

## 42250 SELÇUKLU/KONYA

## TECHNICAL DESCRIPTION Double swing

**Double swing -** made of two galvanized metal pipes (pipe diameter 80 cm, wall thickness 2.5 mm). The upper and inner parts of the pillars shall be fitted with plastic plugs, fixed with a minimum of two aluminum rivets. It will be provided with 2 basket type swing posts made of polyethylene, provided with chains and fixed by pipes with fasteners.

Swing dimensions: Length - 270 cm, Width - 42 cm, H - 220 cm. The foundation of the construction will have dimensions of Lxlxh=400x400x700 mm.

**Installation requirements:** To ensure safe and reliable operation, all supports are to be immersed in the ground (ground) to 0.70m to increase rigidity, then following the concrete process (concrete BC 300). The installation of the elements must exclude the possibility of disassembling them without the use of special purpose tools.
