

## Three-Way Silicone Foley Catheter

三腔硅胶导尿管

Three-way, or triple lumen catheters have a third channel used to infuse sterile saline or another irrigating solution. These are used primarily after surgery on the bladder or prostate, to wash away blood and blood clots.

## Catheter Plug

导管塞

A catheter plug is used to stop flow for catheters hygienically. It would non-invasively seal the catheter for a short time to allow urine to collect in the bladder. The size is universal to fit all sizes of catheters or tubes.
