Features and characteristics

Cooking Control

We must have the edge, which is why we guarantee the highest precision during cooking for the optimum result. We measure humidity and quantity of oxygen with iClima, guarantee the purity of the steam with PureSteam, and ensure even heat distribution with HA control.

And we certify it with the EZ Sensor range, a number of ergonomic probes which measure the core temperature of foods to make sure they are cooking with the required heat.

Accuracy ensures the best results.

iCooking

New smart cooking technology.

Lets you select the product and your desired finishes quickly and intuitively; the oven adjusts the phases and parameters accordingly.

During execution, the oven automatically and continually recalculates the temperature, humidity, air speed and time required to obtain a product with the optimum finish and minimum energy consumption.

Moreover, the finish can be modified during execution. iCooking rapidly readjusts the parameters so you achieve your desired result.

User experience

Intuitive, simple and clear. Our oven is the perfect guide to help you in your cooking. It contains a wide array of recipes with all possible cooking levels and results for your dish. An exceptional kitchen-hands which will become a gastronomic essential for any chef. Facilitate and boost the most complicated of recipes, cooked to perfection and with the highest accuracy thanks to the "Easy Cooking" and "Fagor Cooking" automatic programs.

The Advance generation includes the Fagor Touch system, a touch screen completely sealed in glass, very easy to clean, water and grease-mark repellent, and highly scratch resistant. Technology so that your oven thinks for you, to facilitate your daily work.

Food Safety

Importance has been placed on the shape to ensure the oven's cleanliness, with the cooking processes recorded by the HACCP control system. The oven's design is engineered to guarantee maximum hygiene together with precise operation and cooking. Moreover, with the iWASHING smart cleaning system, you will reach all the oven surfaces for cleaning.

An automatic methodology, with different washing programs, which ensures the consumer's safety. The wash cycle takes place via a complete hydraulic system which adapts to the professional's needs. In short, maximum disinfection for unique performance.

Robust design

Built with an eye to detail in the highest quality stainless steel. A robust design composed for durability over time, the machine will not deteriorate despite continuous use. Solid and ergonomic, our ovens are very resistant.

Oven body in AISI-304 stainless steel (polished mirror interior).

Special design to guarantee uniform heat distribution throughout the chamber, together with the HA control.

FagorKonnect

FagorKonnect provides a unique connection between you and your oven. It lets you connect with your kitchen, supervise it and manage it, wherever you are, and at any time. With it, you will be able to manage and monitor your cooking processes remotely.

Access the control panels, review the data history and optimise the use of your iKORE ovens. Just what you needed to be freer and more efficient.

ADVANCE

Quality cooking, efficiency and safety.

The connectivity in Fagor Professional.

Foodservice Business Perspective

- Efficiency and convenience at your fingertip
- Manage all your Fagor equipment remotely through our cloud-based application
- Both Foodservice & Laundry business equipment
- FagorKonnект is here

Main benefits

Distributor

a) Improves your customer service
by bringing immediacy to your post-sales service: see the oven alarms instantly, analyse the possible causes and the troubleshooting videos, inspect the machine in real time wherever you are with the powerful "remote desktop" and, in this way, identify the response you may need during your intervention visit. As a result, ensure that your client's equipment is out of order for the shortest time possible.

b) Process efficiency and cost savings
Save on your post-sales service: fewer visits, greater probability of providing the right response
Real-time notification of the interventions required for both preventative and remedial maintenance.
Centralised, remote management of software updates.

c) FagorKonnект offers you the base technology to set up new services with your clients, such as renting, "connected" maintenance services, etc.

Owner

a) Improve the management of your business:
FagorKonnект has a fully personalisable Control Panel which lets you monitor every aspect of your ovens in real time and at a glance to help you make the best decisions.
· Monitor the "Current State" of the machines selected (available, error, running, offline) and reduce downtime.
· Manage production by analysing the cycles executed, and which the most used recipes are out of all those cycles.

· Manage the occupation of your machines with intuitively-presented viewing of how much time they have been occupied and unoccupied in a given period.
b) Process assurance:
validate that the different cooking processes are being performed correctly, to guarantee hygiene and food safety. Monitor HACCP traceability while viewing all the cycles on graphs.

c) Efficiency and convenience:
Manage all your Fagor appliances wherever you are and with any device. Import/export recipes; view the operational state and errors if there are any; run processes remotely, such as carrying out an auto-wash and controlling the oven itself remotely.

Accessories for connectivity

RANGE	MODEL	CODE	DESCRIPTION	€
Advance	Ethernet cable kit	19095311	Cable and cable gland to take the Ethernet socket out of the oven.	-
Advance	Advance-range wifi connection kit	-	Wifi kit for connecting ovens to the internet	-

Functionalities

	DISTRIBUTOR	OWNER
 Dashboard: Customise graphics to see desired information of your machines and manage your business	•	•
 Devices Visualise your connected ovens in a list or geolocate them in a map Organise your machines in groups as you wish with the "label" system Check the real time operational status of your ovens Take "remote control" of your oven and operate the touch panel as if you were in front of it Update the software version with FagorKonnect as required	• • • • (*) -	• • • • •
 Recipes Create detailed recipes in a friendly manner: with picture, necessary accessories, ingredients list, elaboration, cooking phases Export/Import recipes to/from any oven remotely when oven connected to internet (or by USB if not connected) Use the advanced filters to select your desired recipes or simply choose your "favorites"	- - -	• • •
 Hygiene Complete HACCP management: one file for each cycle, advanced filters, import as needed, visualize charts and data in FagorKonnect or download to PDF Manage HACCP remotely if oven connect to Internet or by USB if not connected Monitor the automatic-washing of your ovens and "start" a washing cycle remotely from your FagorKonnect APP as you wish	• • -	• • •
 Technical Service Visualise which of your connected machines are having any type of incidence in real time and geolocate them Access the detailed list of all the "real time" incidences reported by the machines Receive desired notifications from your machines in your FagorKonnect Access to the "troubleshooting" section of each alarm; you will find the necessary technical documents and a video to show you how to solve each possible cause of the alarm.	• • • •	• • • -

(*) Requires owner validation.

Registration Process

How to register as a distributor on the FagorKonnect platform?

- 1 Contact your Fagor Professional sales manager
- 2 You will receive an email with a link to complete the registration process
- 3 Complete the registration form
- 4 Welcome to FagorKonnect!
You can now grant access to your customers

How to register your customers on the FagorKonnect platform?

- 1 Log in to FagorKonnect and create an invitation for your customer
- 2 They will receive an email with a link to complete the registration process
- 3 They will need to complete the registration form
- 4 Your customer now has access to FagorKonnect!
They can now register their machines and start taking advantage of their full potential.

Cooking accessories

Smoker

Smoking is a method which has been used for centuries to preserve food for longer or to give it a different taste, especially for meats, fish and vegetables.

By using the "smoker" accessory presented by Fagor Professional, the combination oven is optimised and transformed into a smoker, saving space and time.

The user can apply typical smoked tastes and aromas as they cook in the oven by using chips of different types of wood, suitable for each cooking. Once the smoker has been inserted into the oven, the time and temperature can be adjusted to regulate the intensity of the smoke.

* CONCEPT models: possibility of working with an internal or external probe (1 single probe working).

Assembly for ovens in column

General characteristics

- The kits for ovens in column are composed of a set of parts which allows the ovens to be positioned one above another.
- This type of assembly is carried out with 1/1 tray ovens, from any of the three electric ranges.
- The codes of the two ovens must be specified when placing the order, as well as the code of the kit of parts to carry out the assembly in column.

- Fagor Professional supplies the column of ovens ready assembled and finished from the factory.
- Available only with electric models.
- Factory built-in only.

Assembly for “Cook & chill” stacking

General characteristics

- Kit of elements to make a stacking system “Cook & Chill” with an oven and a blast chiller or freezer.
- In the order you must indicate these data:
 - Code for the oven.
 - Code for the blast chiller.

- Code for the assembly kit elements to carry out assembly in column.
- Fagor Industrial supplies the column of ovens ready assembled and finished from the factory.
- Factory built-in only.

Cook & Chill solutions

Why using blast chillers is important.

Blast chillers are equipment units designed to lower food temperature quickly. Food can go from cooking temperature at 90 °C to a mere 3 °C in no more than 90 minutes. This stops bacteria from growing.

Our range of mixed blast chillers can make temperature drop to -18 °C in just 4 hours. This high-speed freezing of food stops bacterial growth and prevents the appearance of macro crystal structures.

**Safe, effective and
respectful chilling with
your food.**

Find out more!

Access the website

Chilling process

The combination of combi ovens and blast chillers is highly efficient and makes planning jobs in the kitchen easier.

The correct use of blast chillers and mixed ovens results in reduction of waste, time saving and a product than can be served right away.

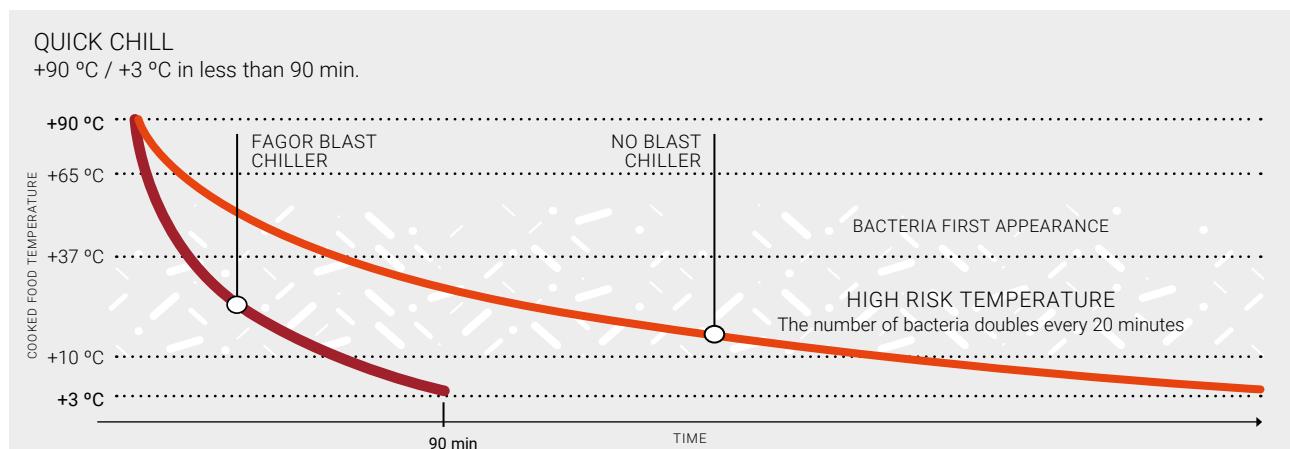

Blast chilling

SOFT CYCLE (STANDARD) - 90'

The right cycle for small size, light, fine food.

STRONG CYCLE (INTENSIVE) - 90'

Recommended for high density or large size food, as well as for packed food.

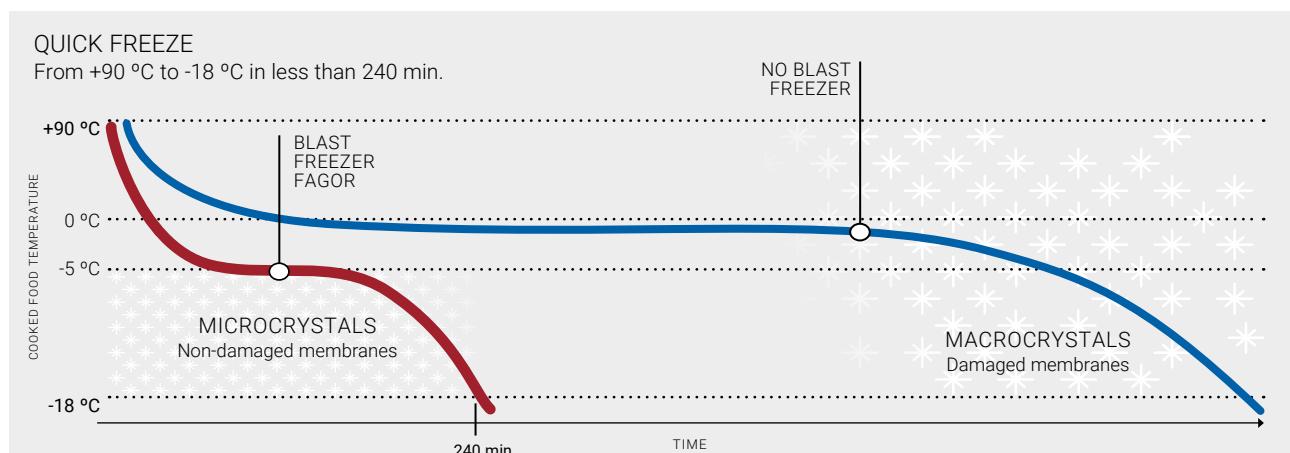

Blast freezing

SOFT CYCLE (STANDARD) - 240'

This is a cycle to freeze food with an even temperature and is therefore suitable for food that is to be cooled consistently and without sharp temperature changes or when cooked with different ingredients.

STRONG CYCLE (INTENSIVE) - 240'

This is the ideal cycle to freeze half cooked food or semi-prepared dishes. It is also suitable for raw food. It allows you to keep frozen food for a long time.

Blast chillers

Cook & Chill series	187
Advance series	189
Conceptc series.....	195

Cook & Chill series | Blast chillers

General characteristics

- Blast chillers with 5" touch screen.
 - Blast refrigeration and blast freezing cycles, which can be set for management by time, or by temperature probe inserted into the centre of the food. (If the probe is not used, time management of the cycle is activated automatically.)
 - Chilling processes:
 - Hard cycle: Default freezing cycle. Executes the cycle and maintains a constant temperature of -20°C.
 - Soft cycle: Default refrigeration cycle. Executes an initial cycle and maintains a constant temperature of 0°C.
 - The duration of the time-managed chilling cycles are as follows:
 - Refrigerating cycle: 90 minutes.
 - Freezing cycle: 240 minutes.
 - When the refrigerating cycle is over, the equipment works as a refrigerated cabinet, and the temperature remains between +2 and +4 °C, or as a freezer, with temperatures under -18 °C.
 - Hermetically sealed compressor with ventilated condenser.
 - R-452A ecological cooling (CFC free).
 - 60 mm thick injected polyurethane insulation.
 - 40 kg density. CFC free.
 - Copper piping and aluminium flaps evaporator.
 - Forced draught cooling system.
 - Device with defrosting activated by the user. Automatic evaporation of the condensate without electrical energy
 - Inner tray slides included.
 - Heated probe.
- Ordering options:**
- USB port.

ADVANCE | Blast chillers

General characteristics

- Blast chillers with 5" touch screen.
 - Blast refrigeration and blast freezing cycles, which can be set for management by time, or by temperature probe inserted into the centre of the food. (If the probe is not used, time management of the cycle is activated automatically.)
 - Chilling processes:
 - Hard cycle: Default freezing cycle. Executes the cycle and maintains a constant temperature of -20°C.
 - Soft cycle: Default refrigeration cycle. Executes an initial cycle and maintains a constant temperature of 0°C.
 - Cycle duration:
 - Refrigerating cycle: 90 minutes.
 - Freezing cycle: 240 minutes.
 - 5 additional special cycles for the management of defrosting, ice hardening, drying, fish sanitisation and heating of the skewer probe.
 - When the refrigerating cycle is over, the equipment works as a refrigerated cabinet, and the temperature remains between +2 and +4 °C, or as a freezer, with temperatures under -18 °C.
 - Hermetically sealed compressor with ventilated condenser.
 - R-452A ecological cooling (CFC free).
 - ABC-031 model with R-290 coolant
 - 60 mm injected polyurethane insulation (except for the 031 models, with 35 mm thick insulation). 40 kg/m³ density. CFC free.
 - Copper piping and aluminium flaps evaporator.
 - Forced draught cooling system.
 - Device with defrosting activated by the user. Automatic evaporation of the condensate without electrical energy- Inner tray slides included.
 - Heated probe.
- Ordering options:**
- USB connection for data extraction.
 - Castor kit (factory assembly).

ADVANCE | Roll in blast chillers

General characteristics

- Inside and outside made of high quality austenitic stainless steel.
- With our insulation by means of injected 40 kg/m³ polyurethane, we are 20 % above the market average, particularly for freezing performance and with a noticeable reduction in consumption. (70 mm thick insulation in refrigerated models and 100 mm thick insulation in mixed models).
- Eco-friendly coolant R452a .
- Forced draught cooling system with optimised air circulation.
- Tropicalised cooling unit. Suitable to work at a room temperature up to 43 °C and 65 % humidity.
- Hermetically sealed compressor/scroll/ semi-hermetic with ventilated condenser.
- Electronic and digital control of defrosting temperature.
- Opened door delay alarm.
- HACCP tracking system with alarm and temperature log. An optional printer can be installed to print data.
- USB data extraction.
- Heated probe.
- Bottom:
 - CSK models: refrigeration cells without any bottom. 2 mm thick steel bottom.
 - CMK models: mixed cells. 100 mm thick bottom board with 40 kg/m³ injected polyurethane insulation.
- Control panel with touch screen.

CONCEPT | Blast chillers

General characteristics

- High quality austenitic stainless steel inside and outside (except for galvanised back panel).
- AISI-304 18/10 stainless steel inside.
- Fully injected compact structure.
- AISI-304 18/10 stainless steel tray slides included.
- 60 mm injected polyurethane insulation. 40 kg/m³ density. CFC free.
- Hermetically sealed compressor with
- ventilated condenser.
- Control panel with touch screen.
- R-452A ecological cooling (CFC free).
- ECO type, user friendly control panel.
- Thermostat control cycles with end of cycle acoustic alarm.
- The cycles can be controlled by time or by temperature according to the reading of the temperature sensor inside the product (time control is automatically applied when no probe is used).
- When the refrigerating cycle is over, the equipment works as a refrigerated cabinet, and the temperature remains between +2 and +4 °C, or as a freezer, with temperatures under -18 °C.
- Fitted with non-heated temperature probe.
- Automatic defrosting device activated by the user. Water evaporation device without power consumption.
- Castor kit (factory assembly).

Concept

The electronic control allows refrigeration (+3 °C) or freezing (-18 °C) cycles.

(*) Productions calculated in accordance with EN 17032

Vacuum packers

General characteristics

- Vacuum packers with digital controls, controlled by sensor.
- Made of stainless steel, no sharp corners and rounded edges.
- 2 units of high-quality polycarbonate fill sheets.
- High-precision microprocessor which controls the vacuum percentage of the chamber, therefore enabling precise and consistent results at all times, regardless of the type/quantity of the product to be packaged.
- Digital control panel with display included.
- Easily programmable memory for 10 programmes.
- Possibility of performing additional 60" vacuum.
- Possibility of packaging liquids.
- H2Oout programme to dehumidify the pump.
- Programme for external packing both in bags and containers.
- All models include Busch pumps.
- Reed switch for automatic start the vacuum cycle once the lid is closed.
- Lid with gas shock absorbers for smooth opening.
- Piston with two positions: operation and standby. In standby position, the lid is not stressed by the piston, ensuring that it does not become deformed over time.
- Cable-free sealing bars with pneumatic pistons. Their shape ensures a hermetic seal even when using multiple packaging (2-3 bags).
- Protection against possible entry of water into the machine.
- Thanks to the injection of inert gas, the G models make it possible to package delicate or soft products.
- Oil level indicator.
- Audio and visual alarms: vacuum alarm (warning if the configured vacuum level is not reached) and oil change.
- Visualisation of the complete machine cycles.
- Tilting opening system which enable easy access to all parts for maintenance.
- Internal electronic cards, protected with hermetic casing (waterproof and flame-retardant).
- Easy to replace teflon of the sealing bar."

Complete the process

The constant evolution of culinary techniques requires reliable conservation and elaboration systems that use technological innovations.

The new generation of Professional packaging machines is extremely precise thanks to the sensor control and Busch pumps, the undisputed leader of vacuum pumps, which are known for their reliability and quality.

The new professional vacuum packers by Fagor Professional make it possible to increase the shelf life of foods, preserving their aroma and organoleptic qualities, as well as broadening cooking possibilities and optimising culinary processes.
