

Applied Biosystems® Quantifiler® Trio DNA Quantification Kit

Quantifiler® Trio DNA Quantification Kit (Cat. No. 4482910)

We have performed developmental validation experiments in accordance with the DNA Advisory Board (DAB) Quality Assurance Standards (October 1, 1998) and guidelines from the Scientific Working Group on DNA Analysis Methods (SWGDM) (July 10, 2003) to evaluate the performance of the Quantifiler® Trio DNA Quantification Kit. We have validated the Quantifiler® Trio DNA Quantification Kit for use in human identification testing.

Each laboratory using the Quantifiler® Trio DNA Quantification Kit should perform its own appropriate internal validation studies to establish interpretation criteria and demonstrate that the Quantifiler® Trio DNA Quantification Kit is appropriate and fit for its own human identification uses.
