

FULL FACE CPAP MASK

ELBOW CONNECTOR

- **QUICK RELEASE**
Quick release design allows patients to disconnect and connect to the tubing with minimum effort, increasing patient mobility.
- **MONITORING**
Two standard 4.3mm ports are located on the connector to fulfill the demands of patient monitoring.
- **DOUBLE ROTATION**
360 degrees rotatable connection between mask and connector, and between connector and tubing minimizes interruptions to patients.
- **EXHALATION VENT**
Well positioned exhalation vent allows CO₂ to be released easily with less effort for patients.

FRAME & MASK

- **OPTIMAL FIT**
The reinforcing frame incorporates with the silicone mask to prevent deformation. The soft-touch cushion helps seal the mask without irritating the face.
- **EASY CLEAN**
The connection between elbow connector and frame can be disassembled easily to allow effective cleansing.
- **SAFETY**
Safe vent design ensures the safety of patients.
- **STERILIZATION**
High quality medical grade materials are autoclavable to 121 °C.

HEADGEAR

- **SIMPLE CLIP**
The clip-in design allows patients to lock the headgear into the frame and remove it efficiently.
- **GOOD FIT**
The adjustable strap made with flexible fabric is adaptable to various patients. The permeable mesh on the backside of headgear increases patient comfort.
