

**DAHLHAUSEN**

### Laryngeal Mask, single use

The sterile Laryngeal Mask, single-use, provides a respiration without intubation of the trachea. It seals the larynx to ensure safe respiration.

**Sterile:** Yes

| Art.no.    | Application area | Max. filling volume (cuff) | Maximum body weight | Minimum body weight |
|------------|------------------|----------------------------|---------------------|---------------------|
| 4400060010 | Newborn          | 4 ml                       | 5 kg                | <5 kg               |
| 4400060015 | Small Child      | 7 ml                       | 10 kg               | 5 kg                |
| 4400060020 | Child            | 10 ml                      | 20 kg               | 10 kg               |
| 4400060025 | Child            | 14 ml                      | 30 kg               | 21 kg               |
| 4400060030 | Adolescent       | 20 ml                      | 50 kg               | 31 kg               |
| 4400060040 | Adult            | 30 ml                      | 70 kg               | 51 kg               |
| 4400060050 | Adult            | 40 ml                      | 100 kg              | 71 kg               |
