Portex® Soft Seal® Laryngeal Mask range

Laryngeal Masks are often used as an alternative to a tracheal tube or face mask in short term anaesthesia. It is also becoming more popular for use in difficult airway scenarios or in accident and emergency procedures.

- The Portex® Soft Seal® Laryngeal Mask features the exclusive Soft Seal® Cuff which is less permeable to nitrous oxide¹ than that of reusable masks, reducing increase in pressure and minimising potential trauma.

- The cuff, combined with the higher atrium, helps to provide an improved seal.
- Single Use.
- Better infection control.
- Research has shown that even thoroughly cleaned reusable airway devices still contain residual protein deposits, which have the potential for cross-patient contamination.
- Ease of Access.
- Higher atrium, negating the use of epiglottis bars.
- The Portex® ---Soft Seal® Laryngeal Mask is designed to avoid the risk of blockage without the need for obstructive

epiglottis bars, allowing easy access for flexible fibre optic devices and fibre optic guided placement of tracheal tubes.

- The Portex® Soft Seal® Laryngeal Mask has been approved in studies for use in pre-hospital airway management.
- Available in paediatric sizes 1, 1.5, 2 and 2.5.

Bougies

Bougies are used during intubation of a Difficult Airway as the coude tip can confirm correct placement through the hold up (clicks) on the tracheal rings.

- Available in 15Fg reusable and single use
- Reusable 600mm - used for over 40 years
- New single use 700mm
- Both have superior memory
- Good flexibility
- Single use will reduce risk of infection

Stylets

Stylets are used to preform a tracheal tube prior to intubation.

- Malleable aluminium adaptation to required shape
- Available in standard and extra long lengths
- Easy insertion and withdrawal
- High density polyurethane coating in neonatal sizes
- Ivory PVC sleeve in adult sizes

Guides

Guides (Exchange Guides) are for when a tracheal tube is exchanged.

- Available in reusable and single use
- New clear marking on Ivory PVC 15Fg Guide
- Polyurethane guides in sizes 10Ch & 5Ch

Your choice of material

Portex® have a unique range of ET Tube materials to meet almost every anaesthetic requirement. We understand that your choice of material is as important as the design.

- Clear PVC can identify correct intubation through 'misting'
- Siliconised PVC can assist in suctioning in an ICU
- Ivory is soft yet kink resistant for maxilla - facial and nasal intubations

- Polyurethane has no memory so is perfect for uncuffed nasal intubation
- Silicone reinforced for adverse airways
- Single Use PVC reinforced for cervical spinal to reduce the risk of cross infection

Soft Seal® Cuff

The profile Soft Seal® cuff is made from velvet soft PVC material, giving minimal risk of trauma. Through combining the benefits of the profile cuff design with a larger cuff resting diameter, it ensures an effective seal even when selecting smaller bore tracheal tubes.

- Unique shape ensures minimal contact to the sensitive tracheal mucosa
- Strong yet thin cuffed material reduces the risk of folding and leakage
- Reduced Nitrous Oxide permeability for a more stable cuff pressure

Tracheal Tubes with Profile Soft Seal® Cuff

The Profile Soft Seal® Cuff combines the benefits of the profile cuff design with a larger cuff resting diameter providing the patient with optimum comfort.

- Minimal contact with the sensitive tracheal mucosa
- Large cuff diameter ensures effective seal
- Reduces movement relative to trachea during ventilation

- When deflated, cuff conforms closely to tube to minimise the risk of trauma during intubation and extubation
- Low pressure - responds rapidly to varying pressures during the respiratory cycle, securing sealing
- Reduces the risk of trauma during intubation and extubation

Every Soft Seal® profile cuffed tube is also equipped with:

- One way valve for efficient and easy inflation and deflation of cuff
- Large pilot balloon clearly shows when cuff is inflated
- An intubation Depth Marker is located 3cm proximal to the cuff to assist in the accurate placement of the tip within the trachea

Ivory PVC Tracheal Tube

These high quality tubes provide a direct and unimpeded airway for gases to pass to and from the lungs.

These tubes are firm enough for ease of intubation yet soften when in place to conform to the anatomy of the upper respiratory tract.

- Kink-resistant, minimises possibility of tube occlusion
- Ivory PVC minimises the risk of trauma to the nasal passages
- Comprehensive size range 2.5 - 10.0mm

to suit all patients from paediatric to adult

- Radio-opaque Blueline® for exact location of tube position
- 15mm connector conforming to ISO5356-1 ensuring full compatibility with circuit connections

Paediatric, Siliconised PVC, Oral/Nasal Croup Tube, Extra long

This extra long paediatric tracheal tube is designed to minimise the problems associated with intubating a patient

suffering from croup, upper airway inflammation or epiglottitis.

- Kink resistant, minimises possibility of tube occlusion
- Smooth formed Murphy Eye and tip for atraumatic intubation
- Comprehensive paediatric size range 2.5 - 5.0mm

PVC, Single use, reinforced, Oral/Nasal Tracheal Tubes

The Smiths Medical single use reinforced Tracheal tube has been specifically designed to reduce crushing and kinking when the patient head is extended and flexed.

It facilitates the administration of anaesthetic confidently as the airway stays patent. This tracheal tube also boasts all the advantages of a Portex® Tracheal tube and the option of a Profile Soft Seal® Cuff.

- Smoothly finished tube tip
- Atraumatic cuff welds for ease of intubation
- Flexible to conform to patients position
- Single use minimises the risk of cross infection

Masks

Smiths Medical offers a comprehensive selection of disposable single use Anaesthesia Face Masks.

- Malleable cone conforms to patient features
- Colour coded hook rings on selected masks
- Available from neonatal to adult sizes
- Crystal clear cone allows the clinician visualisation

Airway Accessories & Connectors

Smiths Medical manufactures a variety of high quality accessories to support effective Airway Management.

- Catheter Mounts are lightweight by design
- The versatile Cuff inflation gauge combines the advantages of controlled cuff inflation with precise pressure monitoring
- The Y piece connector is a modified Ayres T piece that has a flow tube at an acute angle to reduce bulk

Portex® BlueLine® Endobronchial Tube

BlueLine® Endobronchial Tubes are specifically designed to enhance user technique and patient safety. The unique right angle circuit take-off minimises torque on the tube and directs the circuit up and over the patients head.

- The thermosensitive clear PVC tube softens at body temperature, ensuring maximum anatomical conformity and minimising risk of trauma to the tracheal mucosa
- The Carlens-style wye adaptor allows selective lung ventilation, differential lung ventilation and CPAP
- Colour-coded, labelled extension tubes and pilot balloons differentiate bronchial and tracheal airways
- Pilot balloons indicate cuff inflation status
- The Soft-Seal® high volume/low pressure cuff system minimises risk of airway trauma
- Four separately packaged Maxi-Flow® suction catheters are included
- Pre-assembly of right angle clamping tubes and single axis swivel minimise the torque and direct the circuit away from the operating field
- The tube cuff aids in verification of placement while the larger lumen allows use of larger fiberoptic bronchoscopes and suction catheters (see reference chart)
