Predictable. Targeted. Established.™

# Embosphere<sup>®</sup>

## Microspheres

### PREDICTABLE

Embosphere Microspheres temporarily compress up to 33% for smooth microcatheter passage. Once through the microcatheter, they return to their original spherical shape and stated diameter for predictable, reliable delivery.<sup>1</sup>

### TARGETED

Embosphere Microspheres show a direct correlation between the level of arterial occlusion and the size of the particles used, allowing for consistent and reliable targeted occlusion.<sup>2,3</sup>

### ESTABLISHED

Embosphere Microspheres are the most clinically studied and clinically utilized spherical embolic, having been proven:

- In over 350,000 procedures<sup>4</sup>
- With +20 years' clinical experience<sup>4</sup>
- In more than 200 clinical articles<sup>4</sup>

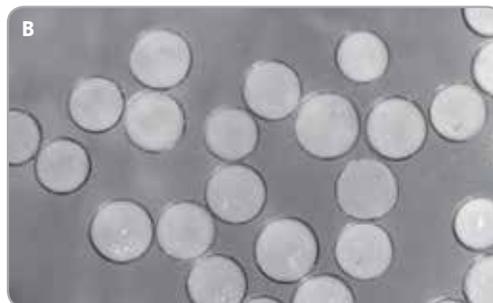

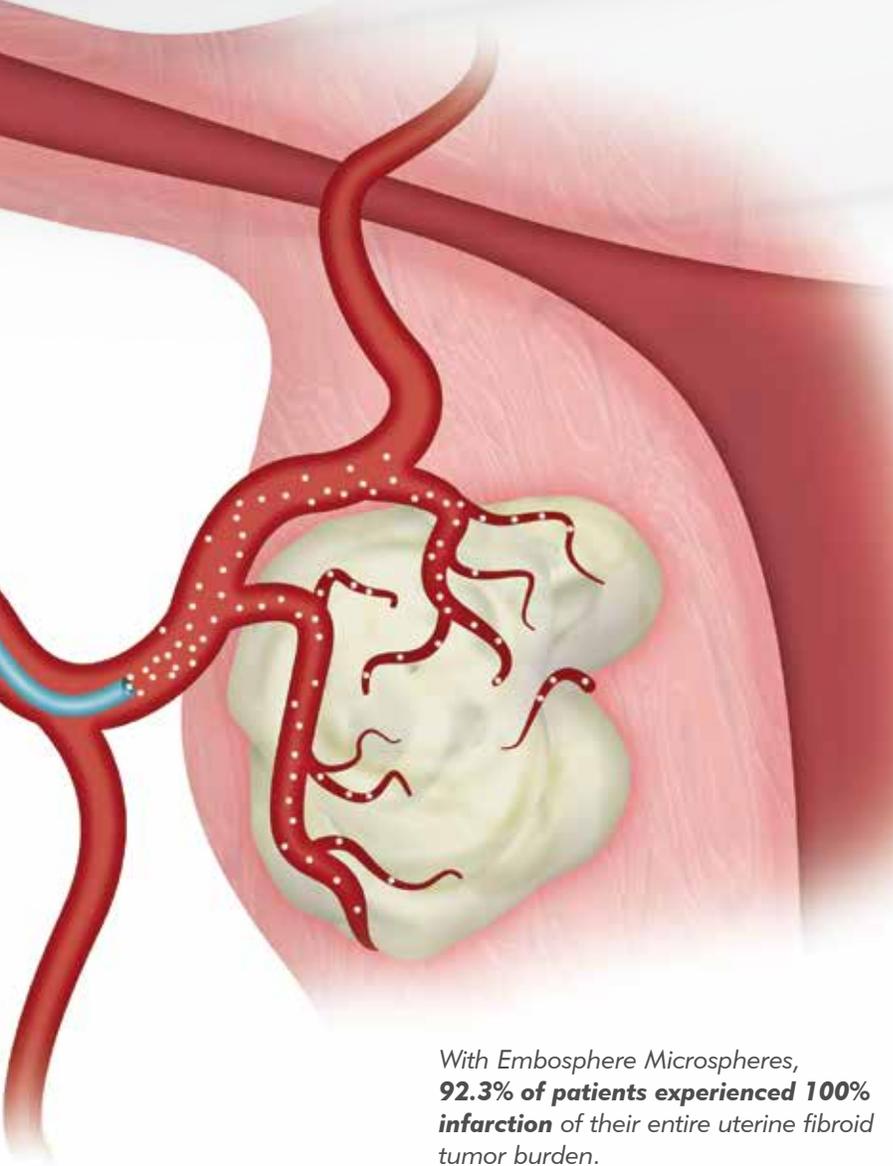

### Non-Aggregating Properties

The hydrophilic surface and spherical shape of Embosphere Microspheres prevent aggregation in the catheter lumen and vasculature.

### Superior Rebound Capability

Embosphere Microspheres' elastic properties allow temporary compression of up to 33% to facilitate smooth microcatheter passage (A).<sup>1</sup> Once through the microcatheter, Embosphere Microspheres return to their original spherical shape and stated diameter (B) for predictable, targeted delivery.<sup>1</sup>

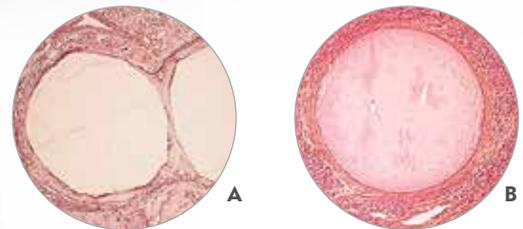

With Embosphere Microspheres, **92.3% of patients experienced 100% infarction** of their entire uterine fibroid tumor burden.

## Durable Occlusion

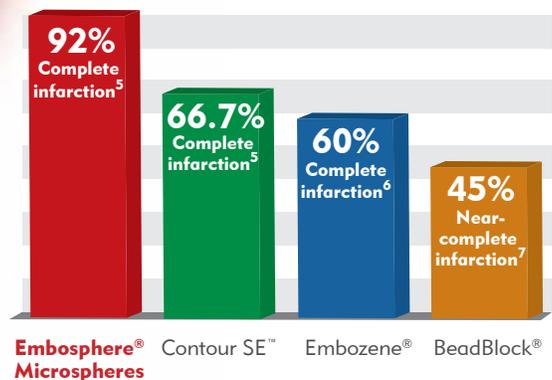

Embosphere Microspheres are biocompatible and nonresorbable with cell adhesion properties that enable complete and durable mechanical occlusion.

*Embosphere Microspheres at six months (A) and six years (B) after embolization of facial AVM.*

## Percentage of Patients with Complete Infarction Rates of Overall Uterine Fibroid Tumor Burden

Complete infarction of all fibroids leads to better long-term clinical outcomes, including a higher rate of symptom control and a lower rate of additional gynecologic intervention compared with incomplete infarction of fibroid tissue.<sup>8</sup>

## ORDERING INFORMATION

SYRINGES

Syringe Size Range (µm)	Color Code	1 mL Syringe Product Number	2 mL Syringe Product Number
50-100 	Gray	--	<b>S020GH NEW</b>
40-120 	Orange	--	<b>S120GH</b>
100-300 	Yellow	<b>S210GH</b>	<b>S220GH</b>
300-500 	Blue	<b>S410GH</b>	<b>S420GH</b>
500-700 	Red	<b>S610GH</b>	<b>S620GH</b>
700-900 	Green	<b>S810GH</b>	<b>S820GH</b>
900-1200 	Purple	<b>S1010GH</b>	<b>S1020GH</b>

Embosphere Microspheres supplied in sterile saline in 20 mL syringe. Sold 5 per box.

VIALS

Vial Size Range (µm)	Color Code	1 mL Vial Product Number	2 mL Vial Product Number
40-120 	Orange	<b>V110GH</b>	<b>V120GH</b>
100-300 	Yellow	<b>V210GH</b>	<b>V220GH</b>
300-500 	Blue	<b>V410GH</b>	<b>V420GH</b>
500-700 	Red	<b>V610GH</b>	<b>V620GH</b>
700-900 	Green	<b>V810GH</b>	<b>V820GH</b>
900-1200 	Purple	<b>V1010GH</b>	<b>V1020GH</b>

Embosphere Microspheres supplied in sterile saline in 8 mL vial. Sold 5 per box.

## SPECIFIC SIZE RANGES

Embosphere Microspheres are available in seven specific size ranges to achieve predictable and efficient vessel occlusion.
