

Product Category	Ophthalmic Drapes
Type	Ophthalmic Drape 100cm x 120cm with collection pouch
Material	SMS 45gsm
Ref. No.	20054
Intended Use	The Ophthalmic Drapes with one or two pouches are placed over the head of the patient. They have a slightly bigger fenestration area in order to let surgeons perform on patient's eye procedures such as cataract extraction. The existence of pouch(es) facilitates the collection of the fluids generated by the irrigation of solutions to the ophthalmic area during the surgical procedure.
Certification	CE 2803
Classification	Class Is, according to Annex IX of Council Directive 93/42/EEC
Sterilization Method	EtO
Conformity	MEDDEV 2.4/1 Rev. 9 - June 2010 Rule 1
Applicable Standards	ISO 9001, ISO 13485, ISO 14971, ISO 11607, ISO 10993, ISO 14698, ISO 11138, ISO 15223, ISO 11737, ISO 11135, ISO 14644
Shape	
Primary Packing	Individually packed in pouch
Shelf life	5 years
Storage Condition	Store at ambient temperature (below 37°C) and protect from moisture.
