

**Product name:**

Concrete litter bin model 43

**Dimensions:**

Ø: 38 cm H: 84 cm 50 L, 60 kg

**Link to the product's page:****Description:**

Model of the product range of concrete bins by Encho Enchev-ETE, made out of concrete, high-quality metal and certified wood. The concrete is high-performance, reinforced with an aggregate of natural marble or granite stones. The stones are defined in size and can be combined in different colors. The surface has a characteristic relief. A special lacquer coating is applied to the wooden slats and the aggregate, which protects the wood from rotting and makes the product even more resistant to aggressive weather conditions. The metal lid has an integrated ashtray. The treatment of the metal components by galvanizing and powder coating methods creates high corrosion protection and increases performance. The concrete bin has an internal container of galvanized metal for waste collection, providing easy access for cleaning and maintenance. Possibilities for different color combinations of the aggregate, metal and wooden elements give a distinctive personality and style. An anchoring option for flooring is also available. The combination of functionality and durability, complemented by the beauty of the natural materials used, make the garbage bin an ideal complement to the design of exterior spaces in parks and gardens. Maintaining a high standard and quality, Encho Enchev - ETE meets the most sophisticated landscape architectural requirements in furnishing private properties, hotels, holiday villages and resorts. An elegant and practical solution for the equipment of bus stops, metro stations, rail stations, terminals, as well as beaches, alleys, schools, playgrounds and other public areas. Keep the environment clean and think about the future of the planet with Encho Enchev - ETE's concrete bins.
