## LW-25 Pelvic Acetabular Plates Set

# PELVIC ACETABULAR PLATES

Pelvic Acetabular Plate & Screw Set is an internal fixation implant set which provides comprehensive solutions at the fixation of pelvic region fractures. The Plates are compatible with the anatomical structure of the region and the set consists of different lengths and types of plates, screws and unique instruments that formed preoperatively.

**Indications:** The fractures of pelvis, acetabulum, sacrum, ilium, symphysis pubis separation, the luxation of the sacroiliac joint and pseudoarthrosis. Nonunion, malunion, revision surgeries, osteotomy, pelvic Arthrodesis, total hip revision surgeries.

**Plate Profile:** 3.5mm and 4.5mm profile and locking, straight, curved or also J-shaped. Compatible with the contours and curves of all pelvic bones' surfaces. Coaxial reconstructive plates have variety of lengths. The implants which have been specially manufactured with high strength are made of medical stainless steel material (MR Compatible 316 LVM). All Plates can be three-dimensionally contoured allowing them to be closely adapted to pelvic bone surfaces.

## LW-25 Pelvic Acetabular Plates Set

### ACETABULAR PLATES\*

Quadrilateral Surface Plate is designed to buttress the medial wall of the acetabulum. Posterior wall acetabular plate is precontoured distally to match the curvature of the ischial tuberosity.

The proximal end of the plate is left uncontoured with the proximal holes grouped together for optimized bone purchase away from the acetabular joint.

**Indications:** The fractures of pelvis and acetabulum. Posterior wall fractures, posterior column fractures, transverse and T-type fractures and quadrilateral surface comminution associated with acetabular fracture.

**Plate Profile:** 2.5mm profile and locking, straight, curved or also shaped. Compatible with the contours and curves of all pelvic bones surfaces.
