01.
Who we are

Introduction

Indrivo is a progressive technology company focused on innovation strategy and agile digital transformation.

We provide technology consulting, custom software development and outsourcing services. Indrivo has implemented complex and hybrid projects for small and mid-sized companies, as well as large enterprises, Government and public institutions and continues its journey by expanding its footprint in Western Europe (Austria, Germany, the Benelux region, UK) and the USA. The Indrivo headquarters is in Chisinau, Moldova, meanwhile we have a balanced presence in Romania, and Luxembourg.

Our strategy starts by building 360-degree relationships with our customers. The bedrock of our approach to customers' needs is delivering value, driving sustainable innovation, increasing productivity, and helping companies reach operational efficiency in the new digital economy.

**Engagement
Models
B.O.O.S.T.**

Engagement Models

B.O.O.S.T.

Build. Operate. Own. Service. Transfer.

Comprehensive engagement models for all your custom software needs: short and long-term development, maintenance and support.

Indrivo works with three types of engagement models depending on the needs, resources and timeframes of your project.

Though we specialize in these 3 models, we can also deliver customized engagement models to fulfill your specific needs.

Dedicated Team

By selecting the dedicated team model, several Indrivo developers will work exclusively on your project, you will have full management control over the project and the team, the cost of the project will be based on hourly rates.

Time & Material

This model is used when the resources and time can't be estimated upfront. The project is built first, and only after completion and full acceptance of the project, the customer pays only for the time and resources spent.

Our Engagement Models Capabilities

Although the team's composition may differ depending on the project, these are the most popular categories of our engagement models capabilities:

- Back-end Developers
- Front-end Developers
- Full-stack Developers
- Product Owners
- Solution Architects
- Business Analysts
- UI&UX Designers
- Scrum Masters
- QA Engineers
- DevOps

- RUP

Web Development

- AngularJS
- Vue.js
- JavaScript
- CSS3
- HTML5
- PHP
- Laravel
- React
- Symfony

CMS

- Drupal
- LMSIlias
- Kentico
- Orchard

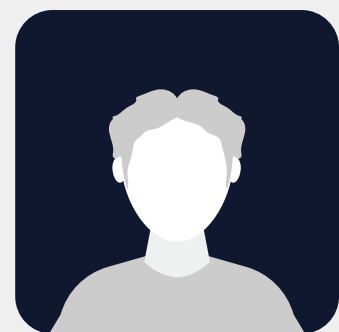

07. Testimonials

“

“We have had an extremely positive experience with Indrivo and found them to be a more than competent and extremely hard-working organisation. Right from the beginning, they provided a project manager who effectively worked for us, perfectly understood our needs and constantly tested the software on our behalf. Indrivo stands out in their quality and competence and we have been so pleased with the results, that we have commissioned them for a number of other projects, including a new blockchain CRM, a picture database and a direct procurement sales platform.”

Michael Leidig

CEO - Central European News Ltd, Austria

“

“During our collaboration, Indrivo showed professionalism, seriousness and attention to detail, strictly respecting the implementation of the technical requirements provided in the specifications.”

Cristina Malai

Vice Director USAID, Rule of Law Institutional Strengthening Program (ROLISP), Moldova

“

“For over one and a half year already, Indrivo has assisted us in the development of a series of web applications with very good results. Although remote, our collaboration has grown very strong through daily interactions and open communication. The language barrier has been of no concern as their verbal and written English level is very good. When it comes to web application and API development with .NET and ASP.NET MVC, there is nothing that the team should be taught, the team has proven to be very technically skilled. It is hence with the utmost pleasure and confidence that I recommend Indrivo as a partner.”

Christophe Herreman

Software Development Manage, Renson NV, Belgium

“

“During the execution of this project, Indrivo provided in full the activities of analysis, projection, development, set-up, configuration, testing, training and technical assistance for implementation of an intranet system for the Ombudsman’s office of Moldova. We are pleased with the collaboration with this company and we recommend their team as a responsible and qualified partner for development of complex information systems.”

Dumitru Roman

Deputy Chief – Directorate of Reforms, Policies and Reports, Ombudsman’s Office of Moldova

“

“We appreciate the efficiency and high quality of software development services provided by Indrivo within the EDMITE project of UNDP Moldova, by supporting the Central Electoral Commission in developing an IT system to increase the transparency of the electoral process in Moldova. Throughout our collaboration, the Indrivo team has demonstrated a high level of professionalism, commitment and efficiency, remaining flexible and results-oriented. The consultations provided by the team and the direct interactions with the CEC’s IT and Election Management Departments were highly appreciated and led to the successful implementation of the project.”

Dorin Toma

Senior Project Officer, EDMITE Project, UNDP Moldova

“

“We highly recommend Indrivo for their services for any complex software development projects where experience in technical analysis and working with sensitive workflows and data is required.”

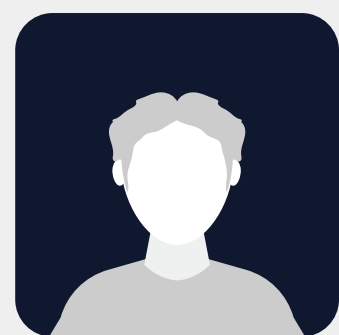

Tatiana Ciaglic

Head of E-transformation, E-training and IT Division National Institute of Justice, Moldova

“

“We would like to express our appreciation for the quality, diligence and professionalism of Indrivo during our collaboration and we would recommend Indrivo with confidence, being firmly convinced that the collaboration with this company will bring added value to end-users.”

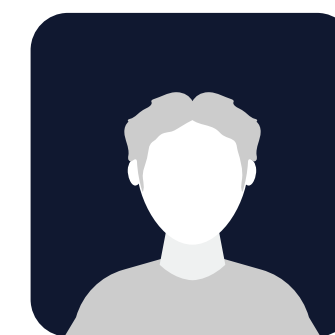

Dumitru Tintiuc

Head of the Information Technology Department, General Inspectorate of Border Police of the Ministry of Internal Affairs, Moldova

“

“Euro Finans AB is delighted to recommend Indrivo for the delivery of high-quality service. They provided the best-in-class development service which stands out compared to other providers in the region. For this engagement, Indrivo did not fail to deliver, everything went according to the agreed project schedule and with the budget. This simply makes Indrivo a reliable partner to us.”

Anders Blomqvist

Finance & Administrative Director, Euro Finans AB, Sweden

“

“Our communication agency, Hcommunications SA, has been working closely with Indrivo on various web-based client projects since 2014.

Indrivo collaborated with us on a major custom web platform for one of our clients, FIAP (Federation Internationale de l’Art Photographique). The development of the platform helps the organization manage hundreds of worldwide photographic contests yearly. The company possesses the necessary technical skills, they also provided advice on how to optimize established processes and adapt them to the new workflow. I can recommend this company as a competent and hardworking provider in terms of web development.”

Thomas Hoffman

CEO - Hcommunications SA, Final beneficiary: FIAP, Luxembourg

“

“While working with Indrivo, we were always amazed by the creativity and innovation they brought – they had an advantage in thinking outside the box and transforming our vision from paper to reality.

We highly recommend Indrivo to any company, especially beneficiaries of public institutions.”

Catalina Popescu

Project manager, Insoft Development & Consulting Final beneficiary: School Inspectorate, Alba County, Romania
