3. Production

The information about production is the responsibility of the legal manufacturer (Huizhou Foryou Medical Devices Co., Ltd.).

4. Description

Suprasorb® P sensitive Silicone Foam Dressing consists of a wound contact layer, a absorbent PU foam, a non-woven layer (border, border lite, heel, sacrum, multisite) and a protective backing.

The product variants border, heel, sacrum and multisite also have a super-absorbent core.

5. Properties

The triple-, four- or five-layer construction facilitates dynamic fluid management to provide an optimal moist wound environment, which promotes faster wound closure and may help to reduce the risk of maceration. The gentle silicone layer can be lifted and repositioned without losing its adherence. The layer can also minimise pain to the patient as well as trauma to wounds and the surrounding skin during dressing changes. The absorbent pad layer provides superior absorption and locks exudate in.

Indications:

- pressure ulcers
- leg and foot ulcers
- traumatic wounds
- surgical wounds
- donor sites
- abrasions
- burns (1st and 2nd degree)

6. Intended purpose/use

Suprasorb® P sensitive Silicone Foam Dressing may be used to treat all wounds, provided they are

- moderately to heavily exuding (border, heel, sacrum, multisite)
- moderately exuding (non-border)
- slightly to moderately exuding (border lite)
- superficial to
- deep* wounds

The dressing can also be used on dry/necrotic wounds in combination with gels.

*For deep wounds, apply a wound dressing according to the instructions for use of the respective dressing, if necessary.

7. Medical device classification

Suprasorb® P sensitive Silicone Foam Dressing is a Class IIb medical device according to Rule 4. (Medical Device Directive 93/42/EEC, Annex IX)

8. Biological assessment and compatibility

The information about biological assessment and compatibility is the responsibility of the legal manufacturer (Huizhou Foryou Medical Devices Co., Ltd.)

9. Shelf life

When stored correctly (in a cool and dry place, protected from direct sunlight at a temperature of 5°C to 40°C), the shelf life is 3 years.

10. Disposal

The user has to observe the applicable national laws, standards and guidelines for the disposal of waste from the medical sector.

National requirements also have to be taken into account when disposing of packaging materials.

11. Legal manufacturer:

The following legal manufacturer hereby confirms the accuracy of the information provided in this product data sheet:

Legal manufacturer:

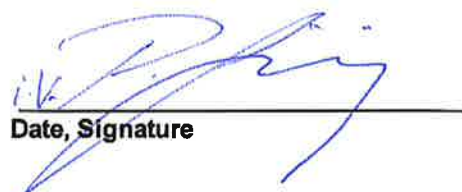

Huizhou Foryou Medical Devices Co., Ltd.
