

To whom it may concern:

This letter is to confirm that our organisation Central European News Ltd has been working together with the company Soft Tehnica LTD on a new version of our Global Internet News (GIN 3.0) editorial system since 2015.

This work involved the creation of a complicated editorial management system and news distribution system, as well as a journalist database and a database of publishing houses and relevant media outlets.

They also helped with our objective of linking all of the above with meta data sets and rolling this program out across our network that stretches from South America through to Europe and then on into Africa, China and Australia.

But even before this, right from the start they were prepared to put in a lot of effort in making sure that the specifications were going to deliver exactly what I needed and on time.

We have been so pleased with the results, that we have commissioned them for a number of other projects including a new block chain CRM, a picture database and a sales platform for direct purchasing.

I was particularly pleased with the provision of a project manager who effectively worked for me to understand my needs and constantly test the software on my behalf and pass on feedback which increased considerably the speed at which the software was developed, and reduced the number of bugs during the beta testing phase.

I have had an extremely positive experience with Soft Tehnica LTD, and found them to be a more than competent and extremely hard-working organisation.

Please do not hesitate to contact me if you have any further questions,

Yours sincerely,

Michael Leidig
CEO. Central European News Ltd
