

Forklift - HECHT 52184

Item description

HECHT 52184 is truly a multifunctional truck that will do a lot of work not only in the garden. The body of the trolley consists of a steel frame with a string, the dimensions of the body are: length 96 x width 50 x height 40 cm. To transport bulk materials, the trolley comes with a tarpaulin in the shape of a large bag, which can be quickly attached to the trolley.

The trolley also includes a hanging basket, which easily hangs over the sides. The basket is suitable, for example, for storing smaller tools, such as secateurs, etc., You will certainly appreciate this, for example, when trimming trees and shrubs. hands.

Both the sides and fronts of the body can be folded down for easy loading and unloading of material. The side panels are fastened with cotter pins, by pulling them the side panels and fronts can be removed completely quickly, and the truck can easily be made a mobile platform on which you can easily transport even larger materials such as planks, various boards and the like.

The load capacity of the truck is up to 250 kg. Large wheels with 10 "x 3.5 tires are used for travel.
