Subject: Romanian Language Localization for Video Management Software Milestone XProtect

We are writing to inform that the client interface of the Milestone XProtect video management software, XProtect Smart Client, is currently undergoing translation into the Romanian language.

As part of our ongoing commitment to enhancing accessibility and user experience for our Romanian-speaking users, we are pleased to inform you that the localized version of the XProtect Smart Client is intended for release during 2025.

XProtect Smart Client is a desktop application designed to help operators get intuitive control over security installations by giving users access to live and recorded video, instant control of cameras and connected security devices, and the ability to make advanced searches for recordings and metadata.

Our dedicated localization team is working diligently to ensure that all components of the software interface are translated with precision, while maintaining the highest standards of usability and functionality.

Should you require any further information, please do not hesitate to contact us.
