Balaclava for firefighters SU – 21 color ecru or navy blue

Balaclava for firefighters SU – 22 color ecru or navy bluePurpose

The single-layer balaclava with the symbol SU-21 and the double-layer balaclava with the symbol SU-22 are designed to protect the head, front part of the neck and nape of the firefighter from the effects of heat and flame during firefighting and accompanying activities. The balaclava is designed to be worn during the action in combination with protective clothing, breathing apparatus and helmet.

The balaclava complies with the applicable essential requirements of Regulation (EU) 2016/425 of the European Parliament and of the Council of 9 March 2016 on personal protective equipment and repealing Council Directive 89/686/EEC and with the requirements of the standards:

EN ISO 13688:2013, EN 13911:2017, EN1149-5:2018.

Materials used

Single-layer SU 21 balaclava: basic fabric: ecru and navy blue, material composition 93% meta-aramid, 5% para-aramid, 2% antistatic fiber, surface weight 260 g/m².

Two-layer SU 22 balaclava: basic fabric: ecru and navy blue, material composition 93% meta-aramid, 5% para-aramid, 2% antistatic fiber, surface weight 230 g/m².

Size:

The balaclava is made in one universal size. The balaclava covers the head circumference range from 53 cm to 62 cm.

The balaclava has:

- EU type examination certificate issued by Notified Body No. 1439: Łukasiewicz Research Network - Łódź Institute of Technology.
- Certificate of approval issued by CNBOP.
