

LED BEACON LIGHT

LVS5 LED beacon light is made of high brightness LED, It has double in line of 1Watt LED bulbs around the light , double layer of lens, outer lens can be holistic and inner lens color can be in half and in different color, it's accord with the national standard, it's applied at field of fire fighting, ambulance, police, project repair and motorcycle vehicles.

1. Technical parameter:

- A. Working voltage: ☐12V(DC11V~15V)
☐24V(DC21V~26V)
- B. Consume power: 24W
- C. Light Source: 48pcs LEDs, 0.5W/LED
- D. Light intensity: $\geq 300\text{mcd}$
- E. LED usage life: $\geq 20000\text{h}$
- F. Ambient temperature: $-40^{\circ}\text{C} \sim +65^{\circ}\text{C}$
- G. Warning light color: ☐red; ☐amber; ☐blue; ☐clear
- H. Mounting way: screw or magnet
- I. Waterproof Grade : IP65
- J. PC lens: PC 2805 (Bayer)
- K. Size: diameter: 165mm(base), Height:147mm

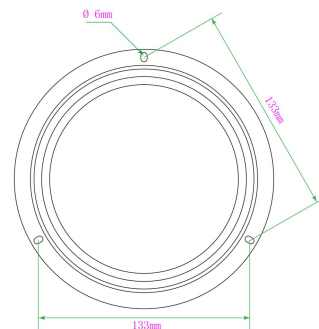

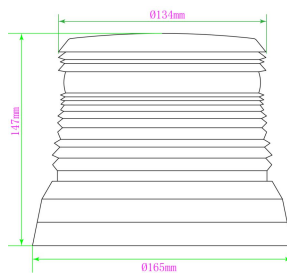

2. Mounting

- A. Confirm that no vehicle parts could be damaged, drill a mounting holes in the mounting surface or put the magnet base in place where it made of iron material.

3. Wiring

- . Plug the cigar cord into the cigar jack of the vehicle.

4. Figure & Picture

Note:

- 1.this product has function of reversed polarity input protection, (it won't work if reserve connection)
2. it must be used at within the limitation of allowed rated voltage, otherwise it'll be broken and doesn't work
