

ref.	size	colour	quantity / roll	bulk packaging

automatic tourniquet

non-sterile

features:

- components: blue stretchy strap and white ABS plastic buckle
- equipped with a wide stretchy strap so that the pressure can be decreased to a moderate degree
- can prevent congestion at the largest degree, ease uncomfortable feeling and improve the quality of blood sample
- device contains latex
- DEHP-free
- individual packaging: PE bag inside a cardboard box

indication:

- compressing veins at blood collection
- applicable to veinpuncture and for other medical purposes

ref.	size	bulk packaging
SA-001	length 400 mm +/- 10 mm width 25 mm +/- 10 mm	21 pcs

ID wristband

non-sterile

features:

- durable wristband coating characterized by high humidity resistance and resistance to the activity of soaps, hand disinfectants and other liquids used in hospitals
- made of soft and delicate vinyl
- flexible, very light and easy to put on
- high tensile strength and single-use fastening resistant to accidental break
- latex-free
- DEHP-free

indication:

- identification of patients in hospital wards

dental brush with suction

non-sterile

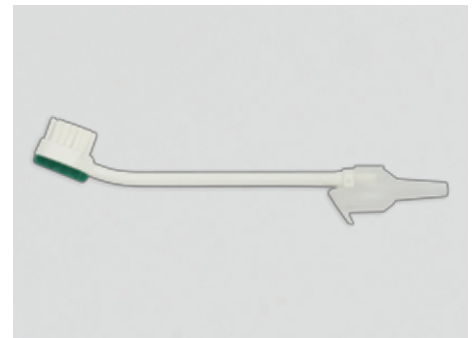

features:

- made of polypropylene
- slightly rough foam on the other side of the brush for tongue surface cleaning
- total length 18 cm, length of the cleaning part 2.5 cm
- suction opening from both the bristle side and the space between the sponge and the bristles
- controlled suction connector at 45° angle for convenient manipulation
- single-use
- latex-free
- DEHP-free
- individually packed in foil bag

indication:

- hygiene of the patient's oral cavity
- function for simultaneous brushing, rinsing and suction

ref.	intermediate packaging	bulk packaging
HJM-S0	50 pcs	10 x 50 pcs

oral swab

non-sterile

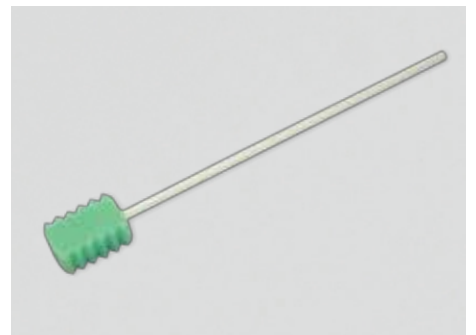

features:

- overall length 15 cm (+/- 2 mm)
- length of the foam part 2.5 cm
- handle made of polyester
- swab made of polypropylene
- single-use
- latex-free
- DEHP-free
- individually packed in foil bag

indication:

- intended for oral hygiene in patients partially or completely dependent on medical personnel
- allows keeping oral mucosa in proper humidity
- allows to perform a procedure to prevent pathological changes in the mouth

ref.	intermediate packaging	bulk packaging
HJM-GB	50 pcs	10 x 50 pcs

entrance mat

non-sterile

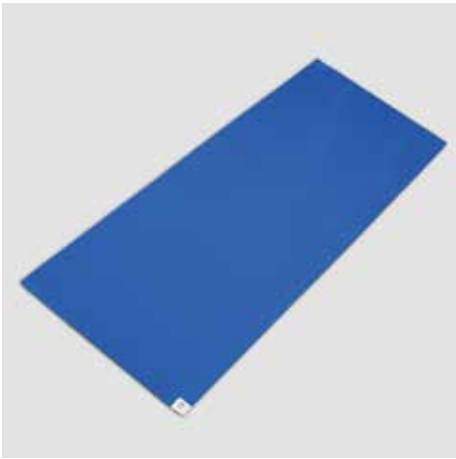

features:

- material used for the production of the mat foil layers: low-density polyethylene resins
- resin (foil component) is made with the use of modern high-pressure technology, which allows excluding catalysts in the form of heavy metals from the production process. Thus the foil sheets do not contain detectable quantities of cadmium, chloride, sodium or lead. Acryl-based elastic adhesive substance is free of ingredients coming into reaction with metals. The top and bottom sheets are also made of polyolefin, they are not adhesive
- characterized by adhesive properties
- each layer has bacteriostatic coating
- 30 thin adhesive sheets
- low mat profile: app. 2 mm thick
- adhesive bottom layer prevents unwanted mat movement
- no need to clean the mat - as soon as the surface of the mat is contaminated, it should be torn off to uncover a new, clean layer
- small numbered labels in the mat corner facilitate removal of subsequent layers

indication:

- preventing spreading of contamination brought on shoe soles and wheelchairs to operating rooms

ref.	dimensions	intermediate packaging	bulk packaging
M001	45 x 115 cm	10 pcs	5 x 10 pcs

microscope slides

non-sterile

features:

- made of high-quality transparent glass
- dimensions meet international standards
- flat, smooth and solid surface
- allow to obtain good quality smears
- box wrapped in foil for additional protection against humidity
- dimensions: 76 mm x 26 mm x 1 mm

indication:

- to hold specimens for microscopic study

wooden tongue depressor

features:

- made of birch wood
- rounded edges preventing injuries
- long outreach thanks to appropriate length
- available in sterile (EO sterilization) and non-sterile version
- sterile depressor packed individually in paper pouch
- individual packaging of the sterile depressor: paper

indication:

- diagnostic examination of the oral cavity

ref.	size	type	sales unit	bulk packaging

PE gloves

non-sterile

features:

- made of polyethylene
- coarse surface and tear-resistant weld
- ambidextrous
- elongation min. 130%
- tensile strength min. 10 MPa
- available in two sizes: M - female, L - male
- approved for contact with food
- packaging in a bag enabling individual removal of gloves
- single-use

indication:

- intended for use as a contribution to other gloves (double-gloving) and for minimally invasive procedures such as drug preparation, feeding the patient

Designed to prevent scalpel injuries

- Ability to place any size of the blade on the handle.
- Stable protection of a blade.
- Special construction to safely cover a blade when not used.
- Ability for complete uncovering a blade while using it.
- Reusable product - ability to sterilize with EO or steam.
- Special construction allowing for safe, non-contact removal of blades.
- Provides safe working environment.

available also
in **LONG** version

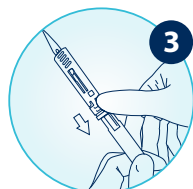

Instruction for use

1 place a blade at the tip of the handle (having proper size of a handle for the size of a blade)

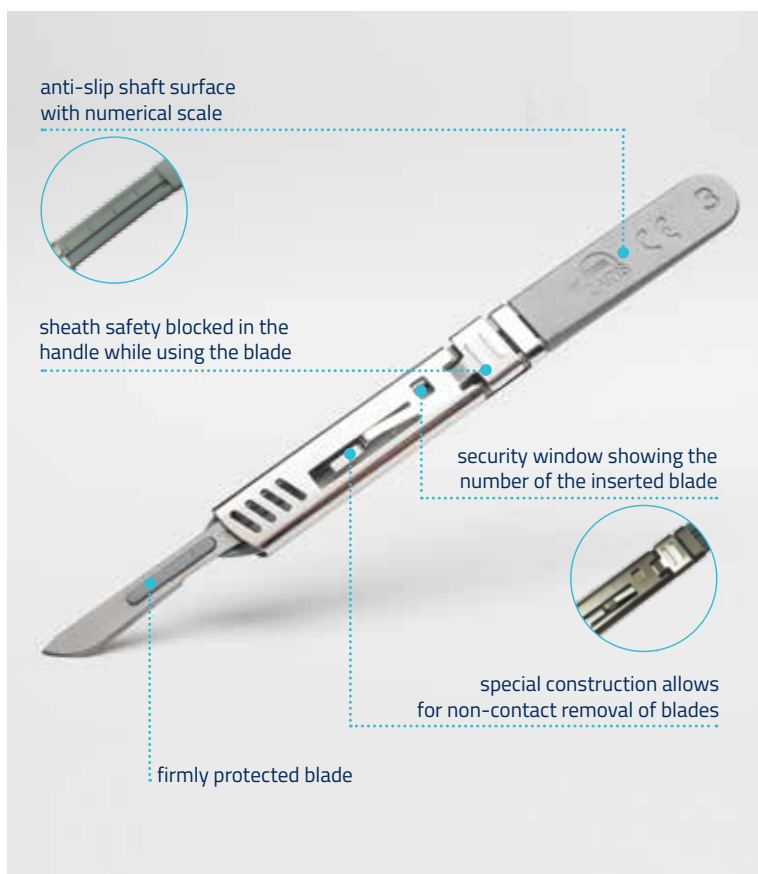

2 pressing the release button with your thumb, slide a sheath forward to safely cover a blade

3 unblock a blade pressing the release button with your thumb, slide a sheath backwards untill it is blocked in the handle and a blade is maximally revealed

4 after the procedure is finished, press the release button to unblock a sheath and slide it forward to the point where a sheath dip can be placed under a blade. Remove a blade by pressing a sheath clip and sliding it forward with you thumb

size 3 compatible with blades 6-16 **size 4** compatible with blades 18-36

Dressings

Dressing materials have for years been the core of patient care. Constant development in this field causes more advanced products to appear next to the basic ones only. Dressing does not translate into using only the basic compresses and tapes any more. Naturally the function of each dressing depends on the requirements, overall patient health and the conditions in which the product is to be used.

The offer of ZARYS International Group falls into a few categories and encompasses a complex range of solutions such as:

- gauze and non-woven dressings, compresses and drapes whose main function is to absorb the exudate and dress the wound in hospital and home care conditions,
- adhesive tapes made of various materials used for dressing and drain fixation as well as dressings with absorbent pads that enable fast dressing of minor injuries,
- special purpose dressings composing of solutions dedicated to specific conditions such as the dressing of post-operative wounds, cannula and drain fixation,
- supporting dressings- including products such as knitted and elastic bandages and tapes,
- stiffening dressings- including padding and POP bandages.

GAUZE AND NON-WOVEN DRESSINGS

WWW.ZARYS.COM

GAZA lux

dressing gauze, non-sterile

features:

- made of hydrophilic cotton gauze bleached with the use of hydrogen peroxide (without chlorine)
- homogenous structure without loose fibers on the surface
- soft and very absorbent
- can be cut and formed to the desired size and shape
- can be sterilized with steam, ethylene oxide or gamma radiation

indication:

- after adjusting the shape, size and after sterilization - general dressing of wounds in out-patient conditions, in OR and hospital wards

Sterilization method:

-S - EO sterilized swabs -SS - steam sterilized swabs

SERVI lux

gauze lap sponge, non-sterile

features:

- made of hydrophilic cotton gauze bleached with the use of hydrogen peroxide (without chlorine)
- with a sewed in X-ray detectable thread or marker, which enables fast and non-invasive identification of the lap sponge left in the operating field
- can be sterilized with steam, ethylene oxide or gamma radiation
- with a belt to fix the lap sponge beyond the operating field
- available after the process of technological pre-washing, which increases absorption capacity

indication:

- after sterilization - as an invasive material used during surgical procedures to absorb large amounts of blood and body fluids from surgical wounds

POREplast

adhesive perforated non-woven tape

features:

- made of perforated non-woven material
- white
- on a roll
- straight edge
- good air and vapour permeability
- good adhesiveness
- elastic - adjusts to the body shape and guarantees freedom of movement
- can be easily separated along and across thanks to the perforation
- hypoallergenic
- non-sterile

indication:

- stabilization, protection and fixation of non-adhesive primary dressings put directly on wounds or injured skin
- stabilization, protection and fixation of drains, cannulas and medical tubes

ref.	dimensions	packaging unit/box	bulk packaging
SPW25009W	2.5 cm x 9.14 m	12 pcs	30 boxes

elastopor

adhesive non-woven dressing tape

features:

- made of hydrophobic non-woven material
- white
- micropores in the non-woven material structure provide an adequate rate of moisture vapour permeability so the correct gas exchange between the dressing and skin is guaranteed
- elastic - comfortable for the patient, adjusts to the body shape and guarantees freedom of movement
- silicone paper backing with a printed metric scale, which facilitates tape cutting and precise, painless and effective application
- dispenser box allows using the tape without taking it out
- hypoallergenic
- non-sterile

indication:

- stabilization, protection and fixation of non-adhesive primary dressings put directly on wounds or injured skin
- stabilization, protection and fixation of drains, cannulas and medical tubes

elastopor STERIL D

non-woven swab with absorbent pad,
incision and O-hole, self-adhesive, sterile

features:

- made of hydrophobic non-woven material
- incision and O-hole enabling application around a fixed drain
- covered with hypoallergenic acrylic glue
- micropores in the non-woven material structure provide an adequate rate of moisture vapour permeability so correct gas exchange between the dressing and skin is guaranteed
- centrally situated absorbent pad coated with polyethylene mesh absorbs small amounts of exudates, protects against external factors' influence and does not stick to the wound as well as facilitates removal of the dressing
- elastic - comfortable for the patient, adjusts to the body shape and guarantees freedom of movement
- rounded edges prevent accidental removal of the dressing
- silicone paper backing facilitates precise, painless and efficient application
- hypoallergenic
- sterile

indication:

- protection of the site of drain or catheter application
- dressing wounds with small and medium exudate level

elastopor IV

non-woven IV cannula dressing,
self-adhesive, sterile

features:

- made of hydrophobic non-woven material
- adhesive
- covered with hypoallergenic acrylic glue
- centrally situated absorbent pad protects the non-woven material from sticking to the injection site
- non-woven lining should be placed under cannula's wings, which prevents it from causing damage to the skin
- rounded edges prevent accidental removal of the dressing
- micropores in the non-woven material structure provide an adequate rate of moisture vapour permeability so correct gas exchange between the dressing and skin is guaranteed
- elastic - adjusts to the body shape and guarantees freedom of movement
- silicone paper backing facilitates precise, painless and efficient application
- hypoallergenic
- sterile

indication:

- stabilization, protection and fixation of intravenous cannulas

elastoDERM

foil dressing, self-adhesive, sterile

features:

- made of polyurethane film
- adhesive
- covered with hypoallergenic acrylic glue
- transparent - allows observation of the dressed place without removing the dressing
- vapour permeability guarantees correct gas exchange between the foil and skin and prevents it from excessive accumulation of moisture and maceration
- barrier against microorganisms and bacteria minimizing infection risk
- very thin and elastic - adjusts to the body shape and guarantees freedom of movement
- may remain on the skin up to 7 days; optimum holding time of the dressing is from 3 to 4 days
- the application system - "frame" or "three-stage" type - facilitates precise and painless application of the dressing
- available in various sizes and options:
 - with central absorbent pad
 - with incision which allows adjusting of the dressing to cannula
 - without incision or absorbent pad
- waterproof
- hypoallergenic
- sterile

elastopor EYE

non-woven eye dressing with absorbent pad,
self-adhesive, sterile

features:

- made of hydrophobic non-woven fabric
- adhesive
- covered with hypoallergenic acrylic glue
- micropores in the non-woven material structure provide an adequate rate of vapour permeability so correct gas exchange between the dressing and skin is guaranteed
- centrally situated absorbent pad coated with polyethylene mesh absorbs moderate amounts of exudates, does not stick to the wound as well as facilitates removal of the dressing
- elastic - comfortable for the patient, adjusts to the body shape and guarantees freedom of movement
- rounded edges prevent accidental removal of the dressing
- silicone paper backing facilitates precise, painless and efficient application
- available in various sizes and colors
- hypoallergenic
- sterile

indication:

- covering of an eye and its area after ophthalmic procedures and surgeries
- sight correction in strabismus therapy

ref.	dimensions	shape	colour	packaging unit/ pouch	intermediate packaging/box	bulk packaging
803010	5.8 cm x 8.3 cm		absorbent pad - white	1 pc.	50 pcs	24 boxes
803011	6.5 cm x 9.5 cm		non-woven material - white	1 pc.	50 pcs	24 boxes

elastoNASAL

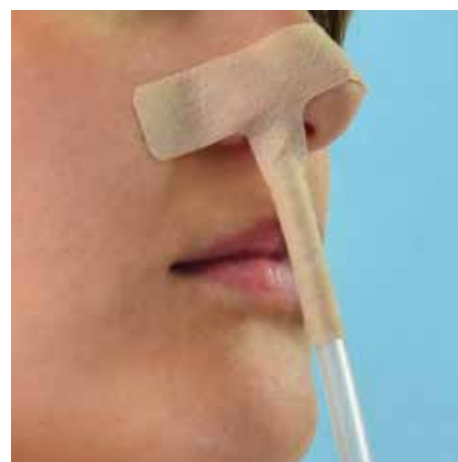

non-woven nasal cannula fixation
plaster, self-adhesive, non-sterile

features:

- made of non-woven material
- adhesive
- skin colour
- covered with hypoallergenic acrylic glue
- thanks to an adequate rate of vapour permeability correct gas exchange between the dressing and skin is guaranteed
- thin and elastic - the plaster is comfortable for the patient and adjusts to the body shape
- "two-stage" application type facilitates precise, painless and effective using of the plaster
- hypoallergenic
- non-sterile

indication:

- stabilization of catheters and stomach tubes fixed in the nasal area

ref.	dimensions	indication	packaging unit/box	bulk packaging

811014	7 cm x 7.1 cm	for adults	50 pcs	40 boxes

paraffiNET

paraffin gauze dressing, sterile

features:

- made of cotton gauze with big pores
- covered with soft paraffin
- mesh structure allows for correct wound ventilation and free flow of exudates to a secondary dressing
- thanks to the paraffin layer the dressing does not adhere to the wound, which allows for atraumatic change of the dressing and pain reduction for the patient
- neutral paraffin properties allow for using the dressing in combination with other medicaments or antiseptics
- can be shaped or cut according to the needs in a sterile manner
- needs to be covered with a secondary absorbent dressing e.g. high absorption capacity swabs or polyurethane foam
- hypoallergenic
- sterile

indication:

- keeping proper moisture in the wound
- preventing the wound edges from drying and maceration
- recommended for uninfected wounds
- dressing chronic wounds: bedsores, ulcers, etc.
- treating surgical wounds, burn wounds, places of injections, skin transplants and damaged skin
- protection against postradiation skin damage

ortho SYNTHETIC

orthopedic padding, synthetic, polyester

features:

- made of polyester
- bandage-shaped
- white
- very soft and fluffy
- adheres well and adjusts to the body shape
- coherent structure is resistant to stratification and facilitates fixation of the stiffening dressing
- minimizes the risk of excoriation and skin irritation under plaster
- does not absorb moist and thus does not allow for its contact with the skin
- hypoallergenic
- non-sterile

indication:

- as a protective layer put under stiffening plaster dressing
- in compression therapy as a padding placed under bandages of various flexibility

Medical clothing

It is extremely important for us to offer our clients products that ensure high standards of working conditions and comfort of use.

In order to achieve this goal, we have created a line of high quality products made of different types of non-woven materials:

- polypropylene non-woven
- SMS non-woven
- Spunlace non-woven
- viscose non-woven
- Spunlace Mesh non-woven

A combination of several factors such as optimal design, perfect fit, breathability and structure makes BETAtex products comfortable and reliable. A wide range of solutions will certainly meet our clients' individual preferences and secure both medical personnel and patients' comfort and dignity.

Types of materials

Polypropylene non-woven

is characterized by lightweight, softness, breathability and high tensile strength.

Perforated viscose non-woven

is characterized by excellent breathability and comfort of use.

Combination of Spunlace and polypropylene non-woven

makes the product durable and pleasant to the touch at the same time, which increases user's comfort.

SMS

is a soft and elastic multi-layer material type, which ensures both high protection level as well as freedom of movement and comfort.

Cotton-like non-woven

soft and pleasant to the touch, significantly improving the comfort of use.

Surgical sets, drapes and gowns

Preventing infections in the operating field is a priority for all medicals. Thanks to our complex offer of single-use protective solutions of ALPHAtex STANDARD, STANDARD+, COMFORT, the post-procedural complications and risk of infection in the operating field are minimized while increasing the protection barrier against the potentially pathogenic germs residing in the human skin layers. We offer:

- patient and equipment drapes
- sets of surgical drapes
- incise films
- surgical covers
- adhesive tapes
- accessories such as fluid collection pouches
- surgical gowns

Properly selected features of surgical drapes provide safety and comfort of use to medical staff and patients. A variety of multi-layer non-woven and laminates reinforced in critical areas in lines STANDARD+ and COMFORT allow to adjust our solutions to particular surgical procedures with maximal cost efficiency.

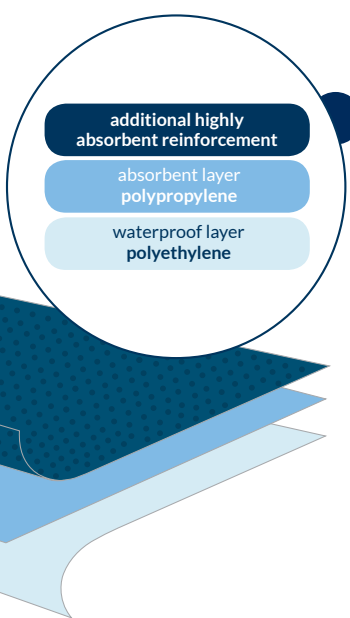

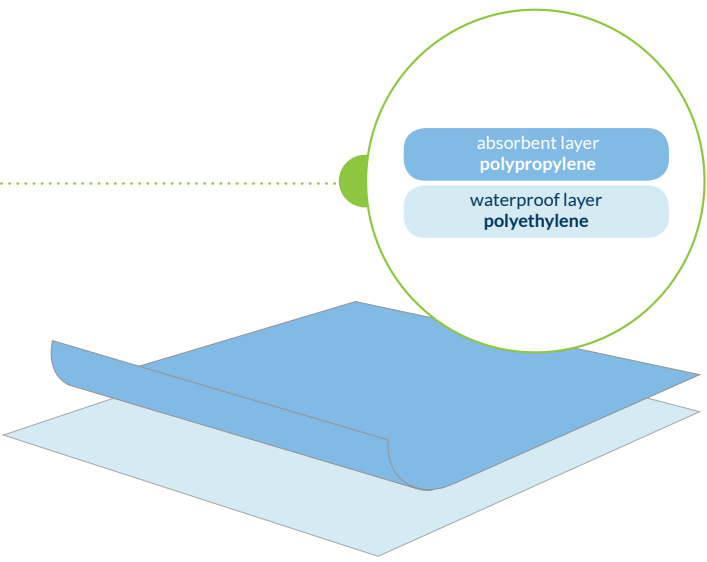

ALPHAtex products are characterized by parameters frequently exceeding the requirements of PN-EN 13795 for 'Surgical drapes, gowns and clean air suits, used as medical devices for patients, clinical staff and equipment'.

Moreover, they provide a successful protection against the risk of infection in the operating field. Practical solutions and composition of our sets enable their quick and simple application while performing medical procedures.

line

STANDARD

- indicated for procedures generating standard and large amount to fluids
- absorbent and impermeable of fluids all over the surface
- with integrated fluid collection pouches
- barrier against microbial migration
- increased tensile and bursting strength
- paper-foil packaging with four adhesive tag labels

line

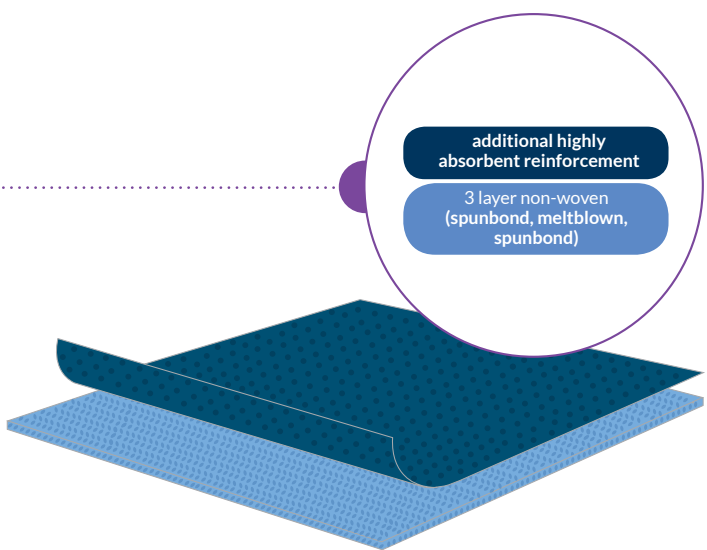

STANDARD +

- indicated for procedures generating large amount of fluids
- with additional highly absorbent reinforcement in critical area
- absorbent and impermeable to fluids all over the surface
- with integrated cable holder
- increased barrier against microbial migration
- increased tensile and bursting strength
- paper-foil packaging with four adhesive tag labels

line

COMFORT

- indicated for procedures generating large amount of fluids
- with additional highly absorbent reinforcement in critical area
- with integrated fluid collection pouches
- with integrated cable holder
- increased barrier against microbial migration
- increased tensile and bursting strength
- elastic, adapts to the body shape
- Tyvec packaging with four adhesive tag labels

STERILE SURGICAL GOWNS

ALPHAatex single-use surgical gowns offer high patient protection against infections, liquids contamination and provide comfort for operating team. They are made of the highest quality, hydrophobic polypropylene nonwoven that constitutes an effective barrier against penetration of microorganisms and liquids.

in accordance with
EN 13795

Surgical gowns STANDARD PLUS have additional reinforcement from the barrier laminate around the abdomen, chest and forearm

Colorful neckline for easier identification of the surgical gown size **M-XXL**

Carton allowing for aseptic application of surgical gown

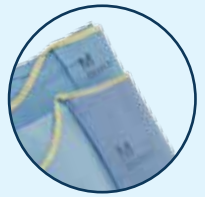

The back parts of the surgical gown overlaps, which allows the medical personnel to maintain safety

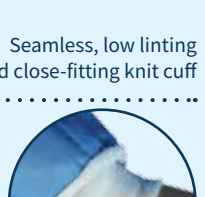

Velcro that allows fasten claps of the gown

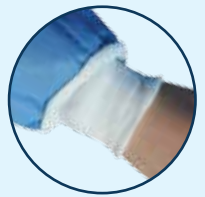

Overprint on the gown allows for quick identification of the size and the medical procedure (SP-standard protection, HP - high protection)

The appropriate easy-access folding of the surgical gown allows its quick application

Seamless, low linting and close-fitting knit cuff

Durable and flexible ultrasonic seams
