

# TR Band®

## Radial Artery Compression Device

TR Band® is a compression device to assist patent haemostasis of the radial artery after transradial procedure. TR Band® assists in maintaining radial artery patency at the time of haemostasis, in order to prevent future radial artery occlusion (RAO).<sup>1</sup>

### Product Characteristics

- Selective compression of the radial artery to allow blood return and preserve patency<sup>1</sup>
- Transparent structure for visual control of the puncture site
- Velcro<sup>2</sup> straps make application fast and simple
- Two band lengths available for a precise fit and optimal patient comfort<sup>1</sup>
