AFRISO-EURO-INDEX GmbH - Compliance confirmation concerning the directive on the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS)

Dear customers,

AFRISO-EURO-INDEX GmbH undertakes all necessary efforts to comply with all applicable laws and regulations, including the requirements for restrictions on the use of certain substances as per RoHS Directive 2011/65 / EU of the European Union, as amended by Directive 2015/863/EU.

As a manufacturer of electrical and electronic devices as well as products which, by themselves, are not to be classified as finished electrical or electronic equipment but which can be used as assemblies or components and components in such equipment, AFRISO-EURO-INDEX GmbH is of the opinion that the RoHS legislation can play an important role in promoting a transition to the restriction of substances of concern.

However, a general restriction of substances would not be possible for AFRISO-EURO-INDEX GmbH, since some product characteristics can only be achieved and implemented through specific exceptions, including technical problems with regard to certain applications and the availability of ecologically advantageous alternatives. The conformity assessments of AFRISO-EURO-INDEX GmbH for compliance with the material restrictions of the RoHS directive are based on our risk assessment of the prohibited or restricted substances entering the supply chain, and include the technical documentation in accordance with the international standard IEC 63000:2018.

On this basis, with the present letter and the associated annex, we confirm compliance with the material restrictions in accordance with Annex II, if necessary, with individual exceptions in accordance with Annexes III and IV of the RoHS Directive, for the part numbers in the annex of this confirmation in the homogeneous material according to specification there. We continuously monitor the validity of the relevant exceptions and respond promptly to changes.

Annex: RoHS Statement - Part Numbers

Kind regards,

Dr.-Ing. Jan Späth, Managing Director Technology
